

Brailnote Apex User Guide

iOS in the Classroom is a fully illustrated step-by-step guide to teaching the use of the iPad running iOS 9 to students with visual impairments. The book explores the extensive accessibility options available, where to find them, and how to configure them. It delves into VoiceOver and Zoom, the use of external keyboards and refreshable braille displays, as well as a discussion on touch screen gestures and braille chord commands. Also included is information on finding and managing content, using the iPad for a range of online activities, and utilizing specific apps, all geared to enabling students with visual impairments to use the iPad for the same classroom tasks as their peers and ensuring their success in the classroom.

Jack, Keiko, and Arty are back in the exciting second installment of the Rafters series. At the conclusion of the first book, the gang was unable to find Jack's older brother, Ben, who'd fallen overboard while riding the magic raft down the Dummoore River. Book two begins with Jack and Keiko returning to the fair grounds to look for the old junk dealer who'd sold them the raft. Although the man is nowhere to be found, the kids find an old map they believe holds the secret to Ben's whereabouts. Despite their last frightening trip down river, Jack, Keiko, and Arty return for more thrills on their magical raft, only to discover that the map they've placed their faith in transports them to a place from which they may never return! Will Jack find Ben? Will the kids discover the identity of the old man who sold them the raft? These questions and others are finally revealed in this gripping new installment of Rafters!

Quick Calculus 2nd Edition A Self-Teaching Guide Calculus is essential for understanding subjects ranging from physics and chemistry to economics and ecology. Nevertheless, countless students and others who need quantitative skills limit their futures by avoiding this subject like the plague. Maybe that's why the first edition of this self-teaching guide sold over 250,000 copies. Quick Calculus, Second Edition continues to teach the elementary techniques of differential and integral calculus quickly and painlessly. Your "calculus anxiety" will rapidly disappear as you work at your own pace on a series of carefully selected work problems. Each correct answer to a work problem leads to new material, while an incorrect response is followed by additional explanations and reviews. This updated edition incorporates the use of calculators and features more applications and examples. "...makes it possible for a person to delve into the mystery of calculus without being mystified." --Physics Teacher

Equal accessibility to public places and services is now required by law in many countries. For the vision-impaired, specialised technology often can provide a fuller enjoyment of the facilities of society, from large scale meetings and public entertainments to reading a book or making music. This volume explores the engineering and design principles and techniques used in assistive technology for blind and vision-impaired people. This book maintains the currency of knowledge for engineers and health workers who develop devices and services for people with sight loss, and is an excellent source of reference for students of assistive technology and rehabilitation.

Riley Blakely and the remainder of Grandview High's french class is heading out on a school trip to Paris. The three weeks in Paris are supposed to be an 'educational opportunity' for this lot. But of course, these hormonal teenagers just cannot abide by the rules. The one rule set by their lovely Mr. Walker: You cannot room with somebody of the opposite gender.So what does this french class do? Room with the opposite gender, with a funny way of picking roommates. Chit picking. Because hormonal teenagers can just never get enough.Insert Asher West. Her not so secret annoying hater. It's a hate-hate relationship.He's the guy who picked Riley's name. He's the most popular guy in the freaking school and Riley? Not so much. Put the two together and you'll get a whole lot of arguments and awkward moments.They're roommates and they're stuck in Paris, the city of love and the city of lights

World's Greatest Word Game

Hiding in Plain Sight

How Assistive Technology Impacts the Lives of People with Disabilities

A Self-Teaching Guide

The incredible life story of Haben Girma, the first Deafblind graduate of Harvard Law School, and her amazing journey from isolation to the world stage. Haben grew up spending summers with her family in the enchanting Eritrean city of Asmara. There, she discovered courage as she faced off against a bull she couldn't see, and found in herself an abiding strength as she absorbed her parents' harrowing experiences during Eritrea's thirty-year war with Ethiopia. Their refugee story inspired her to embark on a quest for knowledge, traveling the world in search of the secret to belonging. She explored numerous fascinating places, including Mali, where she helped build a school under the scorching Saharan sun. Her many adventures over the years range from the hair-raising to the hilarious. Haben defines disability as an opportunity for innovation. She learned non-visual techniques for everything from dancing salsa to handling an electric saw. She developed a text-to-braille communication system that created an exciting new way to connect with people. Haben pioneered her way through obstacles, graduated from Harvard Law, and now uses her talents to advocate for people with disabilities. Haben takes readers through a thrilling game of blind hide-and-seek in Louisiana, a treacherous climb up an iceberg in Alaska, and a magical moment with President Obama at The White House. Warm, funny, thoughtful, and uplifting, this captivating memoir is a

