Textbooks are indispensable components and in some case the cornerstones of the mission of

English Language Teaching (ELT). However, they are artefacts of a pedagogical culture that rarely echo the concerns of their most prolific consumers: teachers and students. This book offers a useful framework for evaluating ELT textbooks from a critical discourse perspective; one that is based on sound current research but also offers practical guidance to teachers. Building from a foundational understanding of ELT textbooks, the author presents a systematic procedure to critically analyze their multimodal discourse, examine how those discourses are negotiated between teachers and students in class, and measure how

those consumers privately value the lessons. The book provides teachers with the tools they need to select and adapt materials based on critical multimodal discourse analysis, where not only the text but the pictures, websites, audio, visual elements too are subjected to a process which can reveal underlying ideologies, assumptions, omissions and reifications. The triangulated approach, demonstrated in a series of vignettes featuring Korean university students and native-English-speaking instructors, can inform textbook choice, instigate change, and inspire lesson re-contextualization to best suit the

The “strikingly original” debut novel by the masterful British author is “a perfect adventure” of love and smuggling on the English coast (The Nation). Francis Andrews is a reluctant smuggler

living in the shadow of his brutish father's legacy. To exorcise the ghosts of the man he loathes, Andrews betrays his colleagues to authorities and takes flight across the downs. It's here that he stumbles upon the isolated cottage of a beguiling stranger named Elizabeth—an empathetic young woman who is just as lonely, every bit the outsider as he, and reconciling a troubling past of her own. Andrews, a man on the

run from those he exposed, believes he's found refuge and salvation. But when Elizabeth encourages him to return to the courts of Lewes and give evidence against his accomplices, the treacherous and deadly repercussions may be beyond their control. "The ultimate strengths of [Graham] Greene's books is that he shows us the hazards of compassion," a theme that would find its earliest expression in

An inside look at America's most controversial charter schools, and the moral and political questions around public education and school choice. The promise of public education is excellence for all. But that promise has seldom been kept for low-income children of color in America. In *How the Other Half Learns*, teacher and education

journalist Robert Pondiscio focuses on Success Academy, the network of controversial charter schools in New York City founded by Eva Moskowitz, who has created something unprecedented in American education: a way for large numbers of engaged and ambitious low-income families of color to get an education for their children that equals and even exceeds what wealthy families take for granted. Her results

File Type PDF Book Top Notch 2 Teacher Second Edition

are astonishing, her methods unorthodox. Decades of well-intended efforts to improve our schools and close the "achievement gap" have set equity and excellence at war with each other: If you are wealthy, with the means to pay private school tuition or move to an affluent community, you can get your child into an excellent school. But if you are poor and black or brown, you have to settle for "equity" and a lecture--about

fairness. About the need to be patient. And about how school choice for you only damages public schools for everyone else. Thousands of parents have chosen Success Academy, and thousands more sit on waiting lists to get in. But Moskowitz herself admits Success Academy "is not for everyone," and this raises uncomfortable questions we'd rather not ask, let alone answer: What if the price of giving a first-rate education to

children least likely to receive it means acknowledging that you can't do it for everyone? What if some problems are just too hard for schools alone to solve?
