Please note: This is a companion version & not the original book. Sample Book Insights: #1 The developed world has mostly come to use banks to transfer money between accounts, using digital money. However, this isn't a complete solution since a shop's card reader could be down, your payment gateway might charge fees, and you may want to send money to someone not on the same banking network. #2 Bitcoins are a bit like money in a bank account with a debit card, except there is no safety net and no way to reverse a transaction. You can earn, spend, save, and invest them, but they aren't actually yours. #3 Bitcoin is secured by math. The blockchain is a digital ledger that is tamper-evident. It contains every confirmed transaction since January 2009. #4 Bitcoin is a digital currency that requires competitive Proof of Work to write to the ledger. The competition gets viciously Darwinian very quickly, and the electricity is literally wasted for the sake of decentralisation. Franny's mom says every mad scientist needs a lab assistant. Or could she use a little help?

Silicon Valley tries to disrupt the world — and the world says 'no.' Facebook: the biggest social network in history. A stupendous, world-shaping success. But governments were giving Facebook trouble over personal data abuses, election rigging and fake news. Mark Zuckerberg wondered: what if Facebook could pivot to finance? Or, better: what if Facebook started its own private world currency? Facebook could have so much power that governments couldn't stop them. It would be the Silicon Valley dream. Facebook launched Libra in June 2019. Libra would be an international currency and payment system. It would flow instantly around the world by phone. It could even "bank the unbanked." Libra could apparently do all this just by using a "blockchain." But Libra would also make Facebook too big to control—and to lead the way for Facebook's Silicon Valley fellows to swing the power of their money as they pleased. Facebook and their friends could work around any single country's rules. Libra could shake whole economies. And Facebook would become the "digital identity" provider to the world. If you wanted to use money at all, you'd have to go through Facebook. Governments looked at Libra — and they saw another 2008 financial crisis in the making. Facebook's plan would have made the company even more entrenched — at the cost of broken economies worldwide. Starting with toppling the US dollar. Libre was as incompetent as it was arrogant. — and the world stopped it in its tracks. But how did Facebook put forward such a bizarre and ill-considered plan, that left every regulator who saw it reeling in horror? And what happens when another company tries the same trick? Or when Facebook won't take "no" for an answer, and releases the cut-down version that they're already calling "Libra 2.0?" "Libra Shrugged" is the story of a bad idea. In the first-ever novel about a cyborg, a machine-enhanced man from a multiverse of the far future visits 1920s England. In 1920s England, a strange being crashes a village cricket game. After some glitchy, jerky attempts to communicate, this creature reveals that he is a machine-enhanced human from a multiverse thousands of years in the future. The mechanism implanted in his skull has malfunctioned, sending him tumbling through time onto the green grass of the cricket field. Apparently in the future, at the behest of fed-up women, all men will be controlled by an embedded "clockwork," camouflaged with hats and wigs. Published in 1923. The Clockwork Man—the first cyborg novel—tells the story of this odd time traveler' s visit. Spending time with two village couples about to embark upon married life, the Clockwork Man warns that because men of the twentieth century are so violent, sexist, and selfish, in the not-too-distant future they will be banned from physical reality. Poetry. These poems are steam punk on steroids. They're plutonium-powered and neon-lit. These poems describe the world as it should be, as we want it to be, as we fear it will be, as it is every morning between 3:00 and 5:00 when our dreams are invaded by Godzilla, Tarzan, Wonder Woman, King Kong, Sinatra. If ATTACK OF THE FIFTY-FOOT CENTERFOLD were a holiday, it'd be Hallowe'en for grown-ups, Christmas for space aliens, and the Fourth of July for everybody, because each of these poems is a little present, and like the best presents, they don't just please us--they set us free.

Winner of the Bram Stoker Award for Best Novel In her quickly gentrifying rural lake town Jade sees recent events only her encyclopedic knowledge of horror films could have prepared her for in this latest chilling novel that "will give you nightmares. The good kind, of course" (BuzzFeed) from the Jordan Peele of horror literature, Stephen Graham Jones. "Some girls just don't know how to die..." Shirley Jackson meets Friday the 13th in My Heart Is a Chainsaw, written by the New York Times bestselling author of The Only Good Indians Stephen Graham Jones, called "a literary master" by National Book Award winner Tananarive Due and "one of our most talented living writers" by Tommy Orange. Alma Katsus My Heart Is a Chainsaw "a homage to slasher films that also manages to defy and transcend genre." On the surface is a story of murder in small-town America. But beneath is its beating heart: a biting critique of American colonialism, Indigenous displacement, and gentrification, and a heartbreaking portrait of a broken young girl who uses horror movies to cope with the horror of her own life. Jade Daniels is an angry, half-Indian outcast with an abusive father, an absent mother, and an entire town that wants nothing to do with her. She lives in her own world, a world in which protection comes from an unusual source: horror movies...especially the ones where a masked killer seeks revenge on a world that wronged them. And Jade narrates the quirky history of Proofrock as if it is one of those movies. But when blood actually starts to spill into the waters of Indian Lake, she pulls us into her dizzying, encyclopedic mind of blood and masked murderers, and predicts exactly how the plot will unfold. Yet, even as Jade drags us into her dark fever dream, a surprising and intimate portrait emerges...a portrait of the scared and traumatized little girl beneath the Jason Voorhees mask: angry, yes, but also a girl who easily cries, fiercely loves, and desperately wants a home. A girl whose feelings are too big for her body. My Heart Is a Chainsaw is her story, her homage to horror and revenge and triumph.

On Halloween a spaceship turns Miss Irma Birnbaum, the cruelest teacher in the world, into a fifty-foot monster, inspiring terror in her students.

"Delightful . . . an engrossing oral history . . . As an enthusiastic ode to colorful, seat-of-your-pants filmmaking, this one's hard to beat." —Booklist (starred review) "Fantastic—a treasure." —Stephen King Crab Monsters, Teenage Cavemen, and Candy Stripe Nurses is an outrageously rollicking account of the life and career of Roger Corman—one of the most prolific and successful independent producers, directors, and writers of all time, and self-proclaimed king of the B movie. As told by Corman himself and graduates of "The Corman Film School," including Peter Bogdanovich, James Cameron, Francis Ford Coppola, Robert De Niro, and Martin Scorsese, this comprehensive oral history takes readers behind the scenes of more than six decades of American cinema, as now-legendary directors and actors candidly unspool recollections of working with Corman, continually one-upping one another with tales of the years before their big breaks. Crab Monsters is supplemented with dozens of full-color reproductions of classic Corman movie posters, behind-the-scenes photographs, and ephemera (many taken from Corman's personal archive), and critical essays on Corman's most daring films—including The Intruder, Little Shop of Horrors, and The Big Doll House—that make the case for Corman as an artist like no other. "This new coffee table book, brimming with outrageous stills from many of Corman's hundreds of films, looks at the wild career of the starmaker who was largely responsible for so much of the Hollywood we know today." —New York Post "Vividly illustrated." —People "It includes in-depth aesthetic appreciations of ten of Corman's movies, which, taken together, make a compelling case for Corman as an artist." —Hollywood.com "Outrageously entertaining." —Parade "Endlessly fascinating." —PopMatters
