On the day she turned seventy-seven, internationally acclaimed mystery writer P. D. James embarked on an endeavor unlike any other in her distinguished career: she decided to write a personal memoir in the form of a diary. Over the course of a year she set down not only the events and impressions of her extraordinarily active life, but also the memories, joys, discoveries, and crises of a lifetime. This enchantingly original volume is the result. *Time to Be in Earnest* offers an intimate portrait of one of most accomplished women of our time. Here are vivid, revealing accounts of her school days in Cambridge in the 1920s and '30s, her happy marriage and the tragedy of her husband's mental illness, and the thrill of publishing her first novel, *Cover Her Face*, in 1962. As she recounts the decades of her exceptional life, James holds forth with wit and candor on such diverse subjects as the evolution of the detective novel, her deep love of the English countryside, her views of author tours and television adaptations, and her life-long obsession with Jane Austen. Wise and frank, engaging and graceful, this "fragment of autobiography" will delight and surprise P. D. James's admirers the world over.

Malaysia's multicultural society supports one of the most dynamic economies in Asia. This completely revised new edition of the standard text, first published twenty years ago, traces the history of the

country from early times to the present day. The authors give particular attention to the evolution of Malay polities and their close links with indigenous groups who lived on the oceans and in the deep jungles of the region, from Sumatra to Borneo. This provides the background to the establishment of the Malay port of Melaka, which was conquered by the Portuguese in 1511, foreshadowing the establishment of a British colonial regime in the late nineteenth century. Although the large numbers of Chinese and Indian migrants who arrived to work in the tin and rubber industries contributed to economic expansion, colonial policies did not encourage communal interaction. The authors trace the process by which post-independence leaders in Malaya attempted to counter the legacy of ethnic hostility while answering Malay demands for an affirmation of their rights and a stronger commitment to Islam. The incorporation of the Borneo states of Sarawak and Sabah into the Federation of Malaysia in 1963 rendered the goal of welding a nation from areas that were geographically separated and culturally disparate even more problematic. The intense emotions attached to issues of race were made tragically evident in the racial riots of May 1969, which this book sees as a watershed in modern Malaysian history. As Malaysia enters the twenty-first century, the government is determined to oversee the transition to an economy focused on manufacturing and advanced technology, and to eliminate poverty and the association between occupation and race. While several recent studies deal with the impact of colonial rule and Malaysia's spectacular economic transition, this book is unique because it tracks developments from early times and identifies continuities as well as change. Combining the authors' specialist knowledge of precolonial sources with the most recent contemporary research, this new edition reinforces the position of A History of Malaysia position as a standard reference for all those interested in the historical processes which led to the emergence of this culturally varied and economically energetic country.

Recent regional and global crises have changed the structure of international relations and cause countries to be inconsistent in their policies. Examples of these include the protest demonstrations and political crises which started in the Middle East and African countries in 2010 known as the 'Arab Spring', which had a major effect on Syria, and the movement towards Brexit. These emerging regional and global crises have highlighted the shortcomings of the discipline of international relations and the need for a new, detailed study to be conducted. The topics in this book have been carefully selected in order to provide a more objective assessment of the recent and ongoing problems of the international community. This volume will be a valuable resource for graduate, undergraduate and post-graduate students, academics and researchers in the areas of cyber security, international law, international organizations, and international relations.

The old adage of buy low and sell high works, but it is not that cut and dry in today's market. This is especially the case when self-storage is selling for a premium. It is daunting competing for facilities with large, well funded operators and REITS. This book will show you the three step process to successfully purchase self-storage today, even in large markets where the REITS are active, and provide all the resources you will need. By the end of this tutorial you will possess the essential tools to effectively find, analyze risk, and compete with the larger players. You will not only have the knowledge to BUY facilities, but BUY them in a way that fulfills your pre-determined parameters and business plan. Mark Helm, CCIM explains in detail how he did just that, and with very limited startup funds. As the economy improves and more people use self-storage, it is going to be more important than ever to know how to effectively compete with large well funded operators in purchasing facilities.
