Fully updated and revised, this comprehensive and informative textbook provides readers with an overview of current consumer sales law and equips them with a view of how this fast-changing subject has, and will continue to develop through the inclusion of new reform proposals. This book analyzes the interaction of consumer sales law with politics, the appeal of consumer protection to politicians and the influence of the European Union and the EU Directives. It also discusses the removal of consumer sales law from its traditional realm of legal professionals to consumer and debt advisors and public officials with the power to seek injunctions to protect consumers. In addition to this, it: fully integrates both the Unfair Commercial Practices Directive 2005 and the Consumer Credit Act 2006 into the basic 1974 Act explains how the sale of Goods Act 1979 has been modified by the 1999 Directive combines the public protection of consumers under the Enterprise Act 2002 (e.g. Office of Fair Trading) is supplemented by comprehensive e-updates on its Companion Website, keeping the content current between editions. Written by an author with forty years experience of teaching sales and finance law to undergraduates, this textbook is an essential tool for all undergraduates studying commercial and consumer sales law.

This is the fifth, fully updated edition of Roy Goode's seminal work Commercial Law, covering the area's theoretical framework as well as its application. From its first publication, this book was acclaimed as the standard text on this field of the law. Now for its fifth edition, it has been completely revised and expanded to take into account the new developments of the last five years. The book lays out both the framework of commercial law and the application of fundamental principles to typical business

transactions. This unique combination of theory and practice is supplemented by specimen documents, tables of statutes, cases and conventions.

This book is a systematic analysis of the modern English law of domestic sale of goods, covering in detail the following aspects of sale of goods contracts: * formation and definitions * passing of property and risk * mistake and frustration * contents of the contract and implied terms * delivery and payment * termination for breach * exclusion clauses * remedies and transfer of title. Full treatment is given to proprietary matters and the significant reforms which have taken place in recent years including the Sale and Supply of Goods Act 1994, and the Sale of Goods (Amendment) Act 1995. The general law of contract is dealt with as it affects the special contract of sale, but export sales materials are treated only to the extent that they illustrate delivery and payment. The paperback edition also includes a new preface designed for the student reader, covering recent developments in the sale of goods. This thorough and comprehensive book will be a valuable resource for students of commercial law as well as academics and practitioners working in the area.

Mixed Legal Systems in Comparative Perspective

This book focuses on the law of commercial contracts as constructed by the U.S. and UK legal systems. Leading scholars from both sides of the Atlantic provide works of original scholarship focusing on current debates and trends from the two dominant common law systems. The chapters approach the subject areas from a variety of perspectives - doctrinal analysis, law and economic analysis, and social-legal studies, as well as other theoretical perspectives. The book covers the major themes that underlie the key debates relating to commercial contract law: role of consent; normative theories of contract law; contract design and good faith; implied terms and interpretation; policing contract behavior; misrepresentation, breach, and remedies; and the regional and international harmonization of contract law. Contributors provide insights on the many commonalities, but more interestingly, on the key divergences of the United States and United Kingdom's approaches to numerous areas of contract law. Such a comparative analysis provides a basis for future developments and improvements of commercial contract law in both countries, as well as other countries that are members of the common law systems. At the same time, insights gathered here should also be of interest to scholars and practitioners of the civil law tradition.

The fourth edition of this established authority is the most systematic study available of the law of sale of goods with reference to UK and Commonwealth authorities and relevant UK and EU legislation. It combines depth of treatment of problem areas with insightful commentary on possible lines of argument on traditionally difficult topics.

