

Beginnings Through Reconstruction Lesson Plans

The Handbook of Major Events in Economic History aims to introduce readers to the important macroeconomic events of the past two hundred years. The chapters endeavour to explain what went on and why during the most significant economic epochs of the nineteenth, twentieth and early twenty-first centuries and how where we are today fits in this historical timeline. Its short chapters reflect the most up-to-date research and are written by well-known economists who are authorities on their subjects. The Handbook of Major Events in Economic History was written with the intent of presenting the professional consensus in explaining the economics driving these historical events. Inquiry-Based Lessons in U.S. History: Decoding the Past provides primary source lessons that focus on teaching U.S. history through inquiry to middle school students. Students will be faced with a question to answer or problem to solve and will examine primary sources for evidence to create hypothetical solutions. The chapters focus on key chronological periods (e.g., the Age of Exploration to the Civil Rights era) and follow the scope and sequence of major social studies textbooks, with activities linked to the U.S. History Content Standards and the Common Core State Standards for Literacy in History/Social Studies. The three lesson plans in each chapter begin with an essential question that sets the focus for the primary sources and teaching strategies that follow. The lesson plans include differing types of primary sources such as photographs, speeches, political cartoons, historic maps, paintings, letters, and diary entries.

Grades 5-8

"The Lewis and Clark Corps of Discovery is often presented as an exciting adventure story of discovery, friendship, patriotism. However, when viewed through a non-colonial lens, this same period in U.S. History can be understood quite differently. In BEYOND ADVENTURE, the authors provide a conceptual framework, ready-to-use lesson plans, and teaching resources to address oversimplified versions of the Lewis and Clark expedition"--

Americans are fond of describing their country as a young nation. Though there is much in that description that is true, it should not obscure the richness and variety of the nations pasta past that provides the indispensable key to understanding the nations present. This completely new reference set examines in detail the formative stages of Americas essential past from European settlement of the Western Hemisphere and the displacement of indigenous peoples to the birth of the United States and its astonishing growth, in both population and territory, from a modest confederation of thirteen independent states.

Taking English culture as its representative sample, The Secret History of Domesticity asks how the modern notion of the public-private relation emerged in the seventeenth and eighteenth centuries. Treating that relation as a crucial instance of the modern division of knowledge, Michael McKeon narrates its pre-history along with that of its essential component, domesticity. This narrative draws upon the entire spectrum of English people's experience. At the most "public" extreme are political developments like the formation of civil society over against the state, the rise of contractual thinking, and the devolution of absolutism from monarch to individual Subject. The middle range of experience takes in the influence of Protestant and scientific thought, the printed publication of the private, the conceptualization of virtual publics -- society, public opinion, the market -- and the capitalization of production, the decline of the domestic economy, and the increase in the sexual division of labor. The most "private" pole of experience involves the privatization of marriage, the family, and the household, and the complex entanglement of femininity, interiority, Subjectivity, and sexuality. McKeon accounts for how the relationship between public and private experience first became intelligible as a variable interaction of distinct modes of being -- not a static dichotomy, but a tool to think with. Richly illustrated with nearly 100 images, including paintings, engravings, woodcuts, and a representative selection of architectural floor plans for domestic

interiors, this volume reads graphic forms to emphasize how susceptible the public-private relation was to concrete and spatial representation. McKeon is similarly attentive to how literary forms evoked a tangible sense of public-private relations -- among them figurative imagery, allegorical narration, parody, the author-character-reader dialectic, aesthetic distance, and free indirect discourse. He also finds a structural analogue for the emergence of the modern public-private relation in the conjunction of what contemporaries called the "secret history" and the domestic novel. A capacious and synthetic historical investigation, *The Secret History of Domesticity* exemplifies how the methods of literary interpretation and historical analysis can inform and enrich one another.

Research on history instruction and learning is emerging as an exciting new field of inquiry. The editors prepared this volume because the field is at an important moment in its development -- a stage where there is research of sufficient depth and breadth to warrant a collection of representative pieces. The field of research on history teaching and learning connects with both traditional research on social studies and with recent cognitive analyses of domains such as mathematics and physics. However, the newer research goes beyond these activities as well. Where traditional research approaches to social studies instruction and learning have focused on curriculum, they have avoided the study of purely disciplinary features, the textual components of history and the concomitant demands, as well as the nature of various learners. Where recent cognitive analyses of mathematics and physics have dealt with misconceptions and knowledge construction, they have avoided topics such as perspective-taking, interpretation, and rhetorical layerings. The new work, by contrast, has been concerned with these issues as well as the careful analyses of the nature of historical tasks and the nature of disciplinary and instructional explanations. The lines of research presented in these chapters are both compelling and diverse and include a range of topical questions such as: * What affects the quality of teaching? * How are historical documents interpreted in the writing of history? * How is history explained? * What are the classroom demands on an elementary school social studies teacher? * What does text accomplish or fail to accomplish in educational settings? * How do teachers think about particular topics for history teaching? Although much of the research reflects a grounding in, or the influence of, cognitive psychology, not all of it derives from that tradition. Traditions of rhetoric, curriculum analysis, and developmental psychology are also woven throughout the chapters. The editors envision this volume as a contribution to

