MyLab Accounting should only be purchased when required by an instructor. Instructors, contact your Pearson representative for more information. Pearson, the world's learning company.

Accessible, learner-friendly and jargon free, this best selling text in financial accounting is the ideal starting point for non-accounting students. Clear and Concise It not only arms the reader with the basic principles of the subject, but actively encourages the reader to build on these through an 'open-learning' approach, involving the reader in various questions and activities along the way. The third edition has been thoroughly updated and revised improving existing features and expanding content. Features include *New material on 'Social Reporting' *Double entry book-keeping included as an appendix only *An updated and revised selection of end-of -chapter, self-assessment, and review questions *Improved glossary of technical terms Financial Accounting for Non-specialists is suitable for all undergraduate and postgraduate students from any discipline, taking an introductory course or module in financial accounting. The open-learning approach also makes it suitable for those studying independently or on distance learning courses The Authors Peter Atrill is the head of the Department of Accounting and Law at the University of Plymouth Business School. Eddie McLaney is a VisItin

'Accounting for Business' is ideal for undergraduate students on business and accounting courses who need to understand the nuts and bolts of financial accounting. This popular textbook has always enjoyed a deserved reputation for accessibility and thoroughness. Now in its third edition, its contents have been fully updated and restructured to make them even easier to use.

Readers will benefit from the coverage of current accounting practices and legislation, in addition to the range of worked examples and self-test activities throughout the book. 'Accounting for Business' clearly explains accounting information's role in making sound business decisions and focuses upon the aspects of accounting practice which are most relevant to the non-specialist manager. It is ideal for first year undergraduates of business studies, higher students and those pursuing professional accountancy qualifications. This third edition has been restructured, to further enhance its 'student centred' approach. The content has now been broken down into 25 roughly equivalent 'bite-sized' individual study topics. Each of these requires 6 hours of study time, enabling this book to support a full scale semester course with two topics a week, or a full year course at one topic a week. Includes a wide selection of topical case studies, with a broad spread of international examples.

From the well-established author team of Eddie McLaney and Peter Atrill this text aims to offer non-specialist students a balanced introduction to financial and management accounting.

Accounting and Finance: An Introduction, now in its ninth edition, contains all the information you need to start your business career. With its use of practical techniques and real-world examples, this best-selling text teaches you the basics of understanding and using financial information. Were you looking for the book with access to MyAccountingLab? This product is the book alone, and does NOT come with access to MyAccountingLab. Buy Accounting and Finance for Non-Specialists, Tenth Edition by Peter Atrill and Eddie McLaney with MyAccountingLab access card 5e (ISBN 9781292135601) if you need access to MyLab as well, and save money on this resource. You will also need a course ID from your instructor to access MyAccountingLab. The 10th edition of this market-leading text offers an accessible, effective introduction to key accounting and finance topics. If you are new to accounting, or are studying a degree in accounting, this book will help you get to grips with the important principles of accounting and how to apply your learning to real-world business scenarios in a user-friendly manner.

*This text provides a comprehensive introduction to financial accounting. It is aimed at students who are not majoring in accounting as well as those who are. Those studying introductory-level financial accounting as part of their course in business, economics, hospitality management, tourism, engineering, or some other area, should find that the text provides complete coverage of the material at the level required. Students who are majoring in accounting should find the text a useful introduction to the main principles, which can serve as a foundation for further study.

The main focus of the text is on the ways in which financial statements and financial information can improve the quality of decision making. To ensure that readers understand the practical implications of the subject, there are, throughout the text, numerous illustrative extracts using commentary from company reports, survey data and other sources. Although some technical issues are dealt with in the text, the main emphasis throughout is on basic principles and underlying concepts. In this tenth edition, we have taken the opportunity to make improvements, including those suggested by students and lecturers who used the previous edition. We have rewritten some material to make it more understandable to readers, and have also increased the number of diagrams. The number of examples from real life have been expanded, as have the number of activities. We have also incorporated developments to International Financial Reporting Standards. Recent developments in auditing are discussed and explained. The text is written in an 'open-learning' style. This means that there are numerous integrated activities, worked examples and questions throughout the text to help you to understand the subject fully. In framing these questions and tasks, we have tried to encourage critical thinking by requiring analysis and evaluation of various concepts and techniques. You are encouraged to interact with the material and to check your progress continually. Irrespective of whether you are using the text as part of a taught course or for personal study, we have found that this approach is more 'user-friendly' and makes it easier for you to learn. We recognise that most of you will not have studied financial accounting before and, therefore, we have tried to write in a concise and accessible style, minimising the use of technical jargon. We have also tried to introduce topics gradually, explaining everything as we go. Where technical terminology is unavoidable we try to provide clear explanations. You will find all of the key terms highlighted in the text, and then listed at the end of each chapter with a page reference. All of these key terms are also listed alphabetically, with a concise definition, in the glossary given in Appendix B. This should provide a convenient point of reference from which to revise. A further

important consideration in helping you to understand and absorb the topics covered is the design of the text itself. The page layout and colour scheme have been carefully considered to allow for the easy navigation and digestion of material. The layout features a large page format, an open design, and clear signposting of the various features and assessment material. We hope that you will find the text both readable and helpful!--