"Once more, we were delighted to take on the task of updating this text for its 14th edition, having taken over editorial responsibilities from the late John Adams from the 13th edition. In our preface to the previous edition, we recorded the sudden passing of Professor Adams. Sadly, in this preface, we must note another passing: on 30 March 2018, Patrick Atiyah, who wrote the 1st-8th editions of this book and continues to give the book its name, passed away at the age of 87. Patrick was one of those giants of academic contract law whose contributions continue to be read and to inspire scholars everywhere. We are both mindful of our task to maintain the scholarly rigour which he gave to this book as we take it into the future. This edition is also the first time since the 9th edition without a Scottish editor. Professor Hector MacQueen had been responsible for adding Scottish content since the 10th edition (2001), but decided that he would discontinue this role after the 13th edition was published in 2016. We are very grateful for Hector's contributions to the work. On the advice of the book's publishers, this edition has been put together without the benefit of a Scottish editor, although we have, of course, continued to take decisions from the Scottish courts into account in updating the various chapters. Since the last edition was published, there have been few major developments in the law on the sale of goods, aside from the difficult ruling by the Supreme Court in *PST Energy 7 Shipping LLC v OW Bunker Malta Ltd* [2016] UKSC 23 (which arrived too late for proper consideration in the previous edition). We have updated the text in light of recent cases and academic writings where appropriate. Furthermore, we have continued our task of streamlining the running order of the chapters, and we have sought to make gentle updates to the language of the book, preserving its rigour but ensuring it remains accessible to a contemporary audience. In some instances, we have curtailed or removed altogether the detailed discussion of the pre-1994 case-law which had become redundant as a result of the changes made to the Sale of Goods Act at that time. The rise of digital technology and new business models in the digital economy will invariably have an impact on the law concerning the sale of goods, but at this point, the real impact is not yet known. In some places, we have alluded to the possible significance of digital technology, and this could well become a more significant theme in future editions"--

"The rationalization of power has been an enduring feature of Modernity, assigning to human rights the task of subjecting the excesses of power to the scrutiny of critical reason." "Gaete examines this task in the wake of the crisis of modernity, when the belief that man can draw principles out of his own ground has lost its authority and when the very possibility of an enlightened, disinterested Reason is being questioned. The aim of the book is not to offer another critique of rights but to investigate how both rights and critiques are transformed by the rhetoric of power." "The author traces the discourse of judicial criticism as a series of rhetorical operations, bringing to light the paradoxes, antinomies and 'truth games' that permeate the field of human rights. He interrogates the discourse of modern humanism and investigates how its claims to being the law of the law and the metaphysics of the modern State shape the bond between State and citizen." "Gaete carries his argument across the fields of post-Nietzschean philosophy, anglo-american jurisprudence, political science, cultural and legal studies opening new ground for analyses of the rhetoric of rights."--BOOK JACKET.Title Summary field provided by Blackwell North America, Inc. Bringing together leading commercial and contract law scholars from the United Kingdom and United States, Comparative Contract Law: British and American Perspectives offers an insightful and comprehensive assessment of the commonalities and divergences in the contract law of these

two jurisdictions. Approaching the subject area from a variety of perspectives - doctrinal analysis, behavioural analysis, law and economics, and theoretical - the book examines familiar areas of contract law as practiced in the UK and US. Topics include contract theory and structure; contract formation and defects of consent; policing contracts and the duty of good faith; contract interpretation; damages; speciality contracts; and legal reform. The volume provides a thorough assessment of the current state of commercial contract law in the UK and US, and addresses the strengths and weaknesses of the national and European approaches to many issues of contract law. In particular it focuses on how commercial contract law should be improved, and whether harmonization of the different contract law regimes is a suitable, and appropriate, solution.

Commercial contract law is in every sense optional given the choice between legal systems and law and arbitration. Its 'doctrines' are in fact virtually all default rules. Contract Law Minimalism advances the thesis that commercial parties prefer a minimalist law that sets out to enforce what they have decided - but does nothing else. The limited capacity of the legal process is the key to this 'minimalist' stance. This book considers evidence that such minimalism is indeed what commercial parties choose to govern their transactions. It critically engages with alternative schools of thought, that call for active regulation of contracts to promote either economic efficiency or the trust and co-operation necessary for 'relational contracting'. The book also necessarily argues against the view that private law should be understood non-instrumentally (whether through promissory morality, corrective justice, taxonomic rationality, or otherwise). It sketches a restatement of English contract law in line with the thesis.

