*The dissemination of classical material to children has long been a major form of popularization with far-reaching effects, although until very recently it has received almost no attention within the growing field of classical reception studies. This volume explores the ways in which children encountered the world of ancient Greece and Rome in Britain and the United States over a century-long period beginning in the 1850s, as well as adults' literary responses to their own childhood encounters with antiquity. Rather than discussing the role of classics in education, it focuses on books read for enjoyment, and on two genres of children's literature in particular: the myth collection and the historical novel. The tradition of myths retold as children's stories is traced in the work of writers and illustrators from Nathaniel Hawthorne and Charles Kingsley to Roger Lancelyn Green and Ingri and Edgar Parin D'Aulaire, while the discussion of historical fiction focuses particularly on the roles of nationality and gender in the construction of an ancient world for modern children. The book concludes with an investigation of the connections between childhood and antiquity made by writers for adults, including James Joyce, Virginia Woolf, and H.D. Recognition of the fundamental role in children's literature of*

*adults' ideas about what children want or need is balanced throughout by attention to the ways in which child readers have made such works their own. The formative experiences of antiquity discussed throughout help to explain why despite growing uncertainty about the appeal of antiquity to modern children, the classical past remains perennially interesting and inspiring. This volume discusses environmental issues associated with deep-sea mining, with an emphasis on potential impacts, their consequences and the policy perspectives. The book describes the methods and technologies to assess, monitor and mitigate mining impacts on marine environments, and also suggests various approaches for environmental management when conducting deep-sea mining. The volume brings together information and data for researchers, contractors, mining companies, regulators, and NGOs working in the field of deep-sea mining. Section 1 highlights the various environmental issues and discusses methods and approaches that can help in developing environmentally sustainable deep-sea mining. Section 2 details the results and outcomes of studies related to impact assessment of deep-sea mining, and proposes methods for monitoring. *This publication assesses progress towards Sustainable Development Goal 4 (SDG 4) on education and its ten targets, as well as other related education targets in the SDG agenda. It addresses inclusion in education, drawing attention to all those excluded from education, because of background or ability. The report is motivated by the explicit reference to inclusion in the 2015 Incheon Declaration, and the call to ensure an inclusive and equitable quality education in the formulation of SDG 4, the global goal for education. It reminds us that, no matter what argument may be built to the contrary, we have a moral imperative to ensure every child has a right to an appropriate education of high quality.*

The reality is that while technology has advanced quickly, digital parenting skills have not kept pace. It may not be our fault, but it is definitely a problem. There is always so much information to process with the new tech, that as a parent it becomes difficult to distinguish that which is truly important and that which is not. As a parent and an e-learning professional, I understand and sympathise with the feeling of being overwhelmed by the use of new technology in our lives. While there is no such thing as perfection, the aim of this book is to give parents good enough information to get them started in the right direction in dealing with the technological challenges their children face.

The human imagination manifests in countless different forms. We imagine the possible and the impossible. How do we do this so effortlessly? Why did the capacity for imagination evolve and manifest with undeniably manifold complexity uniquely in human beings? This handbook reflects on such questions by collecting perspectives on imagination from leading experts. It showcases a rich and detailed analysis on how the imagination is understood across several disciplines of study, including anthropology, archaeology, medicine, neuroscience, psychology, philosophy, and the arts. An integrated theoretical-empirical-applied picture of the field is presented, which stands to inform researchers, students, and practitioners about the issues of relevance across the board when considering the imagination. With each chapter, the nature of human imagination is examined - what it entails, how it evolved, and why it singularly defines us as a species.

*This Handbook brings together an international cast of experts to explore the social nature and context of creativity studies, focusing on methodology as a key component in advancing the social study of creativity. Two decades on from the pioneering work of Alfonso Montuori and Ronald E. Purser, the authors present a timely appraisal of past and present work in social creativity studies, and look ahead to future developments within this field. The authors collectively offer a rigorous examination of the methodological and empirical issues and techniques involved in studying social creativity. They examine the phenomenon as a form of communication and interaction within collaborative relationships; contending that creativity happens not within a vacuum but instead from a nexus of personal, social and contextual influences. This comprehensive work is organized in three parts, focusing first on the various methodological approaches applicable to the social in creativity studies. It secondly turns to empirical findings and approaches relating to the social nature of creativity. In the book's final part, the authors offer reflections on the state of social research into creativity, pinpointing areas requiring further methodological scrutiny and empirical verification, and areas that may inspire further theoretical or applied work. Skepticism: From Antiquity to the Present is an authoritative and up-to-date survey of the entire history of skepticism. Divided chronologically into ancient, medieval, renaissance, modern, and contemporary periods, and featuring 50 specially-commissioned chapters from leading philosophers, this comprehensive volume is the first of its kind. By exploring each of the distinct traditions and providing expert insights, this extensive reference work: - covers major thinkers such as Sextus Empiricus, Cicero, Descartes, Hume, Spinoza, and Wittgenstein. - acknowledges the influence of ancient skeptical traditions on later philosophy and explains why it is still a fertile topic of inquiry among today's philosophers and historians of philosophy. - analyzes various forms of skepticism including Pyrrhonian, Academic, religious, moral, and neo-Pyrrhonian. - addresses issues in contemporary epistemology and indicates new directions of study. Skepticism, a driving force in the history of philosophy, remains at the center of debates in ethics, philosophy of religion, epistemology, and the philosophy of mind. Skepticism: From Antiquity to the Present is an essential point of reference for any student, researcher, or practitioner of philosophy, presenting a systematic and historical survey of this core philosophical topic.*

