There is a fundamental reason, the authors of this book contend, why national financial systems falter and collapse: the failure of central banks and other supervisory authorities to deal promptly and decisively with insolvent banks. In Preventing Financial Chaos, Ramsey and Head, both well-known to the international banking community for their restructuring services in developing and transitional economies, take a no-nonsense attitude and show exactly how to usher a problem bank out of the financial system in any country. Their clearly defined rules and procedures build disciplined, competent action that activates political will and successfully curtails systemic chaos. With this nuts-and-bolts guide, policymakers, legislators, central bank officials, and representatives of international financial institutions will be able to achieve the following: recognize, monitor and resolve bank failures; conduct timely and orderly closing of problem banks; and develop national legislation to prevent the spread of bank insolvency. The authors' firmly-held convictions about which choices should be made and why is sure to launch an important debate among lawyers, bankers and academics—a debate which will inevitably focus much-needed attention on one of the most urgent problems in today's interdependent world economic order.

Current Critical Debates in the Field of Transsexual Studies introduces new thinking on non-conforming gender representation, addressing transsexuality as a subjective experience that highlights universal dilemmas related to how we conceive identity and exploring universal questions related to gender: its objects, objections, and obstacles. This book seeks to disassemble prejudicial orientations to the challenges and the everydayness of transsexuality and build new understanding and responses to issues including: medical biases, the problem of authenticity, and the agency of the child. Oren Gozlen leads an examination of three central pressures: transformation of a medical model, the social experience of becoming transgender, and the question of self-representation through popular culture. The chapters reframe several contemporary dilemmas, such as: authenticity, pathology, normativity, creativity, the place of the clinic as a problem of authority, the unpredictability of sexuality, the struggle with limits of knowledge, a demand for intelligibility and desire for certainty. The contributors consider sociocultural, theoretical, therapeutic, and legal approaches to transsexuality that reveal its inherent instability and fluidity both as concept and as experience. They place transsexuality in tension and transition as a concept, as a subject position, and as a subjectivity. The book also reflects the way in which political and cultural change affects self and other representations of the transsexual person and their others, asking: how does the subject metabolize the anxieties that relate to these transformations and facilitations? How can the subject respond in contexts of hostility and prohibition? Offering a much-needed interdisciplinary exploration, Current Critical Debates in the Field of Transsexual Studies will appeal to psychoanalysts and psychotherapist as well as psychologists and scholars of gender studies, cultural studies and sociology.
