

*In Patton at the Battle of the Bulge, Army veteran and historian Leo Barron explores one of the most famous yet little-told clashes of WWII, a vitally important chapter in one of history's most legendary battles. Includes photographs! "Barron captures the fiery general's command presence and the pivotal commitment of his Third Army tanks to relieve the embattled crossroads town of Bastogne."—Michael E. Haskew, Author of West Point 1915: Eisenhower, Bradley, and the Class the Stars Fell On December 1944. For the besieged American defenders of Bastogne, time was running out. Hitler's forces had pressed in on the small Belgian town in a desperate offensive designed to push back the Allies. The U.S. soldiers had managed to repel repeated attacks, but as their ammunition dwindled, the weary paratroopers of the 101st Airborne could only hope for a miracle. More than a hundred miles away, General George S. Patton was putting in motion the most crucial charge of his career. Tapped to spearhead the counterstrike was the 4th Armored Division, a hard-fighting unit that had slogged its way across France. But blazing a trail into Belgium meant going up against some of the best infantry and tank units in the German Army. And failure to reach Bastogne in time could result in the overrunning of the 101st and turn the tide of the war against the Allies.*

Although war memoirs constitute a rich, varied literary form, they are often dismissed by historians as unreliable. This collection of essays is one of the first to explore the modern war memoir, revealing the genre's surprising capacity for breadth and sophistication while remaining sensitive to the challenges it poses for scholars. Covering conflicts from the Napoleonic era to today, the studies gathered here consider how memoirs have been used to transmit particular views of war even as they have emerged within specific social and political contexts.

Out of the Crucible: How the U.S. Military Transformed Combat Casualty Care in Iraq and Afghanistan edited by Arthur L. Kellermann, MD and MPH, and Eric Elster, MD is now available by the US Army, Borden Institute. This comprehensive resource, part of the renowned Textbooks of Military Medicine series, documents one of the most extraordinary achievements in the history of American medicine - the dramatic advances in combat casualty care developed during Operations Enduring Freedom and Operation Iraqi Freedom. Each chapter is written by one or more military health professionals who played an important role in bringing the advancement to America's military health system. Written in plain English and amply illustrated with informative figures and photographs, Out of the Crucible engages and informs the American public and policy makers about how America's military health system, devised, tested and widely adopted numerous inventions, innovations, technologies that collectively produced the highest survival rate from battlefield trauma in the history of warfare.

Dead Men Risen, winner of the prestigious Orwell Prize for Books, is the epic story of a beleaguered British battle group fighting desperately to prevent the Taliban from seizing Afghanistan's Helmand province just as the U.S. Marines arrive to take over. Bestselling author Toby Harnden describes how men from the coal mining valleys and slate quarry villages of Wales found themselves in the most intense combat faced by British troops for a generation. Underequipped and overstretched, the fighting prowess of the Welsh Guards in the killing fields of Sangin and Nawa awed the U.S. Marines. NATO commander General Stanley McChrystal, who was awaiting a response to his urgent request to President Barack Obama for more troops, hailed their "burn-in-your-gut passion." Harnden was on the ground with the Welsh Guards in Helmand in 2009. He gained access to a trove of secret military documents and conducted nearly three hundred interviews in Afghanistan, England, Wales, and the United States to produce this timeless and profound account of men at war. Commanding the Welsh Guards was Lieutenant Colonel Rupert Thorneloe, a passionate believer in the justice of the war who was dismayed by the military and political incompetence surrounding it. In chilling detail, Harnden reveals how and why Thorneloe—the first British battalion commander to die in action since the 1982 Falklands War—was killed by an IED during Operation Panther's Claw. By the time the fighting was over, almost no rank had been spared. From the searing heat of the poppy fields and the mad compounds of Helmand to the dreaded knock on the door back home, the reader is transported there. Harnden weaves the experiences of the soldiers, their historical forbears and the flawed NATO strategy into a masterly narrative. No other book about modern conflict succeeds on so many levels. Dead Men Risen is essential for anyone who wants to understand the reality of the Afghan war for the U.S and its allies.