An Introduction to the Law of Contract

The Common European Sales Law in Context

Transatlantic Perspectives

Atiyah's Introduction to the Law of Contract is a well-known text through which thousands of university students have first encountered the law of contract, and the new edition has long been eagerly awaited by university teachers and students. This sixth edition, updated by Stephen Smith, continues to provide readers with an introduction to the theories, policies, and ideas that underlie the law, placing an equal emphasis on the law and critical analysis. In particular, the discussion of recent cases and legislation is centred on why contract law is the way it is, whether it can be justified, and, if not, what should be done to improve it. The sixth edition has been revised to place the law of contract in a modern context and to account for recent developments in the law, as well as those in academic thinking and writing. Addressing European influences and including perspectives from comparative law, this remains a stimulating and authoritative exposition of the modern law of contract.

"... there is a lack of a clear and simple exposition of the CISG for students and practitioners. That is the role of the current book, which it fills admirably. All of the issues that have been raised in the cases and the literature are considered, but without excessive detail. This is a

book that will do much to make the CISG an easily understandable text for all users, student and practitioner alike." Preface by Professor Eric E. Bergsten

This book explores the problems and application of agency law in commercial practice. Moving beyond the limited introductory resources currently available, it "tests" abstract agency law concepts in specific commercial contexts, with reference to jurisdictions around the world. There is an enduring commonality of concepts and principles within agency law, both within the Commonwealth and within the jurisdictions of the United States. The book's comparative approach, drawing together analysis of national and international jurisdictions, provides innovative perspectives and insights, as well as practical guidance on solving commercial problems. The book opens with a detailed introductory chapter which provides a broad overview of the agency issues arising in specific commercial contexts. The subsequent chapters are grouped thematically: company law, financial transactions and services, sale of goods; as well as agency in procedural contexts. Topics covered include the role of the director and directorial board in company law and agency law, agency in shipping law, undisclosed principal in sale of goods cases, regulation of conflicts of interest in securities transactions, poseur-agents and transactional intermediation, the operation of agency in retail financial services, the agent's warranty of authority, and power of attorney. This book is an invaluable resource on both agency theory and commercial practice.

Sale of Goods Forming Part of a Bulk

The last edition of this book saw a major restructuring of the whole work, and in particular, to stress the resurgence of freedom of contract ideology, and to introduce some basic economic issues in contract law. In this edition, the general shape and structure of the book have been left untouched, although as with previous editions, the whole work has been completely updated and modernized by replacing old and outdated examples with more modern questions with which the student may be assumed to be more familiar. The aims of the book remain unchanged: to supply a

basic introduction, not merely to the law of contract, but also to theories and policies and ideas underlying the subject. In addition, the author has constantly resorted to a modern historical approach, giving the student some sense of how the law has developed over the past 100 years or so. widely recognized as one of the most interesting and innovative books to have been published in the last 25 years, An Introduction to the Law of Contract remains as popular today with students and their teachers as it was when it was first published.

This volume contains summaries of the essential cases & extracts from key legislative provisions that you will need to draw upon when answering problem or essay questions. Debate & issue boxes are included to highlight contentious areas of the law & help you refine your critical analysis skills.

This volume sets out to compare the effects of this historical development by assessing whether shared experience has led to shared law.

Agency Law in Commercial Practice

European Contract Law unification projects have recently advanced from the Draft Common Frame of Reference (2009) to a European Commission proposal for an optional Common European Sales Law (2011) which is to facilitate cross-border marketing. This book investigates for the first time how CESL and DCFR rules would interact with various aspects of domestic law, represented by English and German law. Nineteen chapters, co-authored by British and German scholars, examine such interface issues for eg pre-contractual relationships, notions of contract, formation, interpretation, and remedies, extending to non-discrimination, third parties, transfers or rights, aspects of property law, and collective proceedings. They go beyond a critical analysis of CESL and DCFR rules by demonstrating where and how CESL rules would interact with neighbouring areas of English and German law before English and German courts, how domestic traditions might influence the application, which aspects might motivate sellers and buyers to choose or reject CESL, and which might serve as model for national legislators. The findings are summarized in the final two chapters.
