The book is intended for all those who are interested in recycling of post consumer plastic waste. Although, this book discusses technical aspects of recycling, the authors have endeavoured to make this book easily understandable to anyone interested in the subject enabling the reader to gain a thorough grounding in all the subjects discussed.

Learn about the history of Times Square in New York with iMinds Travel's insightful fast knowledge series. Times Square stands proudly in the centre of New York City. Broadway meets Seventh Avenue in a place where tourists meet and fall in love with New York. The bright lights and billboards that seem to stretch on forever are just part of what makes Times Square so famous and so attractive. It is also the centre of New York's famous Broadway theatre district and is the place where millions of people come together to bring in the New Year. Times Square makes up most of the western midtown Manhattan area. In the 1800s the area was known as Longacre Square. It housed horse exchanges and stables, carriage factories, blacksmith's shops and upscale brothels. In 1904, The New York Times moved in and established one of the tallest buildings in the city. The newspaper convinced the city to create a subway stop there and to rename the area 'Times Square'. When the new building was opened on 31 December 1904, the newspaper celebrated by holding a public New Year's Eve celebration in the square, complete with fireworks. This tradition is still carried on today. So the New York Times had a significant part in the making of Times Square. Yet it was another publication that brought the drama to the square. iMinds will tell you the story behind the place with its innovative travel series, transporting the armchair traveller or getting you in the mood for discover on route to your destination. iMinds brings targeted knowledge to your eReading device with short information segments to whet your mental appetite and broaden your mind.

Auto Repair For Dummies, 2nd Edition (9781119543619) was previously published as Auto Repair For Dummies, 2nd Edition (9780764599026). While this version features a new Dummies cover and design, the content is the same as the prior release and should not be considered a new or updated product. The top-selling auto repair guide--400,000 copies sold--now extensively reorganized and updated Forty-eight percent of U.S. households perform at least some automobile maintenance on their own, with women now accounting for one third of this \$34 billion automotive do-it-yourself market. For new or would-be do-it-yourself mechanics, this illustrated how-to guide has long been a must and now it's even better. A complete reorganization now puts relevant repair and maintenance information directly after each automotive system overview, making it much easier to find hands-on fix-it instructions. Author Deanna Sclar has updated systems and repair information throughout, eliminating discussions of carburetors and adding coverage of hybrid and alternative fuel vehicles. She's also revised schedules for tune-ups and oil changes, included driving tips that can save on maintenance and repair costs, and added new advice on troubleshooting problems and determining when to call in a professional mechanic. For anyone who wants to save money on car repairs and maintenance, this book is the place to start. Deanna Sclar (Long Beach, CA), an acclaimed auto repair expert and consumer advocate, has contributed to the Los Angeles Times and has been interviewed on the Today show, NBC Nightly News, and other television programs.

In chassis development, the three aspects of safety, vehicle dynamics and ride comfort are at the top of the list of challenges to be faced. Addressing this triad of challenges becomes even more complex when the chassis is required to interact with assistance systems and other systems for fully automated driving. What is more, new demands are created by the introduction of modern electric and electronic architectures. All these requirements must be met by the chassis, together with its subsystems, the steering, brakes, tires and wheels. At the same time, all physical relationships and interactions have to be taken into account.

The light-duty vehicle fleet is expected to undergo substantial technological changes over the next several decades. New powertrain designs, alternative fuels, advanced materials and significant changes to the vehicle body are being driven by increasingly stringent fuel economy and greenhouse gas emission standards. By the end of the next decade, cars and light-duty trucks will be more fuel efficient, weigh less, emit less air pollutants, have more safety features, and will be more expensive to purchase relative to current vehicles. Though the gasoline-powered spark ignition engine will continue to be the dominant powertrain configuration even through 2030, such vehicles will be equipped with advanced technologies, materials, electronics and controls, and aerodynamics. And by 2030, the deployment of alternative methods to propel and fuel vehicles and alternative modes of transportation, including autonomous vehicles, will be well underway. What are these new technologies - how will they work, and will some technologies be more effective than others? Written to inform The United States Department of Transportation's National Highway Traffic Safety Administration (NHTSA) and Environmental Protection Agency (EPA) Corporate Average Fuel Economy (CAFE) and greenhouse gas (GHG) emission standards, this new report from the National Research Council is a technical evaluation of costs, benefits, and implementation issues of fuel reduction technologies for next-generation light-duty vehicles. Cost, Effectiveness, and Deployment of Fuel Economy Technologies for Light-Duty Vehicles estimates the cost, potential efficiency improvements, and barriers to commercial deployment of technologies that might be employed from 2020 to 2030. This report describes these promising technologies and makes recommendations for their inclusion on the list of technologies applicable for the 2017-2025 CAFE standards.

Fully updated and in line with latest specifications, this textbook integrates vehicle maintenance procedures, making it the indispensable first classroom and workshop text for all students of motor vehicle engineering, apprentices and keen amateurs. Its clear, logical approach, excellent illustrations and step-by-step development of theory and practice make this an accessible text for students of all abilities. With this book, students have information that they can trust because it is written by an experienced practitioner and lecturer in this area. This book will provide not only the information required to understand automotive engines but also background information that allows readers to put this information into context. The book contains flowcharts, diagnostic case studies, detailed diagrams of how systems operate and overview descriptions of how systems work. All this on top of step-by-step instructions and quick reference tables. Readers won't get bored when working through this book with questions and answers that aid learning and revision included.

