She was a poor Southern tobacco

farmer who worked the same land as her slave ancestors, yet her cells—taken without her knowledge—became one of the most important tools in medicine: The first “immortal” human cells grown in culture, which are still alive today, though she has been dead for more than sixty years. HeLa cells were vital for developing the polio vaccine; uncovered secrets of cancer, viruses, and the atom bomb’s effects; helped lead to important advances like in vitro fertilization, cloning, and gene mapping; and have been bought and sold by the billions. Yet Henrietta Lacks remains virtually unknown, buried in an unmarked grave. Henrietta’s family did not learn of her “immortality” until more than twenty years after her death, when scientists investigating HeLa began using her husband and children in research without informed consent. And though the cells had launched a multimillion-dollar industry that sells human biological materials, her family never saw any of the profits. As Rebecca Skloot so brilliantly shows, the story of the Lacks family—past and present—is inextricably connected to the dark history of experimentation on African Americans, the birth of bioethics, and the legal battles over whether we control the stuff we are made of. Over the decade it took to uncover this story, Rebecca became

enmeshed in the lives of the Lacks family—especially Henrietta’s daughter Deborah. Deborah was consumed with questions: Had scientists cloned her mother? Had they killed her to harvest her cells? And if her mother was so important to medicine, why couldn’t her children afford health insurance? Intimate in feeling, astonishing in scope, and impossible to put down, The Immortal Life of Henrietta Lacks captures the beauty and drama of scientific discovery, as well as its human consequences.

Bulletin of Comparative Labour Relations Volume 108 The progressive expansion of the phenomenon of posting of workers – the practice whereby a worker is sent for a limited period of time to another Member State in order to provide a service – is a formidable bone of contention in the conflict between a fully integrated internal market economy and Member States' aims to protect domestic social standards. This book challenges the recently adopted Directive (EU) 957/2018, which came into effect in July 2020, by examining the relevant EU regulatory framework and investigating the actual quantitative dimension of the posting phenomenon and its real impact on the EU labour market. In the process, the author exposes a serious misalignment of the legal framework provided for by the new Directive with the EU values and principles of equality, solidarity and fair competition. Drawing on a wide variety of sources – including Court of

Justice case law, Advocate Generals' opinions, Eurostat data, Commission documents and reports, and academic literature – the author provides in-depth analyses of such elements of the problem as the following: proper definition of the concepts of 'posting' and 'posted worker' in EU law; host country's discretion in relation to the part of domestic regulation it can impose on posted employees; misconceived clash between social rights and economic freedoms; coordination of national social security systems; proliferation of unlawful and fraudulent practices; 'regime shopping' and exploitation of existing regulatory loopholes; misleading association of posting with issues of 'social dumping' and 'unfair competition'; orientation of political influence during the drafting process of relevant EU legislation; expected controversial economic impact of Directive (EU) 957/2018; concrete realisation of the EU values and principles of equality, solidarity and fair competition; and definition and pursuit of a 'European social model'. Normative arguments developed in the course of the analysis put forward viable recommendations for future improvements in the field. The Union's commitment to the development of a 'European social model' cannot avoid taking into account the matters of equality, solidarity and fair competition. In this sense, given the increasing prominence of the free movement of services in shaping a European labour market characterised by an ever-growing

degree of mobility, this book's analysis of the phenomenon of posting of workers may serve as a litmus test of political and legislative action at EU level. In its dual analytic and normative aspect, the book takes a giant step towards future discussions and developments in the area of intra-EU labour mobility. It will be welcomed by legal practitioners in labour and social security law and industrial relations, legal scholars, EU institutions and agencies, businesses and trade unions.

Economic globalization is transforming practically every service sector. The legal industry that has long remained insulated too has not remained untouched by the effects of globalization. The outsourcing of legal services in the past one decade has transformed the legal landscape. Legal outsourcing to India is becoming increasingly popular among U.S. and European law firms and corporations. This book broadly seeks to discuss three main topics surrounding legal process outsourcing (LPO): its emerging trends, the legal challenges it raises and the hitherto unrecognized potential it holds. Firstly, this book clarifies concepts of LPO and its operating models practiced by U.S. and U.K. law firms and corporations. Secondly, the outsourcing of legal services creates significant challenges for ethics rules including conflict of interests, attorney-client privilege, supervision and fee sharing. Thirdly, this research explores the hidden

potential of LPO to improve access to justice. This book develops an altogether new proposal where Indian LPO professionals could help alleviate the access to justice problem among indigent and low-income populations of the United States.

