Gaby LeFevre is a suburban, Midwestern firecracker, growing up in the 80s and 90s and saving the world one homeless person, centenarian, and orphan at a time. With her crew of twin sister, Annie, smitten Mikhail, and frenemy Mel, she's a pamphlet-wielding humanitarian, tackling a broken world full of heroes and heroines, villains and magical seeds, and Northwyth stories. Beginning with a roadkill-burying nine-year-old and a gas-leak explosion, it follows Gaby as she traverses childhood and young adulthood with characteristic intensity and a penchant for disaster. Meanwhile, the large cast of compelling characters entertains and the Northwyth legends draw you into their magic. Kelvin and his Dad were taking a walk, looking at the trees and flowers in the park. When Kelvin asked his Dad 'How do trees grow?' To which his dad replied, 'Do you really want to know?' In this story, children will learn about the process of photosynthesis and why it is important to life on Earth. Look out for this and other titles in The Young Scientist Series of books which 'Teaches Young Minds through Science and Rhymes'.

teaches children sex, gender and relationships education in a way that is inclusive of all sexual orientations and gender identities. Covering puberty, hormones, pregnancy, consent, sex, babies, relationships and families, it uses gender-neutral language throughout and celebrates diversity in all its forms, including race, ethnicity, faith, bodies, gender and sexuality. For use with children aged 8-12, it will help answer their questions and spark open discussion with parents, carers and teachers. With informative illustrations and further resources and a guide for adults, The Every Body Book is the ultimate sex, gender and relationships education resource for children.

With humour and sensitivity, Boys, Girls & Body Science provides no-nonsense answers for children - and parents - with questions about sex. Specifically designed for young readers, Boys, Girls & Body Science walks children through the wonders of their bodies in a direct, easy-to-read manner. The story begins with Nicholas, 7, and Jenny, 5, learning about different types of science in their class - from ecology to the digestive system. Then Meg Hickling, a guest speaker, comes to talk to them about a new type of science. Hickling talks about the "science names" for the children's body parts, about good and bad touches and about making babies. She coaches the children not to be embarrassed or shy about body science: "We are going to make

this just like a science lesson, we will learn to think like a scientist and we will learn the scientific names for our private parts," she says. Hickling is a Registered Nurse who has been teaching sexual education for over 25 years. She is an outstanding educator, and her ability to convey difficult material with sensitivity, gentle humour and warmth distinguishes her as a remarkable teacher and role model. In this latest publication, Hickling brings her award-winning lesson into the homes, schools and libraries of inquisitive children everywhere!

***From the expert team behind IT'S PERFECTLY NORMAL and IT'S SO AMAZING! comes a book for younger children about their bodies — a resource that parents, teachers, librarians, health care providers, and clergy can use with ease and confidence. Young children are curious about almost everything, especially their bodies. And young children are not afraid to ask questions. What makes me a girl? What makes me a boy? Why are some parts of girls' and boys' bodies the same and why are some parts different? How was I made? Where do babies come***

***from? Is it true that a stork brings babies to mommies and daddies? IT'S NOT THE STORK! helps answer these endless and perfectly normal questions that preschool, kindergarten, and early elementary school children ask about how they began. Through lively, comfortable language and sensitive, engaging artwork, Robie H. Harris and Michael Emberley address readers in a reassuring way, mindful of a child's healthy desire for straightforward information. Two irresistible cartoon characters, a curious bird and a squeamish bee, provide comic relief and give voice to the full range of emotions and reactions children may experience while learning about their amazing bodies. Vetted and approved by science, health, and child development experts, the information is up-to-date, age-appropriate, and scientifically accurate, and always aimed at helping kids feel proud, knowledgeable, and comfortable about their own bodies, about how they were born, and about the family they are part of.***

***From early childhood boys often feel pressured to be athletic and muscular. But what impact does this have on physical and mental well-being through their teens and beyond? Worryingly, a third of teen boys are trying to 'bulk up' due to body dissatisfaction, and boys and men account for 25% of eating disorder cases. What can we tell our boys to help them feel happy and confident simply being themselves? Being You has the answers! It's an easy-to-read, evidence-based guide to developing a***