Winner of the Stubbendieck Great Plains Distinguished Book Prize 2019 selection for the One Book One Nebraska and All Iowa state reading programs "Genoways gives the reader a kitchen-table view of the vagaries, complexities, and frustrations of modern farming.Insightful and empathetic." ~Milwaukee Journal Sentinel The family farm lies at the heart of our national identity, and yet its future is in peril. Rick Hammond grew up on a farm, and for forty years he has raised cattle and crops on his wife's fifth-generation homestead in Nebraska, in hopes of passing it on to their four children. But as the handoff nears, their family farm—and their entire way of life—are under siege on many fronts, from shifting trade policies, to encroaching pipelines, to climate change. Following the Hammonds from harvest to harvest, Ted Genoways explores the rapidly changing world of small, traditional farming operations. He creates a vivid, nuanced portrait of a radical new landscape and one family's fight to preserve their legacy and the life they love.

Nissan Z: 50 Years of Exhilarating Performance is the Nissan-official chronicle of Z history, from Datsun's planning for the new model in the late 1960s through the latest 50th anniversary Nissan 370Z. The Datsun 240Z revolutionized the sports car industry and demolished established assumptions about Japanese automakers. With the Z, Datsun gave the world a sleek, sexy, fast product—one that forever banished the idea that Japanese manufacturers could only build economy cars. Over the past 50 years, six generations of the Z car have generated a massive, devoted following. More than 1.5 million cars have been sold worldwide. The retro-inspired 350Z reinvigorated the Z's fortunes in the 21st century, and the latest incarnation, the 370Z, continues the tradition of high-performance in a modern, affordable package. In addition to a complete history of the Z, this handsomely illustrated book examines the car's significant racing history with successes in IMSA and SCCA sports car racing, including extensive racing by Paul Newman for Bob Sharp and John Morton with Brock Racing Enterprises. Special attention is devoted to the cult of Z-fans around the world who have supported Nissan's sports car through thick and thin and the early car's emergence as a rapidly appreciating collector car. The story is told by author Pete Ewanow, who has enjoyed a long relationship with Nissan. His insights into the history of this automotive icon provide a fresh, compelling perspective on the five decades of the Z that no enthusiast will want to miss.

This year marks the 50th anniversary of the British cult classic movie The Italian Job. This landmark anniversary presents a unique opportunity to celebrate the film with a coffee table book packed full of images, insights and revelations. Loaded with Sixties swagger, and famed for its endlessly quotable dialogue and one of the most impressive car chases in movie history, The Italian Job is the ultimate celebration of 'cool Britannia'. From the opening sequence of Rossano Brazzi gliding through the Alps in an orange Lamborghini Miura, to the high-speed getaway across the city of Turin in three Mini Coopers, The Italian Job is a petrolhead's dream. The Self Preservation Society will detail how all these cars, including the Aston Martin DB4 and E-Type Jaguars were found and ultimately where they are today. Over the last 20 years, author Matthew Field he has interviewed all the key people involved in the 1969 production. Through him, their stories are revealed, often for the first time. Based on more than 50 in-depth interviews with the cast and crew, and lavishly illustrated with hundreds of never-before-seen photographs and production documents, this definitive book will explode some myths, include a few revelations and tell the fascinating full story of this perennially popular movie.

This book addresses different aspects of green biocomposite manufacture from natural fibres and bioplastics, including the manufacturing procedures and the physical, mechanical, thermal and electrical properties of green biocomposites. Featuring illustrations and tables that maximize reader insights into the current research on biocomposites, it emphasises the role of green technology in the manufacture of biocomposites and analysis of properties of biocomposites for different applications. It is a valuable resource for researchers and scientists in industry wanting to understand the need for biocomposites in the development of green, biodegradable and sustainable products for different applications.

A History and a Celebration

After Ford unsuccessfully attempted to buy Ferrari in 1963, the American car giant instead embarked on its own racing programme in a bid to beat the famous Italian marque at the world's most prestigious race, the Le Mans 24 Hours, as told in the forthcoming Hollywood movie Ford v. Ferrari. This updated edition of The Ford that Beat Ferrari tells the story of how that mission was eventually accomplished. Development of the GT40: how the prototype Ford GT emerged in 1964 from the previous year's Lola GT prototype racing exploits in its earlier years, first with Ford Advanced Vehicles (1964), then Shelby American (1965) and Alan Mann Racing (1966). The big ones: this section of the book covers the GT40's evolution into the 7-litre monsters that brought enormous success, including the first two Le Mans victories with the Mark II (1966) and Mark IV (1967), before becoming outlawaed by new restrictions on engine size. The Gulf years: against all expectations, the venerable GT40, now back to 5-litre power, raced on with John Wyer's iconic blue and orange colours of Gulf, successes including two further Le Mans wins (1968 and 1969). The production line racer: the stories of the 68 privateers, big and small, who raced GT40s. Chassis and drivers: a data section giving resumes of type designations, chassis histories and all drivers who raced GT40s. The magic lives on: the book's concluding sections show surviving cars at differing stages in their later life and bring the story up to date with developments since the 2005 edition.

This handbook deals with the vast subject of thermal management of engines and vehicles by applying the state of the art research to diesel and natural gas engines. The contributions from global experts focus on management, generation, and retention of heat in after-treatment and exhaust systems for light-off of NOx, PM, and PN catalysts during cold start and city cycles as well as operation at ultralow temperatures. This book will be of great interest to those in academia and industry involved in the design and satisfying the current and future emission standards.

In Ezra's first book, he learned about baseball, girls, cars, drinking, and a lot of hard physical labor, not necessarily in that order. America had not yet been pulled into the war in Europe, and we didn't yet know much about that strange little country across the Pacific, known as Japan.As we pick up the story in book two, Ezra is now in his early 20's, working hard for meager pay, and a long way from his family in Illinois and Indiana.