educational research in a subject matter, and as a tool for practitioners concerned with the improvement of instruction in history. They also anticipate that it will contribute to cognitive science.

Teaching for Equity and Justice

Provides descriptions of and ratings for one thousand history Web sites.

Emmanuel Neba-Fuh in this comprehensive chronological compilation and thorough narrative of the history of white supremacy in Africa provide an unflinching fresh case that African poverty - a central tenet of the "shithole" demonization, is not a natural feature of geography or a consequence of culture, but a direct product of imperial extraction from the continent – a practice that continues into the present. A brutal and nefarious tale of slave trade, genocides, massacres, dictators supported, progressive leaders murdered, weapon-smuggling, cloak-and-dagger secret services, corruption, international conspiracy, and spectacular military operations, he raised the most basic and fundamental question - how was Africa (the world's richest continent) raped and reduced to what Donald J. Trump called "shithole?" By V. Mbanwie

Literature has always recorded a history of patriarchy, sexual violence, and resistance. Academics have been using literature to expose and critique this violence and domination for half a century. But the continued potency of #MeToo after its 2017 explosion adds new urgency and wider awareness about these issues, while revealing new ways in which rape culture shapes our everyday lives. This intersectional guide helps readers, students, teachers, and scholars face and challenge our culture of sexual violence by confronting it through the study of literature. #MeToo and Literary Studies gathers essays on literature from Ovid to Carmen Maria Machado, by academics working across the United States and around the world, who offer clear ways of using our reading, teaching, and critical practices to address rape culture and sexual violence. It also examines the promise and limitations of the #MeToo movement itself, speaking to the productive use of social media as well as to the voices that the movement has so far muted. In uniting diverse voices to enable the #MeToo movement to reshape literary studies, this book is also committed to the idea that the way we read and write about literature can make real change in the world.

Richard D. Kahlenberg offers a narrative on the man who would become one of the most important voices in public education and American politics in the last quarter century - Albert Shanker.

The Handbook of Planning History offers a comprehensive interdisciplinary overview of planning history since its emergence in the late 19th century, investigating the history of the discipline, its core writings, key people, institutions, vehicles, education, and practice. Combining theoretical, methodological, historical, comparative and global approaches to planning history, the Handbook explores the state of the discipline, its achievements and shortcomings and future challenges. A foundation for the discipline and a springboard for scholarly research, the Handbook of Planning History explores planning history on an international scale in forty-two chapters, providing readers the unique opportunities for comparison. The diverse contributions open up new perspectives on the many ways in which contemporary events, changing research needs, and cutting-edge methodologies shape the writing of planning history

This comprehensive resource is an invaluable teaching aid for adding a global dimension to students' understanding of American history. It includes a wide range of materials from scholarly articles and reports to original syllabi and ready-to-use lesson plans to guide teachers in enlarging the frame of introductory American history courses to an international view. The contributors include well-known American history scholars as well as gifted classroom teachers, and the book's emphasis on immigration, race, and gender points to ways for teachers to integrate international and multicultural education, America in the World, and the World in America in their courses. The book also includes a 'Views from Abroad' section that examines problems and strategies for teaching American history to foreign audiences or recent immigrants. A comprehensive, annotated guide directs teachers to additional print and online resources.

Challenging Dominant Narratives in K-12 Curriculum

Thinking Like a Historian: Rethinking History Instruction by Nikki Mandell and Bobbie Malone is a teaching and learning framework that explains the essential elements of history and provides "how to" examples for building historical literacy in classrooms at all grade levels. With practical examples, engaging and effective lessons, and classroom activities that tie to essential questions, Thinking Like a Historian provides a framework to enhance and improve teaching and learning history. We invite you to use Thinking Like a Historian to bring history into your classroom or to re-energize your teaching of this crucial discipline in new ways. The contributors to Thinking Like a Historian are experienced historians and educators from elementary through university levels. This philosophical and pedagogical guide to history as a discipline uses published standards of the American Historical Association, the Organization of American Historians, the National Council for History Education, the National History Standards and state standards for Wisconsin and California.

