As in the author's previous picture book, Window, this book is observed through the window of a house in a typical urban neighbourhood, each picture shows time passing. This is Window in reverse, with the land being reclaimed from built-up concrete to a gradual greening. Nelson Community and Family Studies: Preliminary & HSC, second edition, continues its fresh, practical approach to this contemporary discussion-based subject. This book is a comprehensive resource for teachers and students of Community and Family Studies. It provides a concise and thorough basis for study and reviews all components of the Preliminary and HSC course. Each topic area is supported with current research articles, engaging case studies and activities to help reinforce major syllabus outcomes. The text demonstrates the interrelationships between each topic area and it is an essential tool for all students wanting to succeed in CAFS.

Jealous and crippled, Richard of Gloucester wants to be King of England and uses manipulation and deceit to achieve his goal. He murders his brothers, nephews, and any opposition to become King Richard III. In the end, Henry of Richmond raises an army, kills Richard in battle, and becomes King Henry VII.Includes a biography of the author.

Unpolished Gem

A Recipe for Success

A teacher's life can be demanding at times, but the dynamic world of the classroom can also be very rewarding. If you like working with young people and want to follow in the footsteps of your favourite teacher, this book can help you get there.

Over the course of the late-twentieth century Basil Bernstein pioneered an original approach to educational phenomena, taking seriously questions regarding the transmission, distribution and transformation of knowledge as no other before had done. Arguing tirelessly for change, more than any other British sociologist it is Bernstein who presents to us education as a social right and not as a privilege. It is this objective today that makes his work so important. Knowledge, Pedagogy and Society seeks to clarify the broad brushstrokes of his theories, developed over the span of more than forty years, by collecting together scholars from every corner of the globe; specialists in education, sociology and epistemology to test and examine Bernstein's work against the backdrop of their own research. From teaching content and the social, cognitive and linguistic aspects of education, to changes in the political climate in the early twenty-first century, this collection represents an open dialogue with Bernstein's work using a forward-looking and dynamic approach. Originally published in French with the explicit aim of locating Basil Bernstein's theories alongside those of Pierre Bourdieu, one of the most important European sociologists, the French editors draw together a collection that offers a diverse background and perspective on Bernstein's work and thought. Revised to include a new preface, a new introduction and revisited papers, the English edition will be a relevant resource for anyone interested in Bernstein, his reception and importance, as well as individuals working in the sociology of education, theory of education and education policy.

▯Poignant, provocative, sometimes laugh-out-loud funny, Pung's rollicking tale of two worlds is not to be missed.▯Kirkus Reviews (starred review) After Alice Pung's family fled to Australia from the killing fields of Cambodia, her father chose Alice as her name because he thought their new country was a Wonderland. In this lyrical, bittersweet debut memoir already an award-winning bestseller when it was published in Australia Alice grows up straddling two worlds, East and West, her insular family and the Australia outside. With wisdom beyond her years and a keen eye for comedy in everyday life, she writes of the trials of assimilation and cultural misunderstanding, and of the tender but fraught relationships between three generations of women trying to live the Australian dream without losing themselves. Unpolished Gem is a moving, vivid journey about identity and the ultimate search for acceptance and healing, delivered by a writer possessed of rare empathy, penetrating insight, and undeniable narrative gifts.

The Goalkeeper's Revenge

Modern History text

In the present monograph, we offer current insights into polymyalgia rheumatica and giant cell arthritis. Both diseases are typical for advanced age, and their incidences increase with aging. Both diseases are a center point of interest not only for rheu- tologists, gerontologists, ophthalmologists or neurologists, but also for general prac- tioners. Early diagnosis and rapid treatment, mainly with glucocorticoids can save one of the most precious senses- vision. Damage to other organs (heart, aorta, co- nary arteries, liver, lungs, kidneys), which are supplied by the arteries affected by ischemic syndrome in the setting of giant cell arthritis, has serious consequences as well.

Late diagnosis of giant cell arthritis can have fatal consequences for affected patients. It is a matter of fact that the human population is aging. Therefore, more attention has to be paid not only to diagnosis, clinical course and treatment of rheumatic d- eases in elderly, but also to their genetic, immunologic, endocrinologic, chronobiologic mechanisms, and state-of-the-art diagnostic modalities. I am convinced that the int- disciplinary research of the diseases will allow us to diagnose and treat the rheumatic diseases even faster and more effectively in the future.