The book written with a rich teaching experience of the author at National Law University and State University, attempts to critically analyse Indian High Court and Apex Court cases on the Law of Civil Procedure. It also evaluates the relation between statutory procedural law and case laws as subject. Most importantly, the book presents recent judgments of Supreme Court, particularly based on Post Amendment Acts of 1999 and 2002. Also, these cases have been analysed in addition to a critical examination of the radical and far reaching effect of the Code. This lucid and well-organised book is divided into five parts. Part I develops theoretical foundations of the readers on Civil Procedure Code. Part II demonstrates certain important issues on the (i) scope of jurisdiction of civil courts to entertain disputes, (ii) principles governing res sub judice, res judicata and foreign judgement, (iii) nature of powers exercised by civil courts in matters relating to place of suing, institution of suit, transfer of cases, withdrawal and compromise of suits, (iv) necessary conditions for first hearing, interim order,

trial as well as special suits, (v) scope and ambit of law relating to pleadings, appearance and non-appearance of parties, discovery, inspection, production of documents, death, marriage, insolvency of parties, judgment and decrees. Part III explores various issues on appeals, reference, review and revision. In this part, an attempt has also been made to discuss different facets of law on first appeal, second appeals, appeals from orders, appeal by indigent persons, appeals to the Supreme Court. Part IV is devoted to discuss various principles on execution. Part V deals with miscellaneous issues on the Law of Civil Procedure and includes Appendix on the Law of Limitation. The book will prove useful to the students of LLB and LLM for their course study. Besides, the book will be of immense use to the professionals. Key Features • Written with case analysis method. • Contains an authoritative discussion on the complexity of the Second Appeal after its determination and re-determination since the British period. • Important Supreme Court and High Court decisions are examined and analysed critically.

A noble profession is facing its defining moment. From law schools to the prestigious firms that represent the pinnacle of a legal career, a crisis is unfolding. News headlines tell part of the story—the growing oversupply of new lawyers, widespread career dissatisfaction, and spectacular implosions of pre-eminent law firms. Yet eager hordes of bright young people continue to step over

each other as they seek jobs with high rates of depression, life-consuming hours, and little assurance of financial stability. The Great Recession has only worsened these trends, but correction is possible and, now, imperative. In *The Lawyer Bubble*, Steven J. Harper reveals how a culture of short-term thinking has blinded some of the nation's finest minds to the long-run implications of their actions. Law school deans have ceded independent judgment to flawed U.S. News & World Report rankings criteria in the quest to maximize immediate results. Senior partners in the nation's large law firms have focused on current profits to enhance American Lawyer rankings and individual wealth at great cost to their institutions. Yet, wiser decisions—being honest about the legal job market, revisiting the financial incentives currently driving bad behavior, eliminating the billable hour model, and more—can take the profession to a better place. A devastating indictment of the greed, shortsightedness, and dishonesty that now permeate the legal profession, this insider account is essential reading for anyone who wants to know how things went so wrong and how the profession can right itself once again.

We are currently witnessing an unprecedented transformation in the legal profession and legal education. The Legal Services Act 2007 and the Legal Aid, Sentencing and Punishment of Offenders Act 2012 have both enabled and necessitated dramatic structural changes to the profession, as well as impacting on its ethos and ethicality. The recent Legal Education and Training Review (LETR) promises similarly dramatic change to the provision of legal education, reflecting the shifting landscape of both the legal professional market and Higher Education in general. These transformative changes bring both exciting opportunities and challenges with which everyone involved in

the law - from University lecturers, to Senior Partners in leading law firms, to the judiciary - must grapple. This edited collection comprises a selection of papers presented at the 2nd conference of CEPLER, Birmingham Law School's Centre for Professional Legal Education and Research. The aim of the Conference, and thus this collection, was to bring together leading academic scholars, senior figures from professional practice, policy-makers, and representatives of the regulatory authorities, to reflect on the key issues arising from this transformative moment. As such, this volume of essays covers diverse ground, from curriculum development to professional theory, enriched and enhanced by the range of backgrounds and perspectives of its contributors.