Grounded in a critical sociocultural approach, this volume examines issues associated with teaching and learning difficult histories in international contexts. Defined as representations of past violence and oppression, difficult histories are contested and can evoke emotional, often painful, responses in the present. Teaching and learning these histories is contentious yet necessary for increased dialogue within conflict-ridden societies, reconciliation in post-conflict societies, and greater social cohesion in long-standing democratic nations. Focusing on locations and populations across the globe, chapter authors investigate how key themes—including culture, identity, collective memory, emotion, and multi-perspectivity, historical consciousness, distance, and amnesia—inform the teaching and learning of difficult histories.

At last - here is a single volume authoritative history of Scottish architecture. This compact yet comprehensive account combines factual description of the vast and fertile range of visual forms and key architects in each period with a wide-ranging analysis of their social, ideological and historical context. As Scotland has often been closely involved with new trends in western architecture, this book highlights the interaction of Scottish developments with broader European and international movements. From the beginnings of the Renaissance in the 15th century right up to the 1990s, this much-needed

survey covers the entire post-medieval story in one volume.

Exploring American History

Data Book of Social Studies Materials and Resources

A Critical Sociocultural Approach

The original edition of *Rethinking Our Classrooms*, published in 1994, sold more than 175,000 copies and has been used by teachers and teacher educators throughout the United States and the world. This new edition contains some of the best classroom writing we've published over the past five years, along with the most popular articles from the original edition, completely updated resource sections, and a new "Beyond the Classroom" chapter. There are new essays on science and environmental education, immigration and language, military recruitment, early childhood education, teaching about the world through mathematics, and lesbian issues. Nowhere is the connection between critical teaching and effective classroom practice clearer or more accessible. A great resource for new and veteran K-12 teachers, as well as teacher education and staff development programs.

The Reconstruction Era and The Fragility of Democracy uses our pedagogical approach to help students examine how a society rebuilds after extraordinary division and trauma, when the ideals of democracy are most vulnerable. The unit presents educators with materials they need to engage students in a deep study of the pivotal era of American history that followed the Civil War. It provides history teachers with dozens of primary and secondary source documents, close reading exercises, lesson plans, and activity suggestions that will push students both to build a complex understanding of the dilemmas and conflicts Americans faced during Reconstruction and to identify the legacies of this history that extended through the 20th century to the present day. The materials will help students examine closely themes such as historical memory, justice, and civic participation in a democracy. This unit includes a variety of interdisciplinary teaching strategies that reinforce historical and literacy skills."

Resources in Education

Learn how to design history lessons that foster students' knowledge, skills, and dispositions for civic engagement. Each section of this practical resource introduces a key element of civic engagement, such as defending the rights of others, advocating for change, taking action when problems are observed, compromising to promote reform, and working with others to achieve common goals. Primary and secondary sources are provided for lessons on diverse topics such as the Alice Paul and the Silent Sentinels, Samuel Gompers and the American Federation of Labor, Harriet Tubman, Reagan and Gorbachev's unlikely friendship, and Lincoln's plan for Reconstructing the Union. With Teaching History, Learning Citizenship, teachers can show students how to apply historical thinking skills to real world problems and to act on civic dispositions to make positive changes in their communities. "Teachers will appreciate the adaptability of the unscripted lessons in this book. Each lesson provides background historical context for the teacher and the resources to expose students to themes of civic engagement that cut across historical time periods and current events. With the case studies, ideas, and sources in this book, teachers can instill students with the dispositions of democratic citizens." –From the Foreword by Laura Wakefield, interim executive director, National Council for History Education

The definitive, one-stop reference to the history of landscape architecture-now expanded and revised This revised edition of Landscapes in History features for the first time new information-rarely available elsewhere in the literature-on landscape architecture in India, China, Southeast Asia, and Japan. It also expands the discussion of the modern period, including current North American planning and design practices. This unique, highly regarded book traces the development of landscape architecture and environmental design from prehistory to modern times-in Europe, the Middle East, Asia, and North America. It covers the many cultural, political, technological, and philosophical issues influencing land use throughout history, focusing not only on design topics but also on the environmental impact of human activity. Landscape architects, urban planners, and students of these disciplines will find here: * The most comprehensive, in-depth, and up-to-date overview of the subject * Hundreds of stunning photographs and design illustrations * A scholarly yet accessible treatment, drawing on the latest research in archaeology, geography, and other disciplines * The authors' own firsthand observations and travel experiences * Insight into the evolution of landscape architecture as a discipline * Useful chapter summaries and bibliographies
