Success Is a Choice

A student-friendly and engaging resource for the 2016 Edexcel GCSE Geography B specification, this brand new course is written to match the demands of the specification. As well as providing thorough and rigorous coverage of the spec, this book is designed to engage students in their learning and to motivate them to progress.

A man who almost destroyed his life with drugs and alcohol, and recovered via the triathlon.

This book discusses digitalization trends and their concrete applications in business and societal contexts. It summarizes new findings from research, teaching and management activities comprising digital transformation, e-business, the representation of knowledge, human-computer interaction and business optimization. The trends discussed include artificial intelligence, virtual reality, robotics, blockchain, and many more. Professors and researchers who conduct research and teach at the interface between academia and business present the latest advances in their field. The book adopts the philosophy of applied sciences and combines both rigorous research and practical applications. As such, it addresses the needs of both professors and researchers, who are constantly seeking inspiration, and of managers seeking to tap the potential of the latest trends to take their business to the next level. Readers will find answers to pressing questions that arise in their daily work.

This book provides a comprehensive, student-friendly and critical introduction to youth justice in England and Wales, offering a balanced evaluation of its development, rationale, nature and evidence base. It explores the evolution of definitions and explanations of youth offending and examines the responses to it that constitute youth justice. Bringing together theory, policy and practice, this book provides a balanced exposition of contemporary youth justice debates, including detailed discussions of governmental rationales, policy developments, practical issues and an extensive evaluation of critical academic positions. It includes a range of features designed to engage and inspire students: 'Stop and think': Activities challenging students to reflect on important issues. 'Conversations': Discussions of key themes and issues from the perspectives and experiences of relevant stakeholders, including policy makers and activists. 'Telling it like it is': Testimonies giving voice to the personalised, subjective and contentious viewpoints of youth justice influencers. 'Controversies and debates': Prompts to stimulate students to question and critique established knowledge and understanding by considering alternative angles. 'Recurring theme alerts': Boxes flagging recurring themes in the developing construction of youth offending and youth justice. The new edition has been fully revised and updated and includes discussion of revised National Standards in Youth Justice, the new 'Child First' strategic objective for youth justice, the 'trauma informed practice' movement, the impact of coronavirus on

children in the Youth Justice System and the continued impact of austerity on policy and practice. This book is essential reading for students taking courses in youth justice, youth offending, youth crime, youth work and social policy.

Official Report

Teaching Mathematics at Secondary Level

This revised and updated edition of *Open and Distance Learning in the Developing World* sets the expansion of distance education in the context of general educational change and explores its use for basic and non-formal education, schooling, teacher training and higher education. Engaging with a range of topics, this comprehensive overview includes new material on: non-formal education: mass-communication approaches to education about HIV/AIDS and recent literacy work in India, South Africa, and Zambia schooling: new research projects in open schooling in Asia and subsaharan Africa, and interactive radio instruction in South Africa the impact of new technology and globalisation: learning delivered through the internet and mobile learning the political economy: international agencies, the role of private sector, and funding. With its critical appraisal of the facts and examination of data about effectiveness, this book provides answers to problems and poses key questions for the consideration of policy makers, educational practitioners and all professionals involved in implementing and delivering sustainable open and distance learning.

This Ministry of Education approved handbook is designed to help Bahamian students prepare for the next step after graduation. Matters specific to high school students in the Bahamas are addressed.

Included in this manual are: Scholarship information; quizzes relating to career, college readiness, job interview skills etc; college and job application forms; reference forms; preparation timeline; etc

A wonderfully accessible handbook to the art of writing and reading poetry--itself written entirely in verse How does poetry work? What should readers notice and look out for? Poet Lucy Newlyn demystifies the principles of the form, effortlessly illustrating key approaches and terms--all through her own original verse. Each poem exemplifies an aspect of poetic craft--but read together they suggest how poetry can evoke a whole community and its way of life in myriad ways. In a series of beautiful meditations, Newlyn guides the reader through key aspects of poetry, from sonnets and haiku to volta and synecdoche. Avoiding glosses and notes, her poems are allowed to speak for themselves, and show that there are no limits to what poetry can communicate. Newlyn's timeless verse will appeal to lovers of poetry as well as to practitioners, teachers, and students of all ages.

