This book explores the prejudice against slave descendants in highland Madagascar and its persistence more than a century after the official abolition of slavery. ‘Unclean people’ is a widespread expression in the southern highlands of Madagascar, and refers to people of alleged slave descent who are discriminated against on a daily basis and in a variety of ways. Denis Regnier shows that prejudice is rooted in a strong case of psychological essentialism: free descendants think that ‘slaves’ have a ‘dirty’ essence that is impossible to cleanse. Regnier’s field experiments question the widely accepted idea that the social stigma against slavery is a legacy of pre-colonial society. He argues, to the contrary, that the essentialist construal of ‘slaves’ is the outcome of the historical process triggered by the colonial abolition of slavery: whereas in pre-abolition times slaves could be cleansed through ritual means, the abolition of slavery meant that slaves were transformed only superficially into free persons, while their inner essence remained unchanged and became progressively constructed as ‘forever unchangeable’. Based on detailed fieldwork, this volume will be of interest to scholars of anthropology, African studies, development studies, cultural psychology, and those looking at the legacy of slavery.

"This concise, student-friendly, current introduction to cultural anthropology carefully balances coverage of core topics and contemporary changes in the field. Mirror for Humanity is a perfect match for cultural anthropology courses that use readings or ethnographies along with a main text." --Amazon.

A leading name in anthropology, Conrad Philip Kottak continues to define student learning in the general anthropology course. Anthropology: Appreciating Human Diversity offers an up-to-date holistic introduction to general anthropology from the four-field perspective. Key themes of appreciating the experiences students bring to the classroom, appreciating human diversity, and appreciating the field of anthropology are showcased throughout the text. Focusing on an increasingly interconnected world, the new Focus on Globalization essays examine topics as diverse as tourism in the ancient and modern worlds, global disease pandemics, world events (including the Olympics and the World Cup), and the expansion of international finance and branding. Connect is the only integrated learning system that empowers students by continuously adapting to deliver precisely what they need, when they need it, and how they need it, so that your class time is more engaging and effective.

The book uses anthropological methods and insights to study the practice of anthropology. It calls for a paradigm shift, away from the publication treadmill, toward a more profile-raising paradigm that focuses on addressing a broad array of social concerns in meaningful ways. The new edition of Kottak’s best selling text continues to offer a holistic introduction to anthropology that approaches the course from a four-field perspective. To emphasize anthropology’s integrated and comparative nature, Bringing It All Together essays show how anthropology’s sub-fields and dimensions combine to interpret and explain a common topic. Another distinctive feature, Understanding Ourselves, illustrates the relevance of anthropological facts and theories to students’ everyday lives. In addition, every new copy of the eleventh edition is packaged free with a new student CD-ROM as well as PowerWeb

The new tenth edition of Kottak’s best selling text for cultural anthropology continues to offer a holistic introduction to cultural anthropology that approaches the course from a four-field perspective. The new, tenth edition is a major revision offering many new and exciting features that build on the strengths of this approach. The text has two new themes -"Bringing It All Together" and "Understanding Ourselves." The "Bringing it All Together" theme, emphasizing anthropology’s integrated, comparative and four-field nature, can be found in new "Bringing it All Together" essays that show how anthropology’s subfields and dimensions combine to interpret and explain a common topic.

THE ESSENCE OF ANTHROPOLOGY features an experienced and diverse author team with expertise in all subfields of anthropology. With an eye to visual and written clarity, the authors present anthropology from an integrated, holistic perspective. They use three unifying themes as a framework to tie the book together and keep students focused: systemic adaptation to emphasize that every culture, past and present, is an integrated and dynamic system of adaptation; biocultural connections that highlight the integration of human culture and biology in the steps humans take to meet the challenges of survival; and the emergence of globalization and its disparate impact on peoples and cultures around the world. Pedagogical elements support these main themes and give deeper insight into the meaning and relevance of a wide range of topics covered in the general narrative by tying examples to behavior today. Insightful questions foster critical thinking, additional Visual Counterpoints widen the book’s array of compare-and-contrast examples, and a new Digging into Anthropology feature provides a hands-on approach to anthropological methods by giving active learning opportunities related to each chapter’s content. In addition, the authors have broadened viewpoints to offer explanations and examples from different points of view. "A vitally important contribution to anthropology. . . . Most importantly, although the critique is sharply directed, the tone of the volume is constructive rather than destructive—or deconstructive."—Joan Vincent, Barnard College "A rich, thought-provoking, and highly original collection. . . . The research presented is new and the perspectives original. This collection of essays casts significant new light on phenomena and practices which have long been central to anthropology, while at the same time introducing new substantive materials."—Don Brenneis, University of California, Santa Cruz