Provides an overall introduction to the welfare of the individual, illustrating most of the common equipment and work techniques for both the home and shop setting. What is the coronavirus, and why is everyone talking about it? Engagingly illustrated by Axel Scheffler, this approachable and timely book helps answer these questions and many more, providing children aged 5-10 and their parents with clear and accessible explanations about the coronavirus and its effects - both from a health perspective and the impact it has on a family's day-to-day life. With input from expert consultant Professor Graham Medley of the London School of Hygiene & Tropical Medicine, as well as advice from teachers and child psychologists, this is a practical and informative resource to help explain the changes we are currently all experiencing. The book is free to read and download, but Nosy Crow would like to encourage readers, should they feel in a position to, to make a donation to: <https://www.nhscharitiestogether.co.uk/>

Coronavirus: A Book for Children

Assistive Technology for Blindness and Low Vision

"Having been born a freeman, and for more than thirty years enjoyed the blessings of liberty in a free State—and having at the end of that time been kidnapped and sold into Slavery, where I remained, until happily rescued in the month of January, 1853, after a bondage of twelve years—it has been suggested that an account of my life and fortunes would not be uninteresting to the public." -an excerpt

The author follows the lives of two groups of people with disabilities, those acquired at birth & in adulthood over 20 years of their lives, showing the positive & negative effects of using assistive technology devices to enhance their independence & capabilities.

Dans ce texte, Denis Diderot se penche sur la question de la perception visuelle, un sujet renouvelé l'poque par le succès d'opérations chirurgicales permettant de donner la vue à certains aveugles de naissance. Les calculations sont nombreuses en ce temps-là sur ce que la vue et l'usage qu'un individu peut en faire doivent être la seule perception, ou bien l'habitude et l'expérience, par exemple pour se repérer dans l'espace, identifier des formes, percevoir les distances et les volumes, distinguer un tableau réaliste de la réalité. Diderot explique qu'un aveugle qui se met soudainement à voir ne comprend pas immédiatement ce qu'il voit, et qu'il lui mettra du temps à faire le rapport entre son expérience des formes et des distances acquises par le toucher, et les images qu'il perçoit avec son oeil.

Learn braille by sight. Dots are printed, not embossed so that a sighted person can easily learn braille to assist a visually impaired person. The type of braille in this book is called UEB (Unified English Braille) which is the international standard for English speaking countries. In this book, you will learn Grade 1 and Grade 2 braille, which is now known as uncontracted and contracted braille.

Tatum Everley is a freshman at Western Michigan University. Due to an emotionally and psychologically abusive past relationship, Tate struggles from Complex-Post Traumatic Stress Disorder. She has been working on controlling her symptoms and flashbacks, but when she meets Axel Burne at a fraternity party, who is notorious for sleeping around and getting into fights, she tries her best to dodge the bullet. Axel starts to become intrigued by Tate, but she's better off choosing Lucas- the sweet guy who has been trying to take her out since orientation. But even though Lucas is the better option, Axel keeps reappearing. Tate continues to try to stay away from him, but it starts becoming harder to, and as she gets closer to him, things start to get way out of hand. If Tate wants her happy ending and her sanity intact, then she has to push through the hardships and maintain control over her disorder.

This groundbreaking memoir offers a glimpse into an activist's journey to finding and cultivating community and the continued fight for disability justice, from the founder and director of the Disability Visibility Project in Chinese culture, the tiger is deeply revered for its confidence, passion, ambition, and ferocity. That same fighting spirit resides in Alice Wong. Drawing on a collection of original essays, previously published work, conversations, graphics, photos, commissioned art by disabled and Asian American artists, and more, Alice uses her unique talent to share an impressionistic scrapbook of her life as an Asian American disabled activist, community organizer, media maker, and dreamer. From her love of food and pop culture to her unwavering commitment to dismantling systemic ableism, Alice shares her thoughts on creativity, access, power, care, the pandemic, mortality, and the future. As a self-described disabled oracle, Alice traces her origins, tells her story, and creates a space for disabled people to be in conversation with one another and the world. Filled with incisive wit, joy, and rage, Wong's Year of the Tiger will galvanize readers with big cat energy.