Teachers and trainers are dual-professionals – they are required to have up-to-date industry skills and also skills in teaching and learning. The issue of professional identity, and the promotion of maintaining and building pedagogic expertise in relation to their vocational work, is therefore an extremely important one. This book argues that quality teaching and learning is very much dependent upon teachers and trainers undergoing continuing professional development (CPD), engaging actively in professional learning activities, generating professional learning communities and building their level of professionalism to meet increasing teaching standards. Unfortunately, CPD is battling a context of intensification of work, pressure of time and economic restrictions. The completion of CPD under such conditions can often become tokenistic and hitherto there has been very little research or evidence base for determining what approaches to CPD are most effective and efficient. Challenging Professional Learning draws on a wealth of recent research and evidence on what ingredients are necessary for effective and efficient (crucial at a time of

such fiscal constraints) professional learning. It also explores the wider implications of these findings and the concept of learning as a collective activity. It argues that real professionalism cannot be achieved in isolation but instead takes place in a context that has political, social and cultural influences. The book brings together research from the Institute for Learning and practice around professional learning to link both individual and collective professional learning to organisational learning, leadership and the management of change whilst offering practical suggestions for improving these practices. It will be of great interest to teacher educators and their students at undergraduate and post-graduate levels, as well as anyone who works in higher education and with professional development.

In 2009, Stephen Barker was convicted of rape on the evidence of a little girl who was four-and-a-half years old at the trial, and about three-and-a-half when first interviewed by the police. The high point of the proceedings was the child's appearance as a live witness in order

for Barker's counsel to attempt a cross-examination. This case focused attention on the need, imposed by current English law, for even tiny children to come to court for a live cross-examination. In 1989, the Pigot Committee proposed a scheme under which the whole of a young child's evidence, including cross-examination, would be obtained out of court and in advance of trial. In 1999 a provision designed to give effect to this was included in the Youth Justice and Criminal Evidence Act, but it has not yet been brought into force. The full Pigot proposal was implemented, however, in Western Australia, and similar schemes operate in a number of European jurisdictions. This book of essays examines a number of these schemes, and argues the case for further reforms in the UK.

Scores of talented and dedicated people serve the forensic science community, performing vitally important work. However, they are often constrained by lack of adequate resources, sound policies, and national support. It is clear that change and advancements, both systematic and scientific, are needed in a number of forensic science disciplines to ensure the reliability of work, establish enforceable standards, and promote best practices with consistent application. Strengthening Forensic Science in the United States: A Path Forward provides a detailed plan for addressing these needs and suggests the creation of a new government entity, the National Institute of Forensic Science, to establish and enforce standards within the forensic science community. The benefits of improving and regulating the forensic science disciplines are clear: assisting law enforcement officials, enhancing homeland security, and reducing the risk of wrongful conviction and exoneration. Strengthening Forensic Science in the United States gives a full account of what is needed to advance the forensic science disciplines, including upgrading of systems and organizational

structures, better training, widespread adoption of uniform and enforceable best practices, and mandatory certification and accreditation programs. While this book provides an essential call-to-action for congress and policy makers, it also serves as a vital tool for law enforcement agencies, criminal prosecutors and attorneys, and forensic science educators.

This book discusses multilingual postcolonial common law, focusing on Malaysia's efforts to shift the language of law from English to Malay, and weighing the pros and cons of planned language shift as a solution to language-based disadvantage before the law in jurisdictions where the majority of citizens lack proficiency in the traditional legal medium. Through analysis of legislation and policy documents, interviews with lawyers, law

students and law lecturers, and observations of court proceedings and law lectures, the book reflects on what is entailed in changing the language of the law. It reviews the implications of societal bilingualism for postcolonial justice systems, and raises an important question for language planners to consider: if the language of the law is changed, what else about the law changes? Criminal law has struggled to keep pace with developments in psychiatry, both in substantive and procedural terms, and it is widely recognised that increased inter-disciplinary discussion of mental condition defences is required in order to address this gap between the law and psychiatry. This edited collection comes at a time of review of this sensitive area of criminal law. The Law Commission for England and Wales recently placed its evaluation of insanity, automatism and intoxication on hold, while it considers the law on unfitness to plead. These reviews are set against the backdrop of earlier Law Commission reports on partial defences to murder which informed significant changes that were made to the law in this area under sections 52-56 of the Coroners and Justice Act 2009. Recent developments in case law in this substantive area illustrate not only the importance of the role of the medical expert, but also that reform in this area is informed by ongoing inter-disciplinary research. This collection brings together medical and legal

conceptions of mental disorder in order to appraise the operation of mental condition defences. In this respect, it provides invaluable and original insights into mental condition defences and criminal law.

