Pharmacology for Nurses - E-Book

Written in the award-winning Incredibly Easy! style, this book provides complete and clear explanations of how drugs act and interact in the treatment of disease. Focusing on mechanisms of drug action, the book details specific drugs by pharmacologic class for all body systems as well as drugs for pain, psychiatric disorders, infection, fluid and electrolyte imbalances, and cancer. Potentially dangerous drug and drug-herb interactions are highlighted. This thoroughly updated edition covers the newest drugs in each pharmacologic class and includes information on obesity drugs, a new chapter on genitourinary system drugs, a new medication safety feature, and a new appendix on common herbal preparations and their drug interactions.

Carefully designed to provide an integrated introduction to both the biology of disease and the therapeutic agents that are used to manage them, this book considers the underlying pathology of many common illnesses and diseases but by focusing on those conditions which have a pharmacological intervention is able to provide nurses with a broader understanding of bioscience that reflects care given in practice. It covers the basics of pharmacology, the core pathological concepts of inflammation, infection and cancer as well as a systems-based consideration of the pathophysiology and relevant pharmacology of common disorders. Providing the ideal starting point for student nurses to develop a robust, integrated knowledge of human disease and pharmacology, this book will enable them to provide care based on up-to-date knowledge of this important subject.

Accompanying CD-ROM contains a 265-question examination with rationales and test-taking tips for additional review.
