[This book] looks at the history and contemporary role of celebrities in American politics, and the long-term implications of this trend. It examines the intersection of prominent families such as the Kennedys, Bushes, and Clinton with entertainment figures like Charlton Heston (now head of the National Rifle Association) ... Since this book examines celebrity politics in historical context as well as in the contemporary situation, it can be used as a ... supplementary reading in introduction to American Politics courses as well as classes on mass media, campaigns and elections, Congress, the presidency, parties, interest groups, and popular culture.-Pref.

The common framework for industrial property information and documentation.

Combining the talents of photographers, artists, vets, judges and writers from Britain, Australia, New Zealand, Europe and North America, this encyclopaedia of dogs contains photographs and descriptions of every breed currently recognized by the Kennel Clubs of the UK, the USA and Canada, and the Federation Cynologique Internationale. It offers advice on selecting a dog, and on its health and general care, development, training and handling.

Teenagers Miles and Chateaugue have run away from home and soon form a suicide pact to preserve their fleeting innocence. Written in a style that echoes Arthur Rimbaud and William S. Burroughs, Rejean Ducharme's vision is darkly prophetic of a world that has lost its way, on which "our lady of good help" only gazes with an inscrutable Mona Lisa smile. Rejean Ducharme is one of Quebec's most influential authors, and also one of the province's enigmas: the man has not been seen in public for over a decade. Will Browning is currently a professor of French literature at Boise State University.

Comparing the major Pacific Rim cities of Sydney, Hong Kong and Shanghai, this book examines world city branding. Whilst all three cities compete on the world's stage for events, tourists and investment, they are also at the centre of distinct film traditions and their identities are thus strongly connected with a cinematic impression. Using an interdisciplinary approach, this book not only analyses the city branding of these cities from the more widely researched perspectives of tourism, marketing and regional development, but also draws in cultural studies and psychology approaches which offer fresh and useful insights to place branding and marketing in general. The authors compare and contrast qualitative and quantitative original data as well as critically analyzing current texts and debates on city branding. In conclusion, they argue that city branding should contribute not only to regional development and identity, but also to sustainable economic well-being and public happiness.

This magnificent volume contains the extraordinary story of the prolonged battle between Bobby Fischer, the lone American genius who is perhaps the most famous chess player of all time, and the long-standing and all-dominating Soviet chess machine. For the first time readers will be able to view virtually all the secret documents on "the Fischer problem", many of which have never previously been published. These include papers from the archives of the KGB, the Communist Party Central Committee, the USSR Sports Committee, and the Chess Federation. Together with this, there are reports and analysis of Fischer's personality and play, written at the demand of the Soviet authorities by the country's leading Grandmasters, legends such as Mikhail Tal, Tigran Petrosian, Vassily Smyslov, Paul Keres, Victor Korchnoi, and Efim Geller. Also contained in Russians Versus Fischer are annotations and the stories on all of the 158 chess encounters between Fischer and his Soviet adversaries, and a large number of rare photographs and drawings. This book is a significantly enlarged and updated version of the one first published in Russia in 1994.

Mitrovic's volume fills the gap in Balkan history by presenting an in-depth look at Serbia and its role in WWI. The Serbian experience was in fact of major significance in this war. In the interlocking development of the wartime continent, Serbia's plight is part of a European jigsaw. Also, the First World War was crucial as a stage in the construction of Serbian national mythology in the twentieth century.

This book covers the construction, analysis, and theory of continuous nowhere differentiable functions, comprehensively and accessibly. After illuminating the significance of the subject through an overview of its history, the reader is introduced to the sophisticated toolkit of ideas and tricks used to study the explicit continuous nowhere differentiable functions of Weierstrass, Takagi–van der Waerden, Bolzano, and others. Modern tools of functional analysis, measure theory, and Fourier analysis are applied to examine the generic nature of continuous nowhere differentiable functions, as well as linear structures within the (nonlinear) space of continuous nowhere differentiable functions. To round out the presentation, advanced techniques from several areas of mathematics are brought together to give a state-of-the-art analysis of Riemann's continuous, and purportedly nowhere differentiable, function. For the reader's benefit, claims requiring elaboration, and open problems, are clearly indicated. An appendix conveniently provides background material from analysis and number theory, and comprehensive indices of symbols, problems, and figures enhance the book's utility as a reference work. Students and researchers of analysis will value this unique book as a self-contained guide to the subject and its methods.