designs, it looks at the intersection of politics, economics, aesthetics and pedagogical ideas and practices. More specifically, it explores and unfolds educational governance as it is constituted, materialized and transformed in and through material school designs. It does so by studying a range of issues: from the material and aesthetic language of schooling to the design of the built environment, from spatial organization to the furnishing and equipment of classrooms, and from technologies of regulation to the incorporation of tools of learning. The book presents examples from Europe, Latin and Central America and the United States, and relates to the past, present and future of governance and school design. It focuses on design processes and on designers/architects and people involved in the planning of school design, as well as on school leaders, teachers and pupils adopting, inhabiting and re-shaping them in everyday school life. Furthermore, the book discusses how to study governance by material school design, and how to act upon governance by material design on wishful, actual and ethical terms.

Wracked with guilt due to a horrific accident that maimed her best friend two years earlier, sixteen-year-old Bett ' s life is a series of pluses and minuses. But when the pluses start

to outweigh the minuses, Bett is forced to confront her self-harming behavior in this powerful novel about self-forgiveness. Two years ago, Bett was badass. Fearless, feisty, athletic; the type of person who 'd bike down a mountain ledge just for the thrill of it. Give her a dare and she 'd get it done, no question. But then she dared a friend, and instead of a thrill came horror and guilt. Now Bett divides her life into Pluses and Minuses. Pluses are anything that make her feel good, things she doesn ' t—nope, no way, no how—deserve. Minuses are punishments she doles out to herself—literally, in the form of binge eating—when a Plus can ' t be avoided. Now, Bett is extremely overweight, depressed, and the opposite of badass. Which makes her happy. But is that a Plus? Bett ' s system is beginning to crack, and revelations of that prank-gone-wrong are threatening to come out. Just Wreck It All is a blaze of a novel about guilt and self-harm that explores how easy it is to punish ourselves, and just how difficult it is to find the power to forgive ourselves.

South Asia constitutes a key geography in the world today considering its large population and related daunting energy and environmental challenges. Many countries in the region are faced with a growing gap between energy demand and local resources, resulting in an increased dependence on imports. According to the International Energy Agency (IEA), the energy demand in South Asia will grow at a rate more than double that of the world average in the coming decades. This book addresses the critical subject of energy and environmental outlook for South Asia and presents the wider challenges and the responses at the national and regional level. Features: Discusses and addresses the ongoing energy and environmental challenges faced by almost a quarter of the global population Includes dedicated chapters for each country and presents analysis and recommendations by regional experts Examines how deteriorating air quality and persistent natural disasters are severe environmental challenges for the region Discusses the implications of global warming and climate change for South Asia Includes practical case studies throughout Energy and Environmental Outlook for South Asia will benefit a wide range of stakeholders from various fields including but not limited to energy, environment, economics, national security, and sustainable development. It also serves as a valuable resource for academics, researchers, analysts, policymakers, and representatives of utilities, industry, professional bodies, financial institutions, think tanks, and developmental organizations to better plan their initiatives, activities,

Judith lives with her husband and several spoiled dogs in an 18th century farmhouse that has been in her family for 250 years. Church in Life breaks fresh ground by proposing a new framework for thinking about innovation in the church, by arguing that starting new ecclesial communities should be at the centre of the church's life and thought, and by offering new theology and methodologies for church planting. Church planters will find in it the theoretical and practical resources for a radical missional ecclesiology, while theologians will find a nuanced reworking of the purpose and nature of the church.

Multilingual classrooms and online communication are becoming increasingly linguistically diverse due to globalization and new discourse patterns are emerging. Many of these patterns include the use of linguistic resources from multiple languages in the same utterance. Translanguaging, a recent theoretical framework, is gaining prominence among scholars interested in studying these multilingual discursive practices and the concept of a unitary language system for lexical processing. The aim of this book is

to gain a better understanding of the bilingual brain and how words and sentences that use features from socially distinct languages are processed. Using examples provided by multilingual study participants, a categorization of the various forms of translanguaging is developed to build a translanguaging model. Psycholinguistic methods such as eye tracking are combined with conventional sociolinguistic survey methodology to provide rich qualitative and quantitative data that address the cognitive effects of translanguaging and the underlying structure of translingual word-formations. This monograph shows how language biography, exposure, and attitude towards multilingual discursive practices all affect cognitive processing. It also demonstrates how multilingual speakers are setting the patterns for novel word-formations to be produced, thus having a social, cultural, and cognitive impact on how we communicate.
