Discover the solar system from the comfort of the classroom! Students will learn elementary concepts about the eight planets and Pluto, their orbits, and more! Use the background material to start the discussion, and use the activities, worksheets, questions, and answers to encourage further exploration.

This book presents a program of basic studies dealing with the science of oceanography. Various characteristics of the oceans are described, including features of the oceans, life within the oceans, and different ways of studying the oceans. Each of the twelve teaching units in this book is introduced by a color transparency (print books) or PowerPoint slide (eBooks) that emphasizes the basic concept of the unit and presents questions for discussion. Reproducible student pages provide reinforcement and follow-up activities. The teaching guide offers descriptions of the basic concepts to be presented, background information, suggestions for enrichment activities, and a complete answer key.

This word puzzle packet is an exciting way to enrich students' vocabularies while teaching them the important skill of reading and following directions. The activities offer a challenging way to sharpen reasoning skills, stimulate vocabulary, and reinforce spelling skills. The variety of puzzle formats and subject matter provide engaging activities that complement core and extended curriculum materials. Codes, mazes, riddles, rhymes, rebuses, word searches, crossword puzzles, and matching activities are just a few of the formats presented. Answer key is included.

Learn at home with exciting products for all school subjects. New.

Milliken's Complete Book of Instant Activities - Grade 4

Milliken's Essential English series for grades 1-8 is designed to enable students to use the English language in both written and oral communications effectively and with ease and confidence. Grade 6 includes 55 pages with a variety of activities including lessons on abstract and concrete nouns, verb of action and being, adverbs of place and manner, exclamatory and interrogatory sentences, dictionary skills, using the Thesaurus, bibliography writing, outlines, poetry, using the Encyclopedia, and more. Answer keys are included. This book presents a program of basic studies dealing with the anatomy and physiology of the human body. Each body system is detailed and major organs and their functions are described. Each of the twelve teaching units in this book is introduced by a color transparency (print books) or PowerPoint slide (eBooks) that emphasizes the basic concept of the unit and presents questions for discussion. Reproducible student pages provide reinforcement and follow-up activities. The teaching guide offers descriptions of the basic concepts to be presented, background information, suggestions for enrichment activities, and a complete answer key.

The information and activities in this resource book enhance the child's knowledge and awareness of the many parts of the body responsible for human growth, health, and life-sustaining activities. The book is organized into three parts: the outside of the body, the inside of the body, and caring for the body. Children will learn about the functions of major organs and systems of the body. They will explore ways in which the sense organs help them learn about their surroundings. They will become aware of how the body protects itself and how it expresses emotion through gestures, tears, and laughter. And they will learn about how they can maintain and protect their body through proper nutrition, exercise, rest, hygiene, and safety. Four transparencies (print books) or PowerPoint slides (eBooks) are

included to engage students in discussion and reinforce the concepts presented in the book.

Covers the period from the dark prehistory of the Paleolithic Age to the development of the earliest centers of civilization in Egypt, Mesopotamia and the Indus Valley.