'Do not be fooled, if we write we are writers. Simple as that. Our styles, purposes and viewpoints may be different but we are all writers. We do not need qualifications, we simply need a story to tell.' A new edition of ARNA

"In this book, Andy Basevanis and Francis Ouellette . . . have undertaken the difficult task of organizing the knowledge in this field in a logical progression and presenting it in a digestible form. And they have done an excellent job. This fine text will make a major impact on biological research and, in turn, on progress in biomedicine. We are all in their debt." —Eric Lander *From the Foreword Reviews from the First Edition* "...provides a broad overview of the basic tools for sequence analysis ... For biologists approaching this subject for the first time, it will be a very useful handbook to keep on the shelf after the first reading, close to the computer." —*Nature Structural Biology* "...should be in the personal library of any biologist who uses the Internet for the analysis of DNA and protein sequence data." —*Science* "...a wonderful primer designed to navigate the novice through the intricacies of in scripto analysis ... The accomplished gene searcher will also find this book a useful addition to their library ... an excellent reference to the principles of bioinformatics." —*Trends in Biochemical Sciences This new edition of the highly successful Bioinformatics: A Practical Guide to the Analysis of Genes and Proteins provides a sound foundation of basic concepts, with practical discussions and comparisons of both computational tools and databases relevant to biological research. Equipping biologists with the modern tools necessary to solve practical problems in sequence data analysis, the Second Edition covers the broad spectrum of topics in bioinformatics, ranging from Internet concepts to predictive algorithms used on sequence, structure, and expression data. With chapters written by experts in the field, this up-to-date reference thoroughly covers vital concepts and is appropriate for both the novice and the experienced practitioner. Written in clear, simple language, the book is accessible to users without an advanced mathematical or computer science background. This new edition includes: All new end-of-chapter Web resources, bibliographies, and problem sets Accompanying Web site containing the answers to the problems, as well as links to relevant Web resources New coverage of comparative genomics, large-scale genome analysis, sequence assembly, and expressed sequence tags A glossary of commonly used terms in bioinformatics and genomics Bioinformatics: A Practical Guide to the Analysis of Genes and Proteins, Second Edition is essential reading for researchers, instructors, and students of all levels in molecular biology and bioinformatics, as well as for investigators involved in genomics, positional cloning, clinical research, and computational biology.*

The accompanying CD-ROM contains clinical examples, critical appraisals and background papers.

This open access book provides a concise yet comprehensive overview on how to build a quality management program for hematopoietic stem cell transplantation (HSCT) and cellular therapy. The text reviews all the essential steps and elements necessary for establishing a quality management program and achieving accreditation in HSCT and cellular therapy. Specific areas of focus include document development and implementation, audits and validation, performance measurement, writing a quality management plan, the accreditation process, data management, and maintaining a quality management program. Written by experts in the field, Quality Management and Accreditation in Hematopoietic Stem Cell Transplantation and Cellular Therapy: A Practical Guide is a valuable resource for physicians, healthcare professionals, and laboratory staff involved in the creation and maintenance of a state-of-the-art HSCT and cellular therapy program.

There are at least four reasons why a sleep clinician should be familiar with rating scales that evaluate different facets of sleep. First, the use of scales facilitates a quick and accurate assessment of a complex clinical problem. In three or four minutes (the time to review ten standard scales), a clinician can come to a broad understanding of the patient in question. For example, a selection of scales might indicate that an individual is sleepy but not fatigued; lacking alertness with no insomnia; presenting with no symptoms of narcolepsy or restless legs but showing clear features of apnea; exhibiting depression and a history of significant alcohol problems. This information can be used to direct the consultation to those issues perceived as most relevant, and can even provide a springboard for explaining the benefits of certain treatment approaches or the potential corollaries of allowing the status quo to continue. Second, rating scales can provide a clinician with an enhanced vocabulary or language, improving his or her understanding of each patient. In the case of the sleep specialist, a scale can help him to distinguish fatigue from sleepiness in a patient, or elucidate the differences between sleepiness and alertness (which is not merely the inverse of the former). Sleep scales are developed by researchers and clinicians who have spent years in their field, carefully honing their preferred methods for assessing certain brain states or characteristic features of a condition. Thus, scales provide clinicians with a repertoire of questions, allowing them to draw upon the extensive experience of their colleagues when attempting to tease apart nuanced problems. Third, some scales are helpful for tracking a patient's progress. A particular patient may not remember how alert he felt on a series of different stimulant medications. Scale assessments administered periodically over the course of treatment provide an objective record of the intervention, allowing the clinician to examine and possibly reassess her approach to the patient. Finally, for individuals conducting a double-blind crossover trial or a straightforward clinical practice audit, those who are interested in research will find that their own clinics become a source of great discovery. Scales provide standardized measures that allow colleagues across cities and countries to coordinate their practices. They enable the replication of previous studies and facilitate the organization and dissemination of new research in a way that is accessible and rapid. As the emphasis placed on evidence-based care grows, a clinician's ability to assess his or her own practice and its relation to the wider medical community becomes invaluable. Scales make this kind of standardization possible, just as they enable the research efforts that help to formulate those standards. The majority of Rating Scales in Sleep and Sleep Disorders:100 Scales for Clinical Practice is devoted to briefly discussing individual scales. When possible, an example of the scale is provided so that readers may gain a sense of the instrument's content. Groundbreaking and the first of its kind to conceptualize and organize the essential scales used in sleep medicine, Rating Scales in Sleep and Sleep Disorders:100 Scales for Clinical Practice is an invaluable resource for all clinicians and researchers interested in sleep disorders.