Onomatopoeia You'd play here all day if you had your way-- near the stepping-stones, in the clearest of rock-pools, where water slaps and

slips; where minnows dart, and a baby trout flop-flips.

Do you have personal goals in mind and see your present situation as a hindrance to achieving them? Are you struggling with finances, relationships and forgiveness? Faith and trust in God may be the answer to your concerns. At the completion of high school, it was my dream to attend college. Having no money, I realized that I had to do something to make my dream a reality. In this book, I share how I made a start toward achieving my first dream by getting a job and then watching numerous doors open. Learn from my personal experiences the goodness of God and how He saved me from death and opened doors, enabling a single mother to obtain a college education and provide for her son. It is my hope that the readers, particularly adolescents, will find this book useful in dealing with life's problems and issues, and realize the importance of perseverance while allowing God to work things out in their lives. As for adults, I hope they will be strengthened in their determination, focus, fortitude, understanding and forgiveness, and learn to lean on God to help them through the hard times. Ten Steps to Overachieving in Business and Life

The ideal companion for students taking the Bahamas GCSE English language examination.

Provide expert guidance on how to master the skills necessary in the examination with this companion which has been written in conjunction with the Ministry of Education, Youth, Sports and Culture. - Build and consolidate knowledge with an opening chapter summarising current grammar and sentence construction, correct spelling, word choice and punctuation. - Prepare students for the exam with chapters providing guidance on Continuous Writing (Paper 1), Listening Skills (Paper 2) and Comprehension and Directed Writing (Papers 3 and 4). - Send students into the exam with confidence with activities to test skills, 'exam-type' exercises, student answers and comments from examiners, as well as practice examination papers and answers.

This second edition of a GCSE computer studies text includes chapters on personal computers and desktop publishing, spreadsheets and their applications, and detailed case studies illustrating how a computer system can revolutionize the working environment. The Data Protection Act is also included, together with project work, an extended section on coursework, advice on how to revise and hints on how to pass examinations. Key words are explained in the text in context and highlighted with bold type, and also explained in an extensive glossary.

An insurance salesman desperately tries to recapture his youth in this “charming” comic novel by the iconic British author (The New York Times). George Bowling is having a crisis. Not a loud, unsightly one, but a small, desperate one. His days are occupied by an unfulfilling insurance job; his nights spent worrying about his mortgage, marriage, expanding waistline, and what seems to be a certain prospect of World War II looming on the horizon. So when George unexpectedly hits it big on a lucky horse, he spends the windfall on the only thing he ever knew to make him happy: his childhood. George travels back to his boyhood home of Lower Binfield, swimming in vivid memories of worry-free bliss, sights, sounds, smells, and emotions of a pre-war world. But while the idyllic village in George’s head may not have seen battle, the reality may be more sobering than he is prepared to deal with. Penned with Orwell’s trademark insight and passion, *Coming Up for Air* is an elegiac look at memory and desire at a desperate moment in England’s history.

This second edition of GCSE Biology is in line with the requirements of the National Curriculum and the revised GCSE Science: Biology syllabuses. Key features include new chapters on personal health, biotechnology and disease; updated questions; redesigned layout; and increased use of colour.

