Minimalism is the thing that gets us past the things so we can make room for life's most important things—which actually aren't things at all. At age 30, best friends Joshua Fields Millburn & Ryan Nicodemus walked away from their six-figure corporate careers, jettisoned most of their material possessions, and started focusing on what's truly important. In their debut book, *Joshua & Ryan*, authors of the popular website *The Minimalists*, explore their troubled pasts and descent into depression. Though they had achieved the American Dream, they worked ridiculous hours, wastefully spent money, and lived paycheck to paycheck. Instead of discovering their passions, they pacified themselves with ephemeral indulgences—which only led to more debt, depression, and discontent. After a pair of life-changing events, Joshua & Ryan discovered minimalism, allowing them to eliminate their excess material things so they could focus on life's most important "things": health, relationships, passion, growth, and contribution.

A bold exploration and call-to-arms over the widening gap between AI, automation, and big data—and our ability to deal with its effects. We are living in the first exponential age. High-tech innovations are created at dazzling speeds; technological forces we barely understand remake our homes and workplaces; centuries-old tenets of politics and economics are upturned by new technologies. It all points to a world that is getting faster at a dizzying pace. Azeem Azhar, renowned technology analyst and host of the Exponential View podcast, offers a revelatory new model for understanding how technology is evolving so fast, and why it fundamentally alters the world. He roots his analysis in the idea of an “exponential gap” in which technological developments rapidly outpace our society’s ability to catch up. Azhar shows that this divide explains many problems of our time—from political polarization to ballooning inequality to unchecked corporate power. With stunning clarity of vision, he delves into how the exponential gap is a near-inevitable consequence of the rise of AI, automation, and other exponential technologies, like renewable energy, 3D printing, and synthetic biology, which loom over the horizon. And he offers a set of policy solutions that can prevent the growing exponential gap from fragmenting, weakening, or even destroying our societies. The result is a wholly new way to think about technology, one that will transform our understanding of the economy, politics, and the future.

ABOUT THE ORIGINAL BOOK: In his book, Anthony Robbins presents his basic theory of the power of attitude and individual thought. The theory states that the essential problem of people is not in the circumstances that they live with, but in the vital attitude which they assume. "Life will pay any price you ask," says the author, but then clarifies that it is necessary to give our best in any activity that we engage in. The quest for success is to know exactly what one aspires to achieve and then moving on with the action plan that allows that desire to be fulfilled. "Unlimited Power" shows you the steps that you must take on the path that will guarantee the success and achievement of your goals. It is a guide for your actions that will bring you to a good life.

ABOUT THE ORIGINAL BOOK "Control Your Destiny", is a self-help book whose objective is to get people to achieve the control they seek in their lives and, in the same way, they are invited to develop their best potential in their personal, professional and economic life. As its name says, this book, written by Anthony Robbins, is an open door to make big and ambitious changes, to achieve it, the author provides us with the tools to discover our true potential and manage it to reach prosperity in a conscious way and not by mere luck. The premise of this work is based on the idea that, although happiness is an innate emotion in the human being, few men are happy and satisfied with their lives. So, if we can all be happy, what is holding us back? Tony Robbins argues that our decisions play an important role, as well as our beliefs and the pleasure and pain that determine our choices. Surely, many of us, if not all of us, have dreamed of being different or fulfilling goals that seem unattainable. Unfortunately, the tedium of daily life and obligations can begin to undermine our dreams. Little by little, this leads us to begin to limit ourselves and, in the long run, to abandon the objectives we had. Living in such an oppressive situation, can make us believe that there is no way out; However, for Robbins the change is not an unattainable process, but could be achieved through something called Neuroassociative Conditioning (NAC). What is relevant about the NAC for this work is that the author defines six master steps that will help us determine what we want and what we need to do to obtain it. First, he points out that questions have great power, as does adopting a transformative vocabulary. In addition,

it will show us how to achieve emotional balance, to establish and implement objectives and, finally, to learn to be consistent. All these introspective tools will help us make a lasting change that will impact different areas of our lives. Once he has provided us with these tools for change, the author proposes a seven-day exercise to transform our lives. This exercise seeks to make us responsible for our destiny in different areas: emotional, rational, economic and physical. This process will not only help you transform, but you will also be more consistent with the new identity you have acquired. Anthony Robbins is a life coach, psychologist, speaker and motivational inspirer passionate to help people to live better, and has spread his wisdom in numerous works. All have achieved extraordinary success and have forged a large group of followers who draw from their seminars and books the precious teachings that the author generously delivers.
