In *Black Man Emerging*, prominent psychologists Joseph L. White and James H. Cones III reflect on the fate and state of America's Black men. Using numerous case histories, biographical sketches, and their own personal points of view, the authors explore the challenges faced by Black men - in claiming their sense of identity and coping with racism, for example - as well as their potential sources of strength, such as family, community, and the guidance of firm and steady authority figures. They consider how society has adopted the ways and ideas of Black men, as well as how society has influenced their development and daily lives. In addition, the authors suggest strategies for succeeding under the specter of racism and offer advice to society on moving toward acceptance.

A comprehensive, readable analysis of the key issues of the Black Lives Matter movement, this thought-provoking and compelling anthology features essays by some of the nation's most influential and respected criminal justice experts and legal scholars. "Somewhere among the anger, mourning and malice that *Policing the Black Man* documents lies the pursuit of justice. This powerful book demands our fierce attention." –Toni Morrison *Policing the Black Man* explores and critiques the many ways the criminal justice system impacts the lives of African American boys and men at every stage of the criminal process, from arrest through sentencing. Essays range from an explication of the historical roots of racism in the criminal justice system to an examination of modern-day police killings of unarmed black men. The contributors discuss and explain racial profiling, the power and discretion of police and prosecutors, the role of implicit bias, the racial impact of police and prosecutorial decisions, the disproportionate imprisonment of black men, the collateral consequences of mass incarceration, and the Supreme Court's failure to provide meaningful remedies for the injustices in the criminal justice system. *Policing the Black Man* is an enlightening must-read for anyone interested in the critical issues of race and justice in America.

This book is a culturally situated study of the experiences and perspective garnered from a group of post-secondary Black African American, bi-multi-racial male students aged 19-37. The undergirding interest was to see if there was an awareness of the group's manly inclinations, tendencies and predispositions and understand how such awareness projects and influences their quest and discipline for learning and to academically achieve. The sociological construct of "habitus", as conveyor of dispositions, inclinations, and tendencies, provides an analytical framework permitting an appreciation of interactions between personal identity, social belonging and approaches to learning and education. The result is an original and powerful account of the ways in which unspoken dominant mainstream intergroup cultural relationships, involving social-political attitudes, decision making, and behavioral reactions and responses, interact with internalized self-in-group or in ascription with group, oppression, repression, intellectual-cognitive-physical strategies, determination, and work, that have brought men of Black African American, bi-multi-racial descent, in the U.S., to their current social position. Unlike some public discourse in U.S. society, this is not a blame game, nor is it one of relinquishing self or group responsibility, but one based upon and motivated by a deeper understanding of complex facts. The prose can be best described as an ethnographical narrative, synthesizing a wealth of original observations with insights from scholarly and popular literature and media. Its original and engaging style may appeal to a broad audience including postsecondary educators and students, researchers studying the sociology of gender, African American identity, intercultural relational communications, student services, social work, and social psychology as well as mental and physical healthcare practitioners.

A new collection of short fiction from the Edgar Award-winning author of *Devil in a Blue Dress* and *Trouble is What I Do*. With his extraordinary fiction and gripping television writing, Walter Mosley has proven himself a master of narrative tension. *The Awkward Black Man* collects seventeen of Mosley's most accomplished short stories to showcase the full range of his remarkable talent.

Touching, contemplative, and always surprising, these stories introduce an array of imperfect characters—awkward, self-defeating, elf-involved, or just plain odd. In *The Awkward Black Man*, Mosley overturns the stereotypes that corral black male characters and paints subtle, powerful portraits of unique individuals. In "The Good News Is," a man's insecurity about his weight gives way to illness and a loneliness so intense that he'd do anything for a little human comfort. "Pet Fly," previously published in the *New Yorker*, follows a man working as a mailroom clerk—a solitary job for which he is overqualified—and the unforeseen repercussions he endures when he attempts to forge a new connection. And "Almost Alyce" chronicles failed loves, family loss, alcoholism, and a Zen approach to the art of begging that proves surprisingly effective.