Poultry Quality Evaluation: Quality Attributes and Consumer Values provides a new reference source that covers these aspects with the same scientific authority as texts on traditional poultry meat quality values. The book's first section explores new developments in our understanding of how muscle structure affects the eating qualities of cooked meat. The second section highlights new techniques for measuring, predicting, and producing poultry meat quality and how these new techniques help us minimize variability in eating quality and/or maximize value. The final section identifies the current qualities of consumer and public perceptions, including what is sustainable, ethical, desirable, and healthy in poultry production and consumption. Brings together top researchers in the field to provide a comprehensive overview

of the new elements of poultry quality evaluation Provides a comprehensive reference source on poultry with the same scientific authority as texts on more broad traditional meat quality values Contains contributions from editors who are very well known and highly respected in the field

Passivation of Metals and Semiconductors, and Properties of Thin Oxide Layers contains a selection of papers presented at PASSIVITY-9, the 9th International Symposium on the Passivation of Metals and Semiconductors and the Properties of Thin Oxide Layers, which was held in Paris, 27 June - 1 July, 2005. One hundred and twelve peer-reviewed manuscripts have been included. The book covers all the fundamental and applied aspects of passivity and provides a relevant and updated view of the advances and new trends in the field. It is structured in ten sections: • Growth, (Nano)structure and Composition of Passive Films • Passivity of Semiconductors • Electronic Properties of Passive Films • Passivity Issues in Biological Systems • Passivity in High-Temperature Water • Mechanical Properties of Passive Films, • Passivity Issues in Stress Corrosion Cracking and Tribocorrosion • Passivity Breakdown and Localized Corrosion • Modeling and Simulation • Surface Modifications and Inhibitors (for Improved Corrosion Resistance and/or Adhesion)

Problems with your dog? It may be his thyroid! If your dog is lethargic, losing his hair, gaining weight or suddenly becomes aggressive, perhaps the last thing you (or your vet!) would think about is his thyroid. Unfortunately, however, thyroid disorders can cause literally dozens of health and behavioral problems in dogs and frequently go undiagnosed or are misdiagnosed. And the real tragedy is that most thyroid problems are treatable with the right medical care and a well-informed owner can often minimize the chance of a thyroid disorder occurring in the first place. Noted veterinarian Jean Dodds and co-author Diana Laverdure have done the dog owning public and their vets a great service by writing *The Canine Thyroid Epidemic*. The book is written in such a way to inform both the average dog owner and animal health care professionals about the ways in which thyroid disorders occur, can be prevented and treated.

This report provides world market trends for biofuels, cereals, oilseeds, sugar, meats, dairy products and, for the first time, the fisheries sector over the 2011-20 period. It also includes an evaluation of recent developments, key issues and uncertainties in those commodity markets.

A free ebook version of this title is available through Luminos, University of California Press's Open Access publishing program. Visit www.luminosoa.org to learn more.

Early in the twenty-first century, Louisiana, one of the poorest states in the United States, redirected millions in tax dollars from the public coffers in an effort to become the top location site globally for the production of Hollywood films and television series. Why would lawmakers support such a policy? Why would citizens accept the policy's uncomfortable effects on their economy and culture? *Almost Hollywood, Nearly New Orleans* addresses these questions through a study of the local and everyday experiences of the film economy in New Orleans, Louisiana—a city that has twice pursued the goal of becoming a movie production capital. From the silent era to today's Hollywood South, Vicki Mayer explains that the aura of a film economy is inseparable from a prevailing sense of home, even as it changes that place irrevocably.
