" An interactive and empowering book " to help African American men and women create a new vision of better health and navigate the health care system (BET.com). According to the federal Office of Minority Health, African Americans " are affected by serious diseases and health conditions at far greater rates than other Americans. " In fact, African Americans suffer an estimated 85,000 excess deaths every year from diseases we know how to prevent: heart disease, stroke, cancer, high blood pressure, and diabetes. In this important and accessible book, Dr. Michelle Gourdine provides African Americans with the knowledge and guidance they need to take charge of their wellbeing. Reclaiming Our Health begins with an overview of the primary health concerns facing African Americans and explains who is at greatest risk of illness. Expanding on her career and life experiences as an African American physician, Dr. Gourdine presents key insights into the ways African American culture shapes health choices—how beliefs, traditions, and values can influence eating choices, exercise habits, and even the decision to seek medical attention. She translates extensive research into practical information and presents readers with concrete steps for achieving a healthier lifestyle, as well as strategies for navigating the health-care system. This interactive guide with illustrations is a vital resource for every African American on how to live a healthier and more empowered life, and an indispensable handbook for health-care providers, policy makers, and others working to close the health gap among people of color. Says Gourdine, " I wrote this book to empower our community to solve our own health problems and save our own lives. "

DIV This landmark book looks at what it means to be a multiracial couple in the United States today. According to Our Hearts begins with a look back at a 1925 case in which a two-month marriage ends with a man suing his wife for misrepresentation of her race, and shows how our society has yet to come to terms with interracial marriage. Angela Onwuachi-Willig examines the issue by drawing from a variety of sources, including her own experiences. She argues that housing law, family law, and employment law fail, in important ways, to protect multiracial couples. In a society in which marriage is used to give, withhold, and take away status—in the workplace and elsewhere—she says interracial couples are at a disadvantage, which is only exacerbated by current law. /div

Communicating a message effectively needs precision—be it verbal or non-verbal. At the professional front, the accuracy of the message to be shared becomes all the more important as the business decisions may depend on the same. This book, in its second edition, continues to detail on the pre-requisites of communicating effectively in the corporate environment and generally. Beginning with an overview of business communication, the book educates on the principles of communication—oral and written. Divided into nine chapters, the first two chapters deal with oral communication and the next seven deal with different forms of written communication. The book teaches how to write effective letters and prepare persuasive resumé. The chapters are well-supported with many examples and illustrative exhibits wherever required. A new chapter (Chapter 9) has been added titled 'Writing to Communicate' which presents incorrect use of language and phrases that rob the text, be it a report or a letter, of authenticity and credibility. The chapter also presents correct use of the examples and the rationale or logic in the form of explanations. Designed as a textbook for the management students, this book would be equally useful for the management professionals and executives. Key features • Observes a simple pattern of Read-Comprehend-Test-Follow • Discusses strategies for identification and improvisation of communication skills (both oral and written) • Provides numerous examples and illustrations that facilitate proper grasp of the topics discussed.

In the pantheon of air power spokesmen, Giulio Douhet holds center stage. His writings, more often cited than perhaps actually read, appear as excerpts and aphorisms in the writings of numerous other air power spokesmen, advocates-and critics. Though a highly controversial figure, the very controversy that surrounds him offers to us a testimonial of the value and depth of his work, and the need for airmen today to become familiar with his thought. The progressive development of air power to the point where, today, it is more correct to refer to aerospace power has not outdated the notions of Douhet in the slightest In fact, in many ways, the kinds of technological capabilities that we enjoy as a global air power provider attest to the breadth of his vision. Douhet, together with Hugh “Boom” Trenchard of Great Britain and William “Billy” Mitchell of the United States, is justly recognized as one of the three great spokesmen of the early air power era. This reprint is offered in the spirit of continuing the dialogue that Douhet himself so perceptively began with the first edition of this book, published in 1921. Readers may well find much that they disagree with in this book, but also much that is of enduring value. The vital necessity of Douhet’s central vision-that command of the air is all important in modern warfare-has been proven throughout the history of wars in this century, from the fighting over the Somme to the air war over Kuwait and Iraq.

“One of the most interesting and useful books ever written on networking.”—Adam Grant Social Chemistry will utterly transform the way you think about “networking.” Understanding the contours of your social network can dramatically enhance personal relationships, work life, and even your global impact. Are you an Expansionist, a Broker, or a Convener? The answer matters more than you think. . . . Yale professor Marissa King shows how anyone can build more meaningful and productive relationships based on insights from neuroscience, psychology, and network analytics. Conventional wisdom says it's the size of your network that matters, but social science research has proven there is more to it. King explains that the quality and structure of our relationships has the greatest impact on our personal and professional lives. As she illustrates, there are three basic types of networks, so readers can see the role they are already playing: Expansionist, Broker, or Convener. This network decoder enables readers to own their network style and modify it for better alignment with their life plans and values. High-quality connections in your social network strongly predict cognitive functioning, emotional resilience, and satisfaction at work. A well-structured network is likely to boost the quality of your ideas, as well as your pay. Beyond the office, social connections are the lifeblood of our health and happiness. The compiled results from dozens of previous studies found that our social relationships have an effect on our likelihood of dying prematurely—equivalent to obesity or smoking. Rich stories of Expansionists like Vernon Jordan, Brokers like Yo-Yo Ma, and Conveners like Anna Wintour, as well as personal experiences from King’s own world of connections, inform this warm, engaging, revelatory investigation into some of the most consequential decisions we can make about the trajectory of our lives.

Conjectures and Refutations is one of Karl Popper’s most wide-ranging and popular works, notable not only for its acute insight into the way scientific knowledge grows, but also for applying those insights to politics and to history. It provides one of the clearest and most accessible statements of the fundamental idea that guided his work: not only our knowledge, but our aims and our standards, grow through an unending process of trial and error.

Covering business communication skills, this text includes a grammar check, writing improvement exercises and cases which break down the writing process into simple components. E-mail, Web research, team and critical thinking exercises have also been added to this edition.

"Sundquist's careful, thoughtful study unearths new and fascinating evidence of the rhetorical traditions in King's speech."—Drew D. Hansen, author of *The Dream: Martin Luther King, Jr., and the Speech That Inspired a Nation* "I have a dream"—no words are more widely recognized, or more often repeated, than those called out from the steps of the Lincoln Memorial by Martin Luther King, Jr., in 1963. King's speech, elegantly structured and commanding in tone, has become shorthand not only for his own life but for the entire civil rights movement. In this new exploration of the "I Have a Dream" speech, Eric J. Sundquist places it in the history of American debates about racial justice—debates as old as the nation itself—and demonstrates how the speech, an exultant blend of grand poetry and powerful elocution, perfectly expressed the story of African American freedom. This book is the first to set King's speech within the cultural and rhetorical traditions on which the civil rights leader drew in crafting his oratory, as well as its essential historical contexts, from the early days of the republic through present-day Supreme Court rulings. At a time when the meaning of the speech has been obscured by its appropriation for every conceivable cause, Sundquist clarifies the transformative power of King's "Second Emancipation Proclamation" and its continuing relevance for contemporary arguments about equality. "The ['I Have a Dream'] speech and all that surrounds it—background and consequences—are brought magnificently to life. . . . In this book he gives us drama and emotion, a powerful sense of history combined with illuminating scholarship."—*The New York Times Book Review* (Editor's Choice)
