ICANN and the UDRP

Stevenson examines how these changes altered anglophone relations with the major political parties, as well as the role of newer entities such as Alliance Quebec and the Equality Party. He

concludes with a look at the future for anglophones in Quebec.

In the past decades, organizations had to face numerous challenges due to intensifying globalization, shorter innovation cycles and growing IT support. Business process management is seen as a comprehensive approach to address these challenges. For this purpose, business process models are increasingly utilized to document and redesign relevant parts of the organization's business operations. Since organizations tend to have a huge number of such models, analysis techniques are required that ensure the quality of these process models in an automatic fashion. The goal of this doctoral thesis is the development of model refactoring techniques by integrating and applying concepts from the three main branches of theoretical linguistics: syntax, semantics, and pragmatics. The syntactical refactoring technique addresses linguistic issues that arise by expressing process behavior with natural language. The semantic refactoring technique reworks terminology with overlapping and synonymous meaning. The pragmatic refactoring technique provides recommendations for incompletely specified process models. All of the presented techniques have been evaluated with real-world process model repositories from various industries to demonstrate their applicability and efficiency.

Contemporary governance is a contested field of competing institutional schemes and system of rules. This book analyzes new institutional trajectories, the renewal of old institutions or the emergence of new ones, to understand their interaction and how they can help renew collective action in a new world of global digital capitalism.

Annual Report of the Commissioners on Fisheries and Game for the Year
Continuation of the reference work that originated with
Robert Dodsley, written and published each year, which
records and analyzes the year's major events, developments

and trends in Great Britain and throughout the world. From the 192Os volumes of The Annual Register took the essential shape in which they have continued ever since, opening with the history of Britain, then a section on foreign history covering each country or region in turn. Following these are the chronicle of events, brief retrospectives on the year's cultural and economic developments, a short selection of documents, and obituaries of eminent persons who died in the year.

Do information and communication technologies networks really lead to a weakening of the nation-state? This volume revisits the 'retreat of the state' thesis and tests its validity in the 21st century. It will intrigue the reader with expert-level analysis, providing historical context and conceptualizing trends and social dynamics.

The Domain Name System (DNS), which matches computer addresses to human-friendly domain names, has given rise to many legal issues. Two important issues are the institutional arrangements for governing the DNS and the use of trade marks as domain names. This book is the first complete statement of this rapidly-evolving area of the law. In particular, the book includes a comprehensive statement of decisions under the Uniform Domain Name Dispute Resolution Policy (UDRP), the international system for resolving disputes between trade mark owners and domain name registrants. In this path-breaking work the author examines the extent to which principles of national trade mark law have been used in UDRP decisions. It will be essential reading for anyone, whether academic or practitioner, interested in internet law, intellectual property, and e-commerce law.

How to Reach and Teach All Children Through Balanced Literacy offers you a handbook for teaching literacy to diverse students in grades 3-8. The balanced literacy method combines the best practices of phonics and other skill-based language instruction with the holistic, literature-based approach in order to help you teach

reading, writing, and speaking in a clear and approachable format. This dynamic resource offers an easily accessible research-based approach to balanced literacy that is grounded in the innovative ideas developed by authors Sandra F. Rief and Julie A. Heimburge. The book includes detailed descriptions of what a balanced literacy classroom looks like and shows how to create a program from the ground up or give your existing program a boost. The book can be used across content areas and is filled with reproducible worksheets, activities, and other handy classroom tools. Some topics covered include: Shared book experiences Reading aloud Oral language and vocabulary development Guided reading for comprehension Modeled writing Reading and writing conferences Book clubs Content area reading and writing Ongoing assessments Enhancing literacy through technology

Annual Register

In this book Konstantinos Komaitis identifies a tripartite problem — intellectual, institutional and ethical —

inherent in the domain name regulation culture. Using the theory of property, Komaitis discusses domain names as sui generis 'e-property' rights and analyses the experience of the past ten years, through the Uniform Domain Name Dispute Resolution Policy (UDRP) and the Anticybersquatting Consumer Protection Act (ACPA). The institutional deficit he identifies, generates a further discussion on the ethical dimensions in the regulation of domain names and prompts Komaitis to suggest the creation of an environment based on justice. The relationship between trademarks and domain names has always been contentious and the existing institutions of the UDRP and ACPA have not assisted in alleviating the tension between the two identifiers. Over the past ten years, the trademark community has been systematic in encouraging and promoting a culture that indiscriminately considers domain names as secondclass citizens, suggesting that trademark rights should have priority over the registration in the domain name space. Komaitis disputes this assertion and brings to light the

injustices and the trademark-oriented nature of the UDRP and ACPA. He queries what the appropriate legal source to protect registrants when not seeking to promote trademark interests is. He also delineates a legal hypothesis on their nature as well as the steps of their institutionalisation process that we need to reverse, seeking to create a just framework for the regulation of domain names. Finally he explores how the current policies contribute to the philosophy of domain names as second-class citizens. With these questions in mind, Komaitis suggests some recommendations concerning the reconfiguration of the regulation of domain names. Since the 1990s many of the assumptions that anchored the study of governance in international political economy (IPE) have been shaken loose. Reflecting on the intriguing and important processes of change that have occurred, and are occurring, Profess Rent Control Legislation,hearings Before a Subcommittee of ...,81-1 on S. 888 ..., March 3 ... 11, 1949

