A lavishly illustrated selection of highlights from the Art Institute of Chicago ' s extraordinary collection of the arts of Africa Featuring a selection of more than 75 works of traditional African art in the Art Institute of Chicago ' s collection, this stunning volume includes objects in a wide variety of media from regions across the continent. Essays and catalogue entries by leading art historians and anthropologists attend closely to the meanings and materials of the works themselves in addition to fleshing out original contexts. These experts also underscore the ways in which provenance and collection history are important to understanding how we view such objects today. Celebrating the Art Institute ' s collection of traditional African art as one of the oldest and most diverse in the United States, this is a fresh and engaging look at current research into the arts of Africa as well as the potential of future scholarship. This is an indispensable guide for all those working with any temporary power system, including those at: * agricultural shows and outdoor fairs * concerts * theatrical events * film and TV broadcasting * exhibitions * festivals * temporary buildings and structures

"The BIM Handbook is an extensively researched and meticulously written book, showing evidence of years of work rather than something that has been quickly put together in the course of a few months. It brings together most of the current information about BIM, its history, as well as its potential future in one convenient place, and can serve as a handy reference book on BIM for anyone who is involved in the design, construction, and operation of buildings and needs to know about the technologies that support it. The need for such a book is indisputable, and it is terrific that Chuck Eastman and his team were able to step up to the plate and make it happen. Thanks to their efforts, anyone in the AEC industry looking for a deeper understanding of BIM now knows exactly where to look for it." —AECbytes book review, August 28, 2008 (www.aecbytes.com/review/2008/BIMHandbook.html) DISCOVER BIM: A BETTER WAY TO BUILD BETTER BUILDINGS Building Information Modeling (BIM) offers a novel approach to design, construction, and facility management in which a digital representation of the building process is used to facilitate the exchange and interoperability of information in digital format. BIM is beginning to change the way buildings look, the way they function, and the ways in which they are designed and built. The BIM Handbook, Second Edition provides an in-depth understanding of BIM technologies, the business and organizational issues associated with its implementation, and the profound advantages that effective use of BIM can provide to all members of a project team. Updates to this edition include: Completely updated material covering the current practice and technology in this fast-moving field Expanded coverage of lean construction and its use of BIM, with special focus on Integrated Project Delivery throughout the book New insight on the ways BIM facilitates sustainable building New information on interoperability schemas and collaboration tools Six new case studies Painting a colorful and thorough picture of the state of the art in building information modeling, the BIM Handbook, Second Edition guides readers to successful implementations, helping them to avoid needless frustration and costs and take full advantage of this paradigm-shifting approach to construct better buildings that consume fewer materials and require less time, labor, and capital resources.

Aquaponics is the integration of aquaculture and soilless culture in a closed production system. This manual details aquaponics for small-scale production--predominantly for home use. It is divided into nine chapters and seven annexes, with each chapter dedicated to an individual module of aquaponics. The target audience for this manual is agriculture extension agents, regional fisheries officers, non-governmental organizations, community organizers, government ministers, companies and singles worldwide. The intention is to bring a general understanding of aquaponics to people who previously may have only known about one aspect.

InfoWorld is targeted to Senior IT professionals. Content is segmented into Channels and Topic Centers. InfoWorld also celebrates people, companies, and projects.

The 6th edition has been thoroughly revised to incorporate the most recent medical-surgical nursing information. This comprehensive resource contains essential information that students need to prepare for lectures, classroom activities, examinations, clinical assignments, and comprehensive care of patients.
