In the second round of a defense of his IBF super featherweight world championship, Tony "The Tiger" Lopez felt the elbow of challenger John Molina slam into his eye. The impact of the accidental shot shattered his

orbital bone and jammed Lopez's eyeball back into its socket. Swelling immediately sealed the eye, a problem made worse when, in the next round, Molina opened a cut over Lopez's other eye. The notoriously gritty champ fought seven more rounds that night in Sacramento before losing his title by TKO -- a story typical of those you'll read in "A Puncher's Chance: Amazing Tales from The Ringside Boxing Show." This is a book that's long overdue: One that provides information that has never before been published, compiled or analyzed in a way that's designed to help fighters. This is a guide to the science of kicking and punching that can settle the debates about which techniques are the most effective and why. It will help a fighter to fight, an instructor to teach and martial artists to advance by working things out for themselves. There is no magic involved in the martial arts. The force and power that is displayed by an expert fighter is the consequence of rigorous training in

the accurate application of physical laws. Understanding how to use these laws of physics to create massive impact forces will provide a personal insight into the practice of correct technique and form. This unique piece of work will act as a technical reference that provides the facts and figures that fighters seek, including records of the maximum force and speed achieved by some of the best present day warriors, helping to answer many of the most difficult questions in the martial arts. She was a delicately pretty girl of a fair fragile type, not yet twenty years of age, and resembled a shepherdess of Dresden china in her dainty perfection. With her pale golden hair, and rose-leaf complexion; arrayed in a simple white silk frock with snowy pearls round her slender neck, she looked like a wreath of faint mist. And all this time Lillian stared at the door, and then at Dan, and then at her plate, putting two and two together. But in spite of her feminine intuition, she could not make four, and turned to her lover--for that Dan was, and a declared lover too--for an explanation.