Coming Up for Air

A Critical Introduction

Marang

IGCSE Biology

A Primer in Verse

This longitudinal, qualitative, multi-case study examines the mathematical experiences of three Bahamian students pursuing science degrees in American universities and its relationship to their previous mathematical experiences in their Bahamian high schools. Drawing on cultural psychology and sociocultural theories of learning, this study found that the relationship between the academic preparedness of the participants on their experiences with collegiate mathematics is not limited to subject content only. The lessons learnt from the implied curriculum also play a role in their experiences with collegiate mathematics. Of the three participants, two have had to learn/develop techniques for studying because they had not been sufficiently challenged in their previous environments to do so. Each of the cases also highlights some powerful constructs needed for success in mathematics and at least two emphasize making connections between concepts, procedures, manipulatives/tools and multiple approaches when solving problems. This study contributes to an emerging area of research on student persistence in college-level mathematics courses as well as to the ongoing discussions in mathematics education regarding the role/importance of conceptual understanding and how to promote it. The study makes visible some of the ways in which students' post-secondary experiences with mathematics are shaped by their perception of their mathematical preparation, thus providing a basis for discussions of possible curricular change in the Bahamas. It also suggests that issues such as confidence and school/teacher expectations of students may play a role in the development of conceptual understanding.

This book is a straightforward, no-nonsense guide to a research method that can be used by educators to increase student learning, student self-esteem, and quality of school life in the classroom. This user-friendly book covers the principles and history of action research, ethical and legal considerations, methods for conducting both formal and informal action research, data collection methods, analysis and interpretation, action planning and initiation, and results evaluation. The author includes numerous examples, strategies, and illustrations that can be applied to elementary and secondary schools as well as university settings.

Ensure complete coverage of the new CSEC English syllabus with focused exam-practice and SBA guidance. - Test understanding with Paper 2 practice focusing on summary writing skills, expository writing, narrative discourse and persuasive discourse, plus practice Paper 1 items throughout. - Help students prepare for SBA with annotated examples and rubrics. - Develop comprehension skills with a genre-based approach. - Support students of all abilities with an incremental approach that builds writing skills through practice exercises.

Offers advice on applying the principles the author has used in building winning basketball teams to achieving success in business and as an individual

Business Information Systems and Technology 4.0

It can be a challenge to analyze information in ways that compares and contrasts, justifies a stand, supports and defends an argument, or creates a new product, outcome or point of view.

Coursework is an avenue to question, test, evaluate, and formulate. It is also an opportunity to innovate. Applying project management skills to your coursework, helps you to flesh out concepts and crystallize these ideas in ways that promote broad thinking. This helps to give your coursework the edge making it a cut above the rest. Who Should Read This Book

Project Management Skills for Coursework is intended to captivate the interest of persons who are:

- writing BGCSE coursework for various subjects (particularly business subjects)
- conducting and writing research papers
- new to the field of project management
- required to execute projects in accordance with a project plan
- aspiring to roles with increasing responsibilities that include project management
- focusing on real world practical application of project management
- increasing their breadth and depth of project management knowledge

The book is a cutting-edge contribution to the debate which has occurred for some time on the pros and cons of secondary education becoming more closely and explicitly related to preparing young people for the world of work. The book provides concrete examples of the vocationalisation of secondary education, with particular reference to the situation in Africa.

The target audience for the book includes policy-makers, practitioners, administrators, education planners, researchers, teachers and teacher educators with a concern about the relationship between secondary education and education for the world of work (with particular reference to technical and vocational education and training - TVET.) The book appears in the Springer book series on 'Technical and Vocational Education and Training: Issues, Concerns and Prospects' and compliments the 'International Handbook of Technical and Vocational Education and Training' and other publications in the 'International Library of TVET' all of which are publications of the 'UNESCO-UNEVOC International Centre for TVET' in Bonn, Germany

This edition of our successful series to support the Cambridge IGCSE Biology syllabus (0610) is fully updated for the revised syllabus for first examination from 2016. Written by an

experienced teacher and examiner, Cambridge IGCSE Biology Coursebook with CD-ROM gives comprehensive and accessible coverage of the syllabus content. Suggestions for practical activities are included, designed to help develop the required experimental skills, with full guidance included on the CD-ROM. Study tips throughout the text, exam-style questions at the end of each chapter and a host of revision and practice material on the CD-ROM are designed to help students prepare for their examinations. Answers to the exam-style questions in the Coursebook are provided on the CD-ROM.