"This is a book of stories," writes Henry Louis Gates, "and all might be described as 'narratives of ascent.'" As some remarkable men talk about their lives, many perspectives on race and gender emerge. For the notion of the unitary black man, Gates argues, is as imaginary as the creature that the poet Wallace Stevens conjured in his poem "Thirteen Ways of Looking at a Blackbird." James Baldwin, Colin Powell, Harry Belafonte, Bill T. Jones, Louis Farrakhan, Anatole Broyard, Albert Murray -- all these men came from modest circumstances and all achieved preeminence. They are people, Gates writes, "who have shaped the world as much as they were shaped by it, who gave as good as they got." Three are writers -- James Baldwin, who was once regarded as the intellectual spokesman for the black community; Anatole Broyard, who chose to hide his black heritage so as to be seen as a writer on his own terms; and Albert Murray, who rose to the pinnacle of literary criticism. There is the general-turned-political-figure Colin Powell, who discusses his interactions with three United States presidents; there is Harry Belafonte, the entertainer whose career has been distinct from his fervent activism; there is Bill T. Jones, dancer and choreographer, whose fierce courage and creativity have continued in the shadow of AIDS; and there is Louis Farrakhan, the controversial religious leader. These men and others speak of

their lives with candor and intimacy, and what emerges from this portfolio of influential men is a strikingly varied and profound set of ideas about what it means to be a black man in America today.

INSTANT NEW YORK TIMES BESTSELLER An urgent primer on race and racism, from the host of the viral hit video series “ Uncomfortable Conversations with a Black Man ” “ You cannot fix a problem you do not know you have. ” So begins Emmanuel Acho in his essential guide to the truths Americans need to know to address the systemic racism that has recently electrified protests in all fifty states. “ There is a fix, ” Acho says. “ But in order to access it, we ’ re going to have to have some uncomfortable conversations. ” In Uncomfortable Conversations With a Black Man, Acho takes on all the questions, large and small, insensitive and taboo, many white Americans are afraid to ask—yet which all Americans need the answers to, now more than ever. With the same open-hearted generosity that has made his video series a phenomenon, Acho explains the vital core of such fraught concepts as white privilege, cultural appropriation, and “ reverse racism. ” In his own words, he provides a space of compassion and understanding in a discussion that can lack both. He asks only for the reader ’ s curiosity—but along the way, he will galvanize all of us to join the antiracist fight.

*From Panthers to Promise Keepers draws on intimate observations of the men and networks who were involved in what some have called Othe menOs movementO and tells us why these networks mattered. Focusing on the decades between 1950 and 2000, it argues that while public, structural change is necessary for gender equality, getting men involved in efforts at social justice may well depend on their making changes with respect to feelings and with respect to their unconscious fears and anxieties as well.*

*Using the slave narratives of Henry Bibb and Frederick Douglass, as well as the work of W. E. B. Du Bois, James Baldwin, Walter Mosley, and Barack Obama, Ronda C. Henry Anthony examines how women’s bodies are used in African American literature to fund the production of black masculine ideality and power. In tracing representations of ideal*

*black masculinities and femininities, Henry Anthony shows how black men's struggles for gendered agency are inextricably bound up with their complicated relation to white men and normative masculinity. The historical context in which Henry Anthony couches these struggles highlights the extent to which shifting socioeconomic circumstances dictate the ideological, cultural, and emotional terms upon which black men conceptualize identity. Yet, Henry Anthony quickly moves to texts that challenge traditional constructions of black masculinity. In these texts Henry Anthony traces how the emergence of collaboratively-gendered discourses, or a blending of black female/male feminist consciousnesses, are reshaping black masculinities, femininities, and intraracial relations for a new century.*