On Being Different provides an up-to-date, comprehensive, and interdisciplinary account of diversity and multiculturalism in the United States and Canada. Kottak and Kozaitis clarify essential issues, themes, and topics in the study of diversity, including ethnicity, religion, gender, and sexual orientation. The book also presents an original theory of multiculturalism, showing how human agency and culture work to organize and change society. The authors use rich and varied ethnographic examples, from North America and abroad, to help students apply the material to their own lives, and thus gain a better understanding of diversity and multiculturalism.

In Writing Anthropology, fifty-two anthropologists reflect on scholarly writing as both craft and commitment. These short essays cover a wide range of territory, from ethnography, genre, and the politics of writing to affect, storytelling, authorship, and scholarly responsibility. Anthropological writing is more than just communicating findings: anthropologists write to tell stories that matter, to be accountable to the communities in which they do their research, and to share new insights about the world in ways that might change it for the better. The contributors offer insights into the beauty and the function of language and the joys and pains of writing while giving encouragement to stay at it—to keep writing as the most important way to not only improve one’s writing but to also honor the stories and lessons learned through research. Throughout, they share new thoughts, prompts, and agitations for writing that will stimulate conversations that cut across the humanities. Contributors. In his gripping and provocative debut, anthropologist Jason De León sheds light on one of the most pressing political issues of our time—the human consequences of US immigration policy. The Land of Open Graves reveals the suffering and deaths that occur daily in the Sonoran Desert of Arizona as thousands of undocumented migrants attempt to cross the border from Mexico into the United States. Drawing on the four major fields of anthropology, De León uses an innovative combination of ethnography, archaeology, linguistics, and forensic science to produce a scathing critique of “Prevention through Deterrence,” the federal border enforcement policy that encourages migrants to cross in areas characterized by extreme environmental conditions and high risk of death. For two decades, this policy has failed to deter border crossers while successfully turning the rugged terrain of southern Arizona into a killing field. In harrowing detail, De León chronicles the journeys of people who have made dozens of attempts to cross the border and uncovers the stories of the objects and bodies left behind in the desert. The Land of Open Graves will spark debate and controversy.

A landmark comparative study (U.S. and Brazil) of television’s social and cultural effects on human behavior. The Updated Edition brings forward the author’s research on this topic since the original volume was published in 1990 with an extensive new Introduction.

Anthropology is the study of all humans in all times in all places. But it is so much more than that. "Anthropology requires strength, valor, and courage," Nancy Scheper-Hughes noted. "Pierre Bourdieu called anthropology a combat sport, an extreme sport as well as a tough and rigorous discipline. ... It teaches students not to be afraid of getting one's hands dirty, to get down in the dirt, and to commit yourself, body and mind. Susan Sontag called anthropology a "heroic" profession." What is the payoff for this heroic journey? You will find ideas that can carry you across rivers of doubt and over mountains of fear to find the light and life of places forgotten. Real anthropology cannot be contained in a book. You have to go out and feel the world's jagged edges, wipe its dust from your brow, and at times, leave your blood in its soil. In this unique book, Dr. Michael Wesch shares many of his own adventures of being an anthropologist and what the science of human beings can tell us about the art of being human. This special first draft edition is a loose framework for more and more complete future chapters and writings. It serves as a companion to anth101.com, a free and open resource for instructors of cultural anthropology. This 2018 text is a revision of the "first draft edition" from 2017 and includes 7 new chapters.

Anthropologists travel back in time and across the globe to understand human culture?but, surprise, there is culture right here in the United States. This second edition of the best-selling textbook and anthology, Reflecting on America, again focuses on how we can recognize the common cultural thread running through diverse American phenomena?from heroin addiction and Big Business?s efforts to shape the identities of children, to Civil War reenactments and the popularity of burlesque in the Midwest. In addition, this second edition includes chapters written especially for this volume on striptease, Burning Man, The Big Bang Theory TV show, and Groundhog Phil. Written throughout with verve and quirky humor, and offering ?Questions for discussion? after every article, this book is perfect for undergraduate classes in anthropology and American studies. Drawing together twenty-two scholars with expertise in anthropological ideas about culture, Reflecting on America examines what it means to be American.
