There have been fundamental changes in renumeration practices in the UK over the last quarter century, with a substantial decline in collective bargaining as the major method of pay determination and the growth of more individualistic systems based on employee performance, skills or competency. This new text, which includes chapters by major UK academics and consultants who are specialists in the reward management field, is the first to adopt a critical and theoretical approach to these changes in reward systems. It covers the Institute of Personnel and Development's reward syllabus but, unlike other reward books, takes a thematic and theoretical approach to the material.

This book draws on recent theoretical contributions in the area of global talent management and presents an up to date and critical review of the key issues which MNEs face. The Early Childhood Education sector around the world is constantly changing, whether because of the unprecedented demand for ECE services globally, accelerated social change, or the introduction of pedagogical and regulatory practices. Based upon empirical inquiry, Early Childhood Education Management examines the somewhat controversial concept of operating an early childhood service as a business. It challenges the assumption that an early childhood manager does not require specialist knowledge or skill and discusses which attributes an effective manager should possess. In this book, which brings together management theory and practice, Moloney and Pettersen address core issues at the heart of the management role, including the relationship between early childhood policy and broader legislative enactments, as well as issues related to the challenges and development of management skills. The book also draws upon real-life examples from practice in order to offer insight into some of the most common topics and challenges related to management practice in Early Childhood Education, such as business acumen and entrepreneurship, recruitment and selection, financial management and budgeting, supervision, mentoring, staff development, curriculum management, collaborative working, and change management. Written by leading academics with practice experience, the book should be of great interest to researchers, academics and postgraduate students in the field of education, specifically those working in early years and education policy and management. It should also be essential reading for managers working in Early Childhood settings.

This revised edition is a comprehensive, authoritative set of essays. It is more detailed and analytical than the mainstream treatments of HRM. As in previous editions, Managing Human Resources analyses HRM, the study of work and employment, using an integrated multi-disciplinary approach. The starting point is a recognition that HRM practice and firm performance are influenced by a variety of institutional arrangements that extend beyond the firm. The consequences of HRM need to incorporate analysis of employees and other stakeholders as well as the implications for organizational performance.

"Portions of this book were previously published under the title Introduction to hospitality management"--T.p. verso.

Human Resource Management for the Hospitality and Tourism Industries takes an integrated look at HRM policies and practices in the tourism and hospitality industries. Utilising existing human resource management (HRM) theory and practice, it contextualises it to the tourism and hospitality industries by looking at the specific employment practices of these industries, such as how to manage tour reps or working in the airline industry. It initially sets the scene with a broad review of the evidence of HRM practice within the tourism and hospitality industries. Having identified the broader picture, the text then begin to focus much more explicitly on a variety of HR policies and practices such as: • recruitment and selection: the effects of ICT, skills required specific for the industry and the nature of advertising • legislation and equal opportunities: illegal discrimination and managing diversity • staff health and welfare: violence in the workplace, working time directives, smoking and alcohol and drug misuse • remuneration strategies in the industry: the ‘cafeteria award’ approach, minimum wage and tipping Human Resource Management for the Hospitality and Tourism Industries is illustrated throughout with both examples of best practice for prescriptive teaching and discussion, and international case studies to exercise problem solving techniques and contextualise learning. It incorporates a user friendly layout and includes pedagogic features such as: chapter outlines and objectives, HRM in practice - boxed examples, reflective review questions, web links’ discussion questions and further reading. Accompanying the text are online supplementary lecturer materials including downloadable figures from the book, PowerPoint slides, further cases and extra exercises and points for discussion.

"This edition has been the beneficiary of major restructuring and updating to ensure continuing alignment of the material with current in-the-field business practices. The changes range from small inclusions of new stand-ards to major chapter revisions. The new structure will make it easier for students to see how each part of the staffing process proceeds from begin-ning to end, and it will also help them see how the topics fit together to create a cohesive staffing management system. The human resources landscape continues to be transformed by technolo-gy, and this edition of the textbook reflects this influence. The use of human resources information systems for tasks like recruitment, selection, and forecasting is now thoroughly integrated into all sections. The role of social media, the Internet, and other information management tools is emphasized in several chapters, and new examples from companies keep the application of concepts fresh and current"--
