***The introduction of the Porsche 901 in 1963 marked a milestone in automotive history. Although the name later had to be changed because Peugeot had patented having a 0 in the middle of car model numbers, the 911 didn't let anything stand in the way of its becoming an iconic sports car. This success story spans all the way from the 901 and the Carrera RS 2.7 (which with its characteristic rear spoiler--the so-called "ducktail"--was the fastest production car of its time) right up to the current generation of the 991. For the 50th birthday of the populous 911 family, the famous automotive photographer Rene Staud, whose The Mercedes-Benz 300 SL Book has also been published by teNeues, showcases the most important models--all in his typically radiant and distinctive style. The Official Factory Parts Catalogues show exploded views of systems and identify each part by name and factory part number. These highly detailed illustrations are an indispensable reference for anyone involved in a restoration project or intricate repair job. Having the correct part name and number also makes it faster and easier to accurately order your parts.***

*Many of the challenges that decision-makers grapple with in relation to climate change are governance related. Planning and decision-making is evolving in ambiguous institutional environments, in which many key issues remain unresolved, including relationships between different actors; funding arrangements; and the sources and procedures for vetting data. These issues are particularly acute at this juncture, as climate adaptation moves from broad planning processes to the management of infrastructure systems. Concrete decisions must be made. Adapting Infrastructure to Climate Change draws on case studies of three coastal cities situated within very different governance regimes: neo-corporatist Rotterdam, neo-pluralist Boston and semi-authoritarian Singapore. The book examines how infrastructure managers and other stakeholders grappling with complex and uncertain climate risks are likely to make project-level decisions in practice, and how more effective decision-making can be supported. The differences across governance regimes are currently unaccounted for in adaptation planning, but are crucial as best practices are devised. These lessons are also applicable to infrastructure planning and decision-making in other contexts. This book will be of great interest to scholars of climate change and*

**Das Buch analysiert Rennfahrzeuge Baugruppe für Baugruppe und liefert so einen tiefen Einblick in die Funktion und Zusammenhänge, die ein erfolgreiches Fahrzeug ausmachen. Der Leser erhält neben dem Verständnis für das Gesamtsystem auch verwertbares Wissen zu Themen wie Rennmotoren (Verbrennungsmotoren, E-Maschinen und Hybridantriebe), Chassis, Aerodynamik, Fahrwerk und Reifen, Lenkung und Bremsen sowie Fahrdynamik. Beides ermöglicht ihm Fahrzeuge zu konstruieren oder bestehende abzustimmen und gezielt weiterzuentwickeln. Die Bände sind nach üblichen Aufgabenteilungen eines Teams zusammengefasst, so dass sie ein handliches Format besitzen. Drei Bände behandeln Gesamtfahrzeug, Antrieb und Fahrwerk. Ein vierter Band widmet sich dem Thema Datenerfassung und -analyse für Setup und Entwicklung von Rennfahrzeugen.**

*The Routledge Handbook of Material Culture in Early Modern Europe marks the arrival of early modern material culture studies as a vibrant, fully-established field of multi-disciplinary research. The volume provides a rounded, accessible collection of work on the nature and significance of materiality in early modern Europe – a term that embraces a vast range of objects as well as addressing a wide variety of human interactions with their physical environments. This stimulating view of materiality is distinctive in asking questions about the whole material world as a context for lived experience, and the book considers material interactions at all social levels. There are 27 chapters by leading experts as well as 13 feature object studies to highlight specific items that have survived from this period (defined broadly as c.1500–c.1800). These contributions explore the things people acquired, owned, treasured, displayed and discarded, the spaces in which people used and thought about things, the social relationships which cluster around goods – between producers, vendors and consumers of various kinds – and the way knowledge travels around those circuits of connection. The content also engages with wider issues such as the relationship between public and private life, the changing connections between the sacred and the profane, or the effects of*

*gender and social status upon lived experience. Constructed as an accessible, wide-ranging guide to research practice, the book describes and represents the methods which have been developed within various disciplines for analysing pre-modern material culture. It comprises four sections which open up the approaches of various disciplines to non-specialists: 'Definitions, disciplines, new directions', 'Contexts and categories', 'Object studies' and 'Material culture in action'. This volume addresses the need for sustained, coherent comment on the state, breadth and potential of this lively new field, including the work of historians, art historians, museum curators, archaeologists, social scientists and literary scholars. It consolidates and communicates recent developments and considers how we might take forward a multi-disciplinary research agenda for the study of material culture in periods before the mass production of goods.*

These two models were at the pinnacle of Lancia's achievements in the 50s and 60s. The Aurelia was the world's first production car to be powered by a 60-degree V6 engine and also featured a transaxle and fully independent suspension system. It had an attractive shape and the GT coupes made from 1953 represented a classic shape.

Pininfarina styled the saloons and coupes of the Flaminia range with designs also available from Touring and Zagato. This is a book of contemporary road and comparison tests, specification and technical data, new model introductions, driver's impressions, travel, history. Models covered include:- Aurelia saloon, Aurelia GT, GT2500, GT America, Spyder, Flaminia, CoupT, Zagato, Pininfarina CoupT, GT, Convertible, 2.8.

Defence Industries in the 21st Century explores the transformation in the global defence industrial production through examining the interaction between international and domestic factors. With the global defence industry and arms market likely continue to expand and mature, the ways in which this progression could influence international politics remain obscure. In practice, as the contents of this book show, the defence industrial bases and arms export policies of emerging states display significant variance. This variance is the result of a unique balance between domestic and international factors that has shaped the defence industrialisation behaviour and policies of the less industrialised states. One of the most important conclusions of the book is that the interplay between domestic and international factors clearly influences the variation in the emerging states' defence industrialisation policies, as well as their success or failure. While international factors create opportunities, they also limit the options available to emerging economies.

Domestic factors also play an important role by shaping the policy choices of the states' decision makers. Exploring the balance between international and domestic factors and the ways in which they influence defence industrialisation in emerging states, Defence Industries in the 21st Century will be of great interest to scholars of Defence Industries, Arms Manufacturing, and Defence, Strategic and Security Studies more generally. The chapters were originally published in Defence Studies, Comparative Strategy and All Azimuth. Caroline Webb knows what it means to lose the person you love most. Twenty years ago, her five-year-old

daughter, Hayley, was the light of her life, her treasure, her angle. Then came the terrible day when Hayley was kidnapped from her favorite swing. More than a month passed before her burned, lifeless body was found. All that remained was the silence of Caroline's heartache--and her guilt... Now, Caroline has started over with a new husband. She even has another precious daughter, Melinda. She thinks she has put the ghosts of her past behind her. But without warning, those ghosts once again start to echo in the night. Suddenly, Hayley's favorite doll reappears...strange murders rock the Webbs' small town...Caroline even claims she has heard the voice of the little girl she lost all those years ago. Could Hayley still be out there somewhere, somehow? Now a killer waits in the wings--waiting to make Caroline live her worst nightmare yet...
