*“Over half a century has passed since I cut my teeth on an old .36 Navy Colt. For 40 years I have almost never been out of easy reach of a good sixgun. Thirty years I spent in the saddle, packing, punching cows and breaking saddle brones. The sixgun was worn just as regularly as my pants and many times was much more important to my existence. It pulled me out of several tight scrapes with wild horses, wilder cattle and some big game. Though I have witnessed several gun fights, have had guns pulled on me and have been shot at several times, I have never had to use my gun on a man. Several times it was touch-and-go and perhaps only the current knowledge that I was both fast and accurate with a sixgun saved me from being embroiled. Though I do not recommend a sixgun for big game, thirty head of big game have fallen to mine, including elk, bear, deer, cougar, mountain goat and javelina. I have also trailed up a great many big game animals of various species that were wounded by sportsmen and then I finished them off. No record was kept of these or the many coyotes, bobcats and lesser game, or the livestock I have had to kill.” This classic includes the following chapters: Introduction I. History of the Sixgun II. Doping is as old as organized sports. From baseball to horse racing, cycling to track and field, drugs have been used to enhance performance for 150 years. For much of that time, doping to do better was expected. It was doping to throw a game that stirred outrage. Today, though, athletes are vilified for using performance-enhancing drugs. Damned as moral deviants who shred the fair-play fabric, dopers are an affront to the athletes who don’t take shortcuts. But this tidy view swindles sports fans. While we may want the world sorted into villains and victims, putting the blame on athletes alone ignores decades of history in which teams, coaches, governments, the media, scientists, sponsors, sports federations, and even spectators have played a role. The truth about doping in sports is messy and shocking because it holds a mirror to our own reluctance to spit in the soup;that is, to tell the truth about the spectacle we crave. In Spitting in the Soup, sports journalist Mark Johnson explores how the deals made behind closed doors keep drugs in sports. Johnson unwinds the doping culture from the early days, when pills meant progress, and uncovers the complex relationships that underlie elite sports culture—the essence of which is not to play fair but to push the boundaries of human performance. It’s

easy to assume that drugs in sports have always been frowned upon, but that’s not true. Drugs in sports are old. It’s banning drugs in sports that is new. Spitting in the Soup offers a bitingly honest, clear-eyed look at why that’s so, and what it will take to kick pills out of the locker room once and for all.