*The fatherless black family is a problem that grows to bigger proportions every year as generations of black children grow up without an adult male in their homes. As this dire pattern grows worse, what can men do who hope to break it, when there are so few models and so little guidance in their own homes and communities? Where can they learn to "become Dad?" When Pulitzer Prize-winning columnist Pitts—who himself grew up with an abusive father whose absences came as a relief—interviewed dozens of men across the country, he found both discouragement and hope, as well as deep insights into his own roles as son and father. An unflinching investigation, both personal and journalistic, of black fatherhood in America, this is the best, most pivotal book on this profoundly important issue.*

*Fifty-one essays by writers such as Langston Hughes, W.E.B. Du Bois, Ralph Ellison, and Zora Neale Hurston, as well as critics and academics such as Henry Louis Gates, Jr. examine the central texts and arguments in African American literary theory from the 1920s through the present. Contributions are organized chronologically beginning with the rise of a black aesthetic criticism, through the Black Arts Movement, feminism, structuralism and poststructuralism, queer theory, and cultural studies. A searing memoir of American racism from a Somalian-American who survived hardships in his birth country only to experience firsthand the dehumanization of Blacks in his adopted land, the United States. "No one told me about America." Born in Somalia and raised in a valley among nomads, Boyah Farah grew up with a code of male bravado that helped him survive deprivation, disease, and civil war. Arriving in America, he believed that the code that had saved him would help him succeed in this new country. But instead of safety and freedom, Boyah found systemic racism, police brutality, and intense prejudice in all areas of life, including the workplace. He learned firsthand not only what it meant to be an African in America, but what it means to be African American. The code of masculinity that shaped generations of men in his family could not prepare Farah for the painful realities of life in the United States. Lyrical yet unsparing, *America Made Me a Black Man* is the first book-length examination of American racism from an African outsider's perspective. With a singular poetic voice brimming with imagery, Boyah challenges us to face difficult truths about the destructive forces that threaten Black lives and attempts to heal a fracture in Black men's identity.

**Until now, most works on the history of African Americans in advertising have focused on the depiction of blacks in advertisements. As the first comprehensive examination of African American participation in the industry, Madison Avenue and the Color Line breaks new ground by examining the history of black advertising employees and agency owners. For much of the twentieth century, even as advertisers chased African American consumer dollars, the doors to most advertising agencies were firmly closed to African American professionals. Over time, black participation in the industry resulted from the combined efforts of black media, civil rights groups, black consumers, government organizations, and black advertising and marketing professionals working outside white agencies. Blacks positioned themselves for jobs within the advertising industry, especially as experts on the black consumer market, and then used their status to alter stereotypical perceptions of black consumers. By doing so, they became part of the broader effort to build an African American professional and entrepreneurial class and to challenge the negative portrayals of blacks in American culture. Using an extensive review of advertising trade journals, government documents, and organizational papers, as well as personal interviews and the advertisements themselves, Jason**

" The crusade for civil rights was a defining episode of 20th century U.S. history, reshaping the constitutional, political, social, and economic life of the nation. This collection of original essays by both European and American scholars includes close analyses of literature and film, historical studies of significant themes and events from the turn-of-the century to the movement years, and assessments of the movement's legacies. Ultimately, the articles help examine the ways civil rights activism, often grounded in the political work of women, has shaped American consciousness and culture until the outset of the 21st century. The New York Times best-selling book exploring the counterproductive reactions white people have when their assumptions about race are challenged, and how these reactions maintain racial inequality. In this "vital, necessary, and beautiful book" (Michael Eric Dyson), antiracist educator Robin DiAngelo deftly illuminates the phenomenon of white fragility and "allows us to understand racism as a practice not restricted to 'bad people' (Claudia Rankine). Referring to the defensive moves that white people make when challenged racially, white fragility is characterized by emotions such as anger, fear, and guilt, and by behaviors including argumentation and silence. These behaviors, in turn, function to reinstate white racial equilibrium and prevent any meaningful cross-racial dialogue. In this in-depth exploration, DiAngelo examines how white fragility develops, how it protects racial inequality, and what we can do to engage more constructively.