Shortlisted for the 2012 Miles Franklin Award, PAST THE SHALLOWS is a powerful and hauntingly beautiful novel from an extraordinary new Australian writer who is compared with Cormac McCarthy and Tim Winton. 'If you read only one book this year, make sure it's this' Sunday Times 'I loved Past the Shallows' Kevin Powers, author of The Yellow Birds Everyone loves Harry. Except his father. Joe, Miles and Harry are growing up on the remote south coast of Tasmania. The brothers' lives are shaped by their father's moods - like the ocean he fishes, he is wild and unpredictable. He is a bitter man, with a devastating secret. Miles does his best to watch out for Harry, the youngest, but he can't be there all the time. Often alone, Harry finds joy in the small treasures he discovers, in shark eggs and cuttlefish bones. In a kelpie pup, a mug of hot chocolate, and a secret friendship with a mysterious neighbour. But sometimes small treasures, or a brother's love are not enough.

The Book Seeks To Present A Basic Course In Spoken Bengali. The Emphasis In The Book Is Upon Speaking And Understanding The Language Without Neglecting Its Structure. In Fact The Approach Is A Compromise Between Purely Structural And Purely Cultural Orientation. The Course Is Divided Into Seventeen Lessons.

This ground-breaking anthology collects poems written by Australian poets who are migrants, their children, and refugees of Asian heritage, spanning work that covers over three decades of writing. Inclusive of hitherto marginalised voices, these poems explore the hyphenated and variegated ways of being Asian Australian, and demonstrate how the different origins and traditions transplanted from Asia have generated new and different ways of being Australian. This anthology highlights the complexity of Asian Australian interactions between cultures and languages, and is a landmark in a rich, diversely-textured and evolving story. Timely and proactive this anthology fills existing cultural gaps in poetic expressions of home, travel, diaspora, identity, myth, empire and language.

George Steiner--one of the preeminent essayists and literary thinkers of our era--addresses issues of language and the relation of language to literature and to religion. He covers a wide range of subjects from Homer and Shakespeare to Jewish scripture, religious tradition, and the effects of the Holocaust.

With their tidal imagination, the poems in this debut collection sweep between old worlds and new, seeking the lost and recovering the found among shipwrecks, underwater zoos and discovered lands. Emma Jones brings her inventive worlds dramatically to life in a series of vividly distilled meetings - of settlers and indigenous peoples, of seawaters and shore, of humanity and the wilds of nature. Here, tigers stalk the captive and the free, while Death encounters his own double and Daphne tells of her new leaves, 'They sing, and make the world.' The same might be said of the poems themselves in this restless and memorable search for belonging.

'...an outstanding achievement that will, with its skill and elegance, deeply enrich Australian poetry and whoever reads it.' *Judges' citation, 2013 NSW Premier's Literary Award for Poetry. Ali Cobby Eckermann, a Yankunytjatjara/Kokatha poet, is at the forefront of Australian Indigenous poetry. Inside My Mother is both a political and personal collection, angry and tender, propelled by the need to remember, yet brimming with energy and vitality - qualities that distinguished her previous, prize-winning verse novel, Ruby Moonlight. Tributes to country, to her elders, and to the animals and spirits that inhabit the landscape, coupled with the rhythms of mourning and celebration that pulse through the poems, make this a moving and personal collection. Grief is deeply felt and vividly portrayed in poems such as 'Inside My Mother' and 'Lament'. There is defiance and protest in 'Clapsticks' and 'I Tell You True'. In the final section there is a marked generational shift as the elders begin to pass away and the poet as grandmother comes to accept her rightful place as matriarch.*

What do you do when you profoundly disagree with someone you love? Wearing a hijab is a touchstone of religious identity, but it is also imbued with a complex array of historical and contemporary meanings. In Alana Valentine's new play, the cultural meaning of the hijab has become a wedge between generations. At the heart of Shafana and Aunt Sarrinah is the relationship between an aunt and her niece. Both devout Muslims, the younger woman wants to put on a headscarf, the older woman tries to dissuade her. For Aunt Sarrinah, the hijab represents a world from which she has escaped; for her niece, Shafana, it is a personal statement of renewed faith. Alana Valentine has written a startling meditation on the clash between individual freedom and community reaction and, as academic Christina Ho acclaims, "a quietly insightful intervention that portrays what media headlines never can; the multiple meanings of the headscarf for Muslim women".