As a holistic veterinarian and scientist, Dr. Gary Richter helps dog and cat owners to navigate the thicket of treatment options and separate the fact from the fiction. He wants us to use what actually works, not just what Western science or alternative medicine say "should" work. This multifaceted approach to health is known as integrative medicine. Dr. Richter examines traditional medicine from many cultures alongside modern medical techniques, describing the best of complementary care and the best of conventional veterinary medicine. Every treatment he recommends has the backing of scientific research or years of successful outcomes in his clinical practice. After explaining the treatment, he

offers specific recommendations for an integrative approach to common diseases, including allergies, skin conditions, diabetes, heart disease, and cancer. A holistic approach to health includes nutrition, as it sets up the foundation for your pet's health. Dr. Richter cuts through the hype in the pet-food world and explains how to choose the best commercial foods and supplements, and even includes both raw and cooked dog- and cat-food recipes for general diet as well as to treat specific needs. He also explains how we can use the right foods and supplements to "hack" the body's processes, including the immune system.

Includes Treasury Dept study "Study on Entertainment Expenses," Apr. 1961 (p. 131-215), and FAA study "Study of User Charges for the Domestic Federal Airway System," Apr. 1961 (p. 565-663); Continuation of hearings on proposed tax reductions. Focuses on proposal to tax company stockholders on earnings of foreign subsidiaries. Includes "Digest of Testimony Presented and Statements Submitted to the Committee on Ways and Means with Respect to the President's Tax Recommendations" (June 27, 1961. 3553-3613 p.).

INTRODUCTION Personal name is a vital aspect of cultural identity. As a child, you may have loved or hated your name. But you were rarely indifferent to it. "What's in a name?" Shakespeare asked. "That which we call a rose by any other name would smell as sweet", he explained. Perhaps in England or somewhere else in Europe, but not in Africa. Personal names in African have meanings, can affect personality, hinder or enhance life initiatives. They serve to establish a connection between name and cultural background, and thus, provide some information about cultural affinity and more, such as express one's spirituality, philosophy of life, political or socio-economic status as defined by a given ethnic cleavage. African names tell

stories, convert abstract ideas to stories, and tell story of the story about different aspects of one's life. They commemorate any unusual circumstance the family or community once experienced, or world event that took place around the time of a child's birth. Outside a given cultural environment, names boost and nurture cultural pride and identity, showcase a people's appreciation of their culture and their readiness to defend and live their culture with pride and dignity. Naming practices that tell histories behind the names were the norms in Nigeria-Ibibio, and in fact, in Africa, until the encroachment of two historical forces in Africans' affairs. Christianization and colonization, more than any other forces in history, shattered the connection between personal name and cultural affinity, and have ever-since contributed to the gradual erosion of African culture of names. On the continent, the combined efforts of their human agents – the missionaries and British colonial personnel, directly and indirectly, through their policies and practices, caused African- Nigerians to give up their culture relevant names in favor of foreign ones. Apart from direct erosion of culture of names, 'colonial

administration' (a term I use mostly to refer to the combined efforts of the missionaries and British colonial personnel) in Nigeria abrogated many religious, socio-economic and political traditions which were intimately intertwined with the people's naming practices. Their attempt to replace African traditions with European ones through coercing Africans to accept Western values and beliefs consequently disabled many desirable African traditional structures, including authentic African naming practices, and caused some to fall into disuse. A third force was early European-African trade. Although the impact of the presence of European merchants in Nigeria was minimal in this regard, some of their activities have also left a dent on African naming practices by introducing foreign bodies into the people's names database. Even though these alien forces invaded and injected foreign values into Africa over a century ago, their impact on naming practices continues to be felt by Africans. European intrusion in relation to African naming practices did not end on the continent. The Trans- Atlantic Trade on human cargo was another major historical event that did not only forcefully disconnect many Africans from their cultural

root and natural habitat, but also mutilated authentic African naming practices among them. Consequently, Africans in Diaspora had European names imposed upon them by their slave masters. Today, many Africans on the continent and in Diaspora continue to carry names which are foreign, names whose meanings they do not know, names the bearers can not even pronounce correctly in some ethnic contexts, and names which have no relevance to nor any form of link with the bearers' cultural background. In effect, culture of names, as many other African customary practices, has lost its savor. Some peoples of African descent still cherish these colonized names. Some do not, and are making practical efforts to reclaim authentic African cul
The Congressional Record is the official record of the proceedings and debates of the United States Congress. It is published daily when Congress is in session. The Congressional Record began publication in 1873. Debates for sessions prior to 1873 are recorded in The Debates and Proceedings in the Congress of the United States (1789-1824), the Register of Debates in Congress (1824-1837), and the Congressional Globe (1833-1873)