Here is the courageous, groundbreaking story of Rosa Parks and Recy Taylor—a story that reinterprets the history of America's civil rights movement in terms of the sexual violence committed against Black women by white men. "An important step to finally facing the terrible legacies of race and gender in this country." —The Washington Post Rosa Parks was often described as a sweet and reticent elderly

woman whose tired feet caused her to defy segregation on Montgomery's city buses, and whose supposedly solitary, spontaneous act sparked the 1955 bus boycott that gave birth to the civil rights movement. The truth of who Rosa Parks was and what really lay beneath the 1955 boycott is far different from anything previously written. In this groundbreaking and important book, Danielle McGuire writes about the rape in 1944 of a twenty-four-year-old mother and sharecropper, Recy Taylor, who strolled toward home after an evening of singing and praying at the Rock Hill Holiness Church in Abbeville, Alabama. Seven white men, armed with knives and shotguns, ordered the young woman into their green Chevrolet, raped her, and left her for dead. The president of the local NAACP branch office sent his best investigator and organizer—Rosa Parks—to Abbeville. In taking on this case, Parks launched a movement that exposed a ritualized history of sexual assault against Black women and added fire to the growing call for change.

Why do we see so little progress in diversifying faculty at America's colleges, universities, and professional schools? This book explores this important question and provides steps for hastening faculty diversity. Drawing on her extensive consultant practice and expertise as well as research and scholarship from several fields, Dr. Moody provides practical and feasible ways to improve faculty recruitment, retention, and mentorship, especially of under-represented women in science-related fields and non-immigrant minorities in all fields. The second edition of Faculty Diversity offers new insights, strategies, and caveats to the current state of faculty diversity. This revised edition includes: New strategies to prevent unintended cognitive bias and errors that damage faculty recruitment and retention Expanded discussion on the importance of different cultural contexts, political, and historical experiences inhabited and inherited by non-immigrant faculty and students Increased testimonials and on-the-ground reflections from faculty, administrators, and leaders in higher education, with new attention to medical and other professional schools Updated Appendix with Discussion Scenarios and Practice Exercises useful to search and evaluation committees, department chairs, deans, faculty senates, and diversity councils Expanded chapter on mentoring that dispels myths about informal mentoring and underlines essential components for formal programs. Moody provides an essential, reliable, and eye-opening guide for colleges, medical, and other professional schools that are frustrated in their efforts to diversify their faculty.

*"When Damon Tweedy first enters the halls of Duke University Medical School on a full scholarship, he envisions a bright future where his segregated, working class background will become largely irrelevant. Instead, he finds that he has joined a new world where race is front and center. When one of his first professors mistakes him for a maintenance worker, it is a moment that crystallizes the challenges he will face throughout his early career. Making matters worse, in lecture after lecture the common refrain for numerous diseases resounds, "More common in blacks than whites." In riveting, honest prose, Black Man in a White Coat examines the complex ways in which both black doctors and patients must navigate the difficult and often contradictory terrain of race and medicine. As Tweedy transforms from student to practicing physician, he discovers how often race influences his encounters with patients. Through their stories, he illustrates the complex social, cultural, and economic factors at the root of most health problems in the black community. These elements take on greater meaning when Tweedy finds himself diagnosed with a chronic disease far more common among black people. In this powerful, moving, and compassionate book, Tweedy deftly explores the challenges confronting black doctors, and the disproportionate health burdens faced by black patients, ultimately seeking a way forward to better treatment and more compassionate care.- For readers of Atul Gawande, Sandeep Jauhar, Pauline W. *Helicopters patrolled low over the city, filming blocks of burning cars and buildings, mobs breaking into storefronts, and the vicious beating of truck driver Reginald Denny. For a week in April 1992, Los Angeles transformed into a cityscape of rage, purportedly due to the exoneration of four policemen who had beaten Rodney King. It should be no surprise that such intense anger erupted from something deeper than a single incident. In The Contested Murder of Latasha Harlins, Brenda Stevenson tells the dramatic story of an earlier trial, a turning point on the road to the 1992 riot. On March 16, 1991, fifteen-year-old Latasha Harlins, an African American who lived locally, entered the Empire Liquor Market at 9172 South Figueroa Street in South Central Los Angeles. Behind the counter was a Korean woman named Soon Ja Du. Latasha walked to the refrigerator cases in the back, took a bottle of orange juice, put it in her backpack, and approached the cash register with two dollar bills in her hand-the price of the juice. Moments later she was face-down on the floor with a bullet hole in the back of her head, shot dead by Du. Joyce Karlin, a Jewish Superior Court judge appointed by Republican Governor Pete Wilson, presided over the resulting manslaughter trial. A jury convicted Du, but Karlin sentenced her only to probation, community service, and a \$500 fine. The author meticulously reconstructs these events and their aftermath, showing how they set the stage for the explosion in 1992. An accomplished historian at UCLA, Stevenson explores the lives of each of these three women-Harlins, Du, and Karlin-*

