

Bedford Marine Diesel Engines

The diesel engine is by far the most popular powerplant for boats of all sizes, both power and sail. With the right care and maintenance it is twice as reliable as the petrol engine as it has no electrical ignition system, which in the marine environment can suffer from the effects of damp surroundings. Self-sufficiency at sea and the ability to solve minor engine problems without having to alert the lifeboat is an essential part of good seamanship. Marine Diesel Engines, explains through diagrams and stage-by-stage photographs everything a boat owner needs to know to keep their boat's engine in good order, how to rectify simple faults and how to save a great deal of money on annual service charges. Unlike a workshop manual that explains no more than how to perform certain tasks, this book offers a detailed, step-by-step guide to essential maintenance procedures whilst explaining exactly why each job is required.

MotorBoating

The Atlantic Boating Almanac consists of five regional volumes, the Pacific Boating Almanac consists of three volumes, and there is one volume that covers the Gulf of Mexico (there are seven in all in the annual series). The seven regions are: Maine to Cape Cod (Vol. 1), Cape Cod to Sandy Hook, N.J. (Vol. 2), N.C. & S.C., GA, & Bermuda (Vol. 3), Florida and The Bahamas (Vol. 4), The Gulf of Mexico, Southern California & Mexico, Northern California & the Delta, and The Pacific Northwest (Vol. 1). The Almanacs contain various data which the recreational boater is required to keep on board their vessel at all times. This information includes the latest Coast Pilot, Tide & Current Tables, First Aid, Electronics, Navigation and Safety, Weather, and Yacht Club Burgees. These editions are updated and published annually.

The Commercial Motor

This is the inside story of how motorcycle race team of the 'forties worked. How a division in the company's outlook drove it to bankruptcy. The story of how a member of the racing team saw it all. How he participated in racing, and devised a new machine, but was swept aside. How he emigrated, and tried to get a factory to embrace a new world view but was frustrated again. Lessons that Detroit might heed. How he moved into an academic program, and aided the US Air Force in its search for lower costs.
