The results presented in this report are a compilation of data collected at Northwest Airlines terminal, General Mitchell International Airport, Milwaukee, Wisconsin, from February 22-24, 1994. The study was conducted in support of the Aviation Security Human Factors Research Program located at the Federal Aviation Administration Technical Center (FAATC), Atlantic City International Airport, New Jersey. Real-time (e.g., at the ticket counter and gate) passenger profiling was conducted February 22-24, 1994 in Milwaukee, Wisconsin. Passengers on twenty-one Northwest Airline flights were profiled according to parameters set forth by the Passenger

Profiling Subject Matter Expert panel. One hundred ten passengers (82.7%) were cleared by the profile; twenty-three (17.3%) were not cleared. The mean time to profile was 1 minute 23 seconds. An analysis of variance (ANOVA) and a subsequent Least Square Difference (LSD) multiple comparison showed it took significantly longer to profile passengers who were not cleared (mean = 1 minute 27 seconds) than to profile passengers who were cleared (mean = 1 minute 9 seconds)  $F(131, 1) = 36.87, p = .000$ . Interview and anecdotal data are also summarized in the report.

Assessment of Technologies Deployed to Improve Aviation Security

**Filling a critical gap in aviation engineering literature, this unique and timely resource provides you with a thorough introduction to**

**aviation system security. It enables you to understand the challenges the industry faces and how they are being addressed. You get a complete analysis of the current aviation security standards ARINC 811, ED-127 and the draft SC-216. The book offers you an appreciation for the diverse collection of members within the aviation industry. Moreover, you find a detailed treatment of methods used to design security controls that not only meet individual corporate interests of a stakeholder, but also work towards the holistic securing of the entire industry. **regime that applies thereto, with a view to recommending measures that are calculated to infuse a new approach to the problem. Emphasis is laid throughout the work on action which may be taken to alleviate the problem of unlawful interference. Its conclusion incorporates various steps that can be taken towards achieving this objective. The author focuses on the core of the problem which has effectively precluded significant progress into inroads that would curb the threat terrorism in aviation: the attitude of the international community. The book therefore examines in limine the fundamental role of**

**international law in the light of the United Nationals Congress of International Public Law of March 1995, and its effect on international criminal law. It then determines the applicable principles of State sovereignty and examines the principles of State responsibility. Its main purpose is to recommend the establishment of a new philosophy of international criminal law which transcends municipal boundaries. Academic, scholarly and judicial precedent for this book is the adduced in support of this argument. The book also examines the role of International Civil Aviation Organization (ICAO)**

**as the regulatory body responsible for civil aviation, in the context of new approaches made by the international community towards the status of ICAO in aviation security. The practical value of this work essentially lies in the legal recommendations it makes at its conclusion, which are based on existing principles of international law. It will thus be invaluable not only to international and aviation lawyers, criminal lawyers (both international and national), security professionals and teachers and students of international law, but also to aviation industry executives and regulatory agency**

on airlines, airports, air navigation services providers and States in the field of aviation, but is notably lacking when it comes to the rights of the airline passenger, and the average citizen who is threatened by military air strikes. It addresses subjects such as international resolutions on human rights and other human rights conventions related to aviation that impact both air transport consumers and people on the ground who are threatened by air strikes through drone attacks; disabled and obese airline passengers; compensation for delayed carriage and the denial of carriage; noise and air pollution caused by aviation and their effects on human health and wellbeing; prevention of death or injury to passengers and attendant compensatory rights; risk management; relief flights; and racial profiling. Aviation Security Management [3 volumes]

Against the backdrop of enormous technological stride this book argues that the air transport industry must constantly vigilant in its efforts to employ a legal regime that is applicable to the aeronautical and human aspects of the carriage by air of persons and goods. In this regard, safety and security are of the utmost importance both in terms of safe air navigation and the preservation of human life. Although the International Civil Aviation Organization (ICAO) addresses legal issues through its

Legal Committee, many emerging issues that urgently require attention lie outside the Committee's purview. This book analyzes in detail the items being considered by ICAO's Legal Committee, considers the legal nature of ICAO, and discusses whether or not ICAO's scope should be extended. Since the limited issues currently addressed by ICAO do not reflect the rapidly changing realities of air transport, the book also covers a broad range of key issues outside the parameters set by ICAO such as: the need to teach air law to a new generation of aviation professionals; combating cyber-crime and cyber-terrorism; the regulation of artificial intelligence;

traveller identification; interference with air navigation; human trafficking; unruly passengers; climate change; air carrier liability for passenger death or injury; Remotely Piloted Aircraft Systems (drones); and the cabin crew and their legal implications.

This book offers an extraordinary wealth of information from the ground up, of the law governing and regulating air transport today, with a strong emphasis on international aviation. A team of distinguished authors in the field of aviation law provide a cogent synthesis from which sound legal opinions and strategies of legal action may be confidently built. Among the many topics