*and their very different worlds in rich detail. Through the three women, she not only reveals the human reality and social repercussions of this triangular collision, she also provides a deep history of immigration, ethnicity, and gender in modern America. Massively researched, deftly written, The Contested Murder of Latasha Harlins will reshape our understanding of race, ethnicity, gender, and—above all—justice in modern America.*

Most important of all, it has spawned a whole generation of criminal justice reform activists and organizations motivated by Michelle Alexander’s unforgettable argument that “we have not ended racial caste in America; we have merely redesigned it.” As the Birmingham News proclaimed, it is “undoubtedly the most important book published in this century about the U.S.” Now, ten years after it was first published, The New Press is proud to issue a tenth-anniversary edition with a new preface by Michelle Alexander that discusses the impact the book has had and the state of the criminal justice reform movement today.*

With a compassionate eloquence reminiscent of James Baldwin's Letter to My Nephew, Ellis Cose presents a realistic examination of the challenges facing black men in modern America. Black men have never had more opportunity for success than today -- yet, as bestselling author Cose puts it, "We are watching the largest group of black males in history stumbling through life with a ball and chain." Add to that the ravages of AIDS, murder, poverty, illiteracy, and the widening gap separating the black "elite" from the "underclass," and the result is a paralyzing pessimism. But even as Cose acknowledges the obstacles that confront black men, he refuses to accept them as reasons for giving up; instead he rails against the destructive attitude that has made academic achievement a source of shame instead of pride in many black communities -- and outlines steps black males can take to enhance their odds for success. With insightful anecdotes about a broad range of black men from all walks of life, Cose delivers a warning of the vast tragedy that is wasted black potential, and a call to arms that can enable black men to reclaim their destiny in America. This American classic has been corrected from the original manuscripts and indexed, featuring historic photographs and an extensive biographical afterword.

This important volume takes a life course approach in sharing empirical insights on the family experiences of African American males in socioeconomic and political contexts. Representing fields ranging from developmental psychology to public health and sociology to education, chapters identify challenges facing black men and boys in the U.S., as well as family and community sources of support and resilience. Survey findings and exemplar case studies illustrate stressors and risk factors uniquely affecting African American communities, and tailored prevention and intervention strategies are described at the personal, family, and societal levels. These interdisciplinary perspectives not only encourage additional research, but inspire the continued development of appropriate interventions, relevant practice, and equitable policy. Included in the coverage:

- The adjustment and development of African American males: Conceptual frameworks and emerging research opportunities.
- A trauma-informed approach to affirming the humanity of African American boys and supporting healthy transitions to manhood.
- Humanizing developmental science to promote positive development of young men of color.
- Families, prisoner reentry, and reintegration.
- Safe spaces for vulnerability: New perspectives on African Americans who struggle to be good fathers.
- They can't breathe: Why neighborhoods

matter for the health of African American men and boys. Promoting diversity in the research agenda to reflect a diverse population, *Boys and Men in African American Families* is an invaluable reference for research professionals particularly interested in sociology, public policy, anthropology, urban and rural studies, and African American studies. Survey and ethnographic studies of poverty, inequality, family processes, and child, adolescent, and adult health and development are featured.
