***Starting a business might sound easy, but sustaining it to be successful is challenging. People are often afraid to start new businesses because at least everyone has known someone who started a business but failed or someone struggling to sustain a business. Starting your own business and staying successful is the most exciting achievement. This book Strategies to Sustain Small Businesses Beyond 5 Years is used worldwide to help aspiring or struggling business owners succeed. The book is for anyone interested in doing business. aEURC/ You might be a passionate creator, starting your business out of love for what you do and believing that passion is a crucial quality of success; running your business gives you a sense of accomplishment and pride. aEURC/ You might be a freedom seeker, starting your small business; you value the ability to control your work experience and want to be in charge of your own schedules, career path, and work environment. aEURC/ You might be a legacy builder, starting a business to bring something new to the marketplace, practical in your approach to business ownership. aEURC/ You might be a struggling survivor profile representing the cold, hard truth of business ownership. aEURC/ You might be a Jack of all trades in your business, spreading too thin from managing directive, sales administrative duties to customer service. This book is the path to success in your business. Sometimes running a small business is more frightening than rewarding, and the fear is real, deeply rooted in you facing the challenges of ownership every day. The motivation of a small business owner is as diverse as the business itself. ItaEUR(tm)s***

In this accessible and informative step-by-step guide, early years consultant Debbie Garvey provides leaders and managers with best practice tips and advice for developing their performance management skills in early years settings. Drawing on current research and the author's wealth of experience in the field, each chapter sets out effective performance management techniques that leaders can apply to their workplaces, on topics such as staff development, recruitment, appraisals, conflict management, feedback and evaluation, mentoring and coaching and health and wellbeing. Grounded in an understanding of neuroscience and brain development, this practical book provides advice on how to ensure a safe and motivational environment for both

children and staff to develop, whatever their needs. Designed to support new and existing managers, the book includes reflective exercises, key theories and case studies to enable leaders to develop a style suited to their team and setting, ensuring children are given the best possible support during their first and most crucial development stage.

This expert reference provides a broad, comprehensive review of the major domains of sexual offending. Beginning with an integrated etiological model of sexual offending, chapters follow addressing the primary predisposing conditions related to sexual offending (e.g. pedophilic, hebephilic, paraphilic rape and non-contact paraphilic disorders, hyper sexuality and personality factors). In addition, special subgroups of sexual offenders (females, youth and the intellectually disable) are considered. Both broad and specific perspectives on the assessment of sexual offenders are provided. Overviews are offered of clinical and forensic evaluations of such offenders and the utility of structured psychological assessment. A novel conceptual model of risk assessment is proposed. More specifically, each of the primary approaches or instruments related to risk assessment of sexual offending are addressed: the Static risk assessment measures, the Sex Offender Risk Appraisal Guide, structured professional judgment, and the varied measures of dynamic or criminogenic needs assessment. Finally, multiple aspects of management of sexual offenders are discussed including models of psychosocial treatment, the question of the effectiveness of such treatment, biological interventions, civil commitment, circles of support, and the containment approach to community

management. Chapters are authored by both prominent experts and experienced professionals for a breadth of perspective. Among the topics covered: Pedophilic, Hebephilic, Rape Paraphilic Disorders and the variety of Non Contact sexual offending conditions Personality, related conditions, & their association with sexual offending: motivators and disinhibition in context. Disorders of hyper sexuality. Assessments of sexual offenders, including the role of psychological testing, clinical & interview approaches, as well as forensic evaluations Conceptual models of risk assessment & discussion of specific static, dynamic & structured clinical risk assessment approaches Models of & reviews of treatment outcome with sexual offenders, including psychotherapy, psychopharmacology and castration, the containment approach, civil commitment & circles of support Overview of public policy issues & an evidence-based perspective on sex offender registration and residential restrictions. This breadth of material in Sexual Offenders will help practitioners gain multiple levels of clinical insight as well as giving them up-to-date practical tools and techniques for working with this problematic class of individuals. Award-winning author Tara L. Kuther presents Lifespan Development in Context, a topically organized version of her bestselling Lifespan Development text that provides a panoramic view of the many influences that shape human development. Kuther's student-friendly narrative illustrates how the places, sociocultural environments, and ways in which we are raised influence who we become and how we grow and change throughout our lives. Three core themes resonate throughout each chapter: the

centrality of context, the importance of research, and the value of applied developmental science.

Foundational theories and classic studies are combined with contemporary research and culturally diverse perspectives for a modern introduction to the field that is both comprehensive and concise. Visual overviews, case studies, and critical thinking questions encourage self-reflection and class discussion, ensuring students have the tools they need to apply course concepts to their lives and future careers.

*Despite the strong safety record of the national airspace system, serious disruptions occasionally occur, often as a result of outdated or failed equipment. Under these circumstances, safety relies on the skills of the controllers and pilots and on reducing the number of aircraft in the air. The current and growing pressures to increase the capacity to handle a greater number of flights has led to a call for faster and more powerful equipment and for equipment that can take over some of the tasks now being performed by humans. Increasing the role of automation in air traffic control may provide a more efficient system, but will human*

*controllers be able to effectively take over when problems occur? This comprehensive volume provides a baseline of knowledge about the capabilities and limitations of humans relative to the variety of functions performed in air traffic control. It focuses on balancing safety with the expeditious flow of air traffic, identifying lessons from past air accidents. The book discusses The function of the national airspace system and the procedures for hiring, training, and evaluating controllers. Decisionmaking, memory, alertness, vigilance, sleep patterns during shift work, communication, and other factors in controllers' performance. Research on automation and human factors in air traffic control and incorporation of findings into the system. The Federal Aviation Administration's management of the air traffic control system and its dual mandate to promote safety and the development of air commerce. This book also offers recommendations for evaluation the human role in automated air traffic control systems and for managing the introduction of automation into current facilities and operations. It will be of interest to anyone concerned about air safety--policymakers, regulators, air traffic managers and controllers, airline officials, and passenger advocates.