The Earth is in ruins. Cities and nations destroyed. Mankind is extinct. Brant and Arsha are synthetics, machines made in the image of people. They dream of bringing humans back into the world and have the technology to succeed, but the obstacles in their way are mounting. Not only are their own conflicting ideals creating a rift between them, but now the sinister Marauders are closing in as they seek revenge on Brant. Out in the wasteland, strange lights and mysterious objects in the sky herald the arrival of new factions that seek to control the region. Even in the once quiet streets of their own city, malevolent forces are beginning to unfurl that threaten the sanctity of everything they hold dear, jeopardising the future that is within their grasp. wanted my children to be informed about the facts of life, yet without being too sexually explicit in the process, because some of the facts weren't good such as pornography, diseases, and predators, but these subjects needed to be addressed as well. As a result, I told them what I have written in *Your Special Gift*, by using the analogy of a gift, a lock, and a key to define commonly used sexual terms, and to caution them about possible consequences, and to warn them of potential predators. I also used Scripture as the basis of defining true love. The simplicity of the gift analogy opens the door of communication between parent and child in an effective straightforward, and yet sensitive way, so that any question concerning sex can be answered by using this method. *Your Special Gift* is well-suited for children in the 8-to-12 year-old range.

This is an engaging book ready to take you on an afternoon voyage through the cosmos. You help with experiments and learn some of the processes that go into making up scientific hypotheses on relativity, the speed of light and other light matters. Some humor is interjected to soften the dryness of the subject matter. Delightful illustrations will welcome you along for the fun. Come along for the ride and begin your adventure into light science. Find out why some ideas from days past are no longer considered correct and how that changes the way we will all look at the science of the stars in the future.

Team Up with Teens is a powerful resource for parents. It is packed with practical tips to guide them through the rugged terrain of raising adolescents by partnering with them as a team and empower their teens to become their best version. It is like a handy parenting toolkit to help parents guide their adolescents to resolve the tricky issues of puberty. It is a succinct guide with the most effective parenting strategies for raising modern teenagers. The information shared in various chapters will enable parents to equip themselves to support their teenagers through the tumultuous years. It not only elaborates on the methods of enhancing a teen's Emotional and Spiritual Intelligence but also guides parents on how to raise their children to be socially well adjusted, morally strong, and develop the ability to cultivate meaningful relationships. It offers solutions to problems related to academics, negative peer pressure, social media, and concerns about teen stress and anxiety. It is full of clues and hints for parents as to how they can weave opportunities for the development of creativity, cooperation, collaboration, facing competition, problem-solving skills, decision making, and goal setting into the fabric of daily routine. It is interspersed with ideas on conscious parenting and nurturing the uniqueness of teenagers. Additionally, the book intends to give the parents an in-depth understanding of how to build happy memories and how to chalk out a roadmap for the future and guide their teens in developing a vision and mission statement for themselves.

"The need for scientific knowledge springs from a natural human curiosity to understand our world, but also from a genuine desire to help humanity. The great scientific discoveries have given us incredible knowledge about the natural world, have improved our lives through new technologies, and have taught us a great deal about the capabilities and the limitations of our human perspective." In *The Mind of Science: From Aristotle to Einstein*, author Michael Sidiropoulos takes you on a thought-provoking journey through the history of science from a philosophical standpoint. Beginning with the calculation of the size of the earth by Eratosthenes, chief librarian at the Library of Alexandria, Sidiropoulos for the most part avoids the use of mathematical formulas as he explores the ideas, and ideals, that lie behind scientific advancement throughout the ages. It's a fascinating voyage that will enrich you with a greater awareness of the interplay between science and philosophy-how they're similar, how they're different, and how they complement each other.

A child's dream takes us on a journey through space. The child looks for a place to land while exploring each planet, but some are too hot, some are too cold, and some are just made of liquid and gas. Only planet Earth is just right. Fun rhyming text introduces children to each planet and basic facts about it. The text is accompanied by stunning images of a rocket traveling through the solar system, interspersed by close up images of each planet in order. While each planet is amazing in its own way, there is only one we can call home. If parents choose, this can be the start to a conversation about how we can take better care of our planet. making, connecting relevant theories and research from both fields. It begins with a historical review of how explorations of anatomy, physiology, and sexual identity manifested in art making in different cultures and discusses why a clinician must take these spiritual, medical, and socioeconomic factors in account to offer effective and culturally competent therapy. The second part of the book discusses clinically effective treatments in art and sex therapy, and contains numerous case illustrations. Included are interventions for important issues in therapy, such as exploring gender identity, sexual health and shame, processing sexual abuse, couples' intimacy, parenting concerns regarding their children's sexuality, and treating sex addiction.