This book will be crucial reading for students across a variety of disciplines. A broadly socio-legal text, using a mixed-methods design combining grounded theory with an in-depth case study, this research explores a rarely-seen facet of the legal profession. Sociologists studying the practical effect of sociological concepts from theorists such as Bourdieu and Weber; those studying the legal profession from the sociological, law or psychological angles; anyone examining elite professions; management students examining the operation of professional associations and the ways in which these mobilise to take action on controversial topics; those studying the role and creation of outreach: all will find something of interest in this monograph. For those within the legal profession itself it also provides a look into an oft-hidden world: that of the English Bar. A notoriously secretive profession, traditional, elite and suspicious of research – the case study evaluating an outreach programme sheds light on how this fascinating world operates when trying to engage in progressive steps. Through the eyes of a professional association seeking to improve socio-economic diversity in the profession

through instituting an access programme focussed on work experience, it examines not just how professional association action may succeed or fail, but why. With foreword by Lord Neuberger, former President of the Supreme Court and Chair of the Working Party on Entry to the Bar.

Universal's Guide to All India Bar Examination: Covering Complete Syllabus

This book examines the challenges of cross-professional comparisons and proposes new forms of performance assessment to be used in professions education. It addresses how complex issues are learned and assessed across and within different disciplines and professions in order to move the process of “performance assessment for learning” to the next level. In order to be better equipped to cope with increasing complexity, change and diversity in professional education and performance assessment, administrators and educators will engage in crucial systems thinking. The main question discussed by the book is how the required competence in the performance of students can be assessed during their professional education at both undergraduate and graduate levels. To answer this question, the book identifies unresolved issues and clarifies conceptual elements for performance assessment. It reviews the development of constructs that cross disciplines and professions such as critical thinking, clinical reasoning, and problem solving. It discusses what it means to instruct and assess students within their own domain of study and across various roles in multiple contexts, but also what it means to instruct and

assess students across domains of study in order to judge integration and transfer of learning outcomes. Finally, the book examines what it takes for administrators and educators to develop competence in assessment, such as reliably judging student work in relation to criteria from multiple sources. "... the co-editors of this volume, Marcia Mentkowski and Paul F. Wimmers, are associated with two institutions whose characters are so intimately associated with the insight that assessment must be integrated with curriculum and instructional program if it is to become a powerful influence on the educational process ..." High stakes tests are the gatekeepers to many educational and professional goals. As such, the incentive to cheat is high. This Handbook is the first to offer insights from experts within the testing community, psychometricians, and policymakers to identify and develop best practice guidelines for the design of test security systems for a variety of testing genres. Until now this information was scattered and often resided inside testing companies. As a result, rather than being able to learn from each other's experiences, each testing entity was left to re-create their own test security wheel. As a whole the book provides invaluable insight into the prevalence of cheating and "best practices" for designing security plans, training personnel, and detecting and investigating misconduct, to help develop more secure testing systems and reduce the likelihood of future security breaches. Actual case studies from a variety of settings bring to life how security systems really work. Examples from both domestic and international programs are provided. Highlights of coverage include: • Best practices for designing secure tests • Analysis of security vulnerabilities for all genres of testing • Practical cheating prevention and detection strategies • Lessons learned in actual security violations in high profile testing programs. Part I focuses on how tests are delivered for paper-and-

pencil, technology-based, and classroom testing and writing assessment. Each chapter addresses the prevalence of the problem and threats to security, prevention, and detection. Part II addresses issues essential to maintaining a secure testing program such as planning and monitoring, physical security, the detection of group-based cheating, investigating misconduct, and communicating about security-related issues. Part III examines actual examples of cheating-- how the cheating was done, how it was detected, and the lessons learned. Part III provides insight into security issues within each of the Association of Test Publishers' four divisions: certification/licensure, clinical, educational, and industrial/organizational testing. Part III's conclusion revisits the issues addressed in the case studies and identifies common themes. Intended for organizations, professionals, educators, policy makers, researchers, and advanced students that design, develop, or use high stakes tests, this book is also ideal for graduate level courses on test development, educational measurement, or educational policy.