David Constantine's second book shows a remarkable development in the range and power of his poetry. After establishing his reputation with the quiet but resonant poems of *A Brightness to Cast Shadows* (1980), Constantine has gone on to achieve a classical mastery of form and to further develop a highly individual voice, which now has an almost visionary edge. In the poems and related Greek translations of *Watching for Dolphins* David Constantine recreates a complete imaginative world. Mythical and biblical figures - Christ, Lazarus, Aphrodite and Persephone - appear as opposing forces of Christian compassion and classical excellence. Contrasts and contradictions are at the heart of Constantine's poetic world. The possibility of personal happiness is insisted upon: any wider optimism would be out of place.

Namibia National Conference on the Implementation of the Language Policy for Schools

A Workbook for Senior High School Mathematics Students

Nelson Modular Science

The Craft of Poetry

The Power of Tests

A Critical Perspective on the Uses of Language Tests

Teaching Mathematics is nothing less than a mathematical manifesto. Arising in response to a limited National Curriculum, and engaged with secondary schooling for those aged 11–14 (Key Stage 3) in particular, this handbook for teachers will help them broaden and enrich their students' mathematical education. It avoids specifying how to teach, and focuses instead on the central principles and concepts that need to be borne in mind by all teachers and textbook authors—but which are little appreciated in the UK at present. This study is aimed at anyone who would like to think more deeply about the discipline of 'elementary mathematics', in England and Wales and anywhere else. By analysing and supplementing the current curriculum, *Teaching Mathematics* provides food for thought for all those involved in school mathematics, whether as aspiring teachers or as experienced professionals. It challenges us all to reflect upon what it is that makes secondary school mathematics educationally, culturally, and socially important.

Language in Social Life is a major series which highlights the importance of language to an understanding of issues of social and professional concern. It will be of practical relevance to all those wanting to understand how the ways we communicate both influence and are influenced by the structures and forces of contemporary social institutions. In all modern

societies individuals are subject to tests, whether to enter educational programs, to pass from one level to the next or to grant certificates to practice. Yet, tests are powerful tools which are often introduced in undemocratic and unethical ways as disciplinary tools for carrying out various policy agendas. Tests can be detrimental to people's lives as they are capable of affecting and defining the knowledge and behaviour of those who are being tested. The Power of Tests applies a critical perspective of language tests by examining their uses and consequences in education and society and by viewing tests not as isolated events but rather as embedded in social, educational and political contexts. The book is divided into four parts: the first part establishes the power of tests through echoing the voices of test takers, describing the features of the power of tests, and the temptations that tests offer to bureaucrats who use them for power and control. The second part reports on studies that provide empirical evidence about intentions and effects of a number of large scale language tests. The third part interprets the results by examining their consequences on education and society, arriving at a model of tests' use. The final section of the book offers strategies for controlling and minimising the misuses of tests by introducing the notion of Critical Language Testing which calls for the examination of the consequences and misuses of tests, monitoring of power and pointing to their unethical uses. It also provides a comprehensive discussion of the responsibilities of language testers, including a new Code of Ethics, as well as strategies for guarding and protecting the rights of test takers.

This highly respected and valued textbook has been the book of choice for Cambridge IGCSE students since its publication. This second edition, complete with CD-ROM, continues to provide comprehensive, up-to-date coverage of the core and extended curriculum topics specified in the Cambridge IGCSE Biology syllabus. The book is supported by a CD-ROM containing extensive revision and exam practice questions, background information and reference material.

Practicing Mathematics for BGCSE Success was designed specifically for seniors sitting the Mathematics BGCSE examination. This book is the first of 3 resources used in preparation for the exam. It provides practice questions typically found on paper 1 of the examination. The concept of 'practicing' helps students to become more familiar with the topics covered, and hence it is believed that it leads to better success in the exam. Students are highly encouraged to purchase books 1,2 and 3 for maximum results. This series is authored by Mrs. Paula Burrows, a Mathematics teacher employed by the Ministry of Education in the Bahamas for the past 20 years.