Assistive technology has made it feasible for individuals with a wide range of impairments to engage in many activities, such as education and employment, in ways not previously possible. The key factor is to create consumer-driven technologies that solve the problems by addressing the needs of persons with visual impairments. Assistive Technology for Blindness and Low Vision explores a broad range of technologies that are improving the lives of these individuals. Presenting the current state of the art, this book emphasizes what can be learned from past successful products, as well as what exciting new solutions the future holds. Written by world-class leaders in their field, the chapters cover the physiological bases of vision loss and the fundamentals of orientation, mobility, and information access for blind and low vision individuals. They discuss technology for multiple applications (mobility, wayfinding, information access, education, work, entertainment), including both established technology and cutting-edge research. The book also examines computer and digital media access and the scientific basis for the theory and practice of sensory substitution. This volume provides a holistic view of the elements to consider when designing assistive technology for persons with visual impairment, keeping in mind the need for a user-driven approach to successfully design products that are easy to use, well priced, and fill a specific need. Written for a broad audience, this book provides a comprehensive overview and in-depth descriptions of current technology for designers, engineers, practitioners, rehabilitation professionals, and all readers interested in the challenges and promises of creating successful assistive technology.

ALA's popular and respected Whole Library Handbook series continues with a volume specifically geared towards those who serve young adults, gathering stellar articles and commentary from some of the country's most innovative and successful teen services librarians. Sections focusing on practice, theory, and the philosophical underpinnings of the profession are supported by current research and historical perspectives. Both instructive and reflective in scope, this essential handbook provides a comprehensive introduction to the background and day-to-day realities of teen librarianship for LIS students and those new to the field. Offers expert tips and wisdom invaluable to those already working with teens Highlights trends, challenges, and opportunities in the changing world of how teens interact with libraries, and what they expect Emphasizes advocacy across all spectrums, including in local communities and among fellow staff who may be anxious about teens in the library Guides staff in providing readers' advisory to teens Includes ready-to-use marketing resources, templates, and sample teen services and teen volunteer plans Anyone who works with young adults will benefit from the thorough coverage provided by this volume's expert contributors. "

Your guide to dealing with something we all experience: Everyday Cruelty Have you ever... - been bullied at school, home, or work? - had a medical appointment that was too short to be useful? - had to fight with an insurance company? Everyday cruelty is everywhere there are people: in stores, on the street, in churches, at home, in doctors' offices, in schools, and at work. We experience the effects of everyday cruelty in our bodies, minds, emotions, spirits, and even in how we act in the world. It is no easy task to live with cruelty in our daily lives without falling into "the big three" of troubling responses: denial, bitterness, and despair. Everyday Cruelty: How to Deal with Its Effects without Denial, Bitterness, or Despair guides the reader through the process of understanding how to deal with everyday cruelty while being fully aware of its power. By defining cruelty, examining how it affects us, delving into what makes it so painful, and then offering hundreds of strategies for dealing with it, Helen Kobek offers this promise: You can deal with the effects of everyday cruelty without pretending it is not happening, becoming resentful, or giving up.

Proceedings of the Future Technologies Conference (FTC) 2020, Volume 2

Getting Started with Computers

This book provides the state-of-the-art intelligent methods and techniques for solving real-world problems along with a vision of the future research. The fifth 2020 Future Technologies Conference was organized virtually and received a total of 590 submissions from academic pioneering researchers, scientists, industrial engineers, and students from all over the world. The submitted papers covered a wide range of important topics including but not limited to computing, electronics, artificial intelligence, robotics, security and communications and their applications to the real world. After a double-blind peer review process, 210 submissions (including 6 poster papers) have been selected to be included in these proceedings. One of the meaningful and valuable dimensions of this conference is the way it brings together a large group of technology geniuses in one venue to not only present breakthrough research in future technologies, but also to promote discussions and debate of relevant issues, challenges, opportunities and research findings. The authors hope that readers find the book interesting, exciting and inspiring.

Calling all cat lovers! Our newest original Mad Libs features 21 silly stories all about our furry feline friends! At only \$3.99, you can buy one for yourself and all 27 of your cats!

By definition, winning means that you competed and you came out ahead. Human nature requires us to compete in order to survive. Therefore, winning and survival have the element of success in common. To ascend to a winning position, you need a goal, a desire to achieve it, and the qualities of discipline, perseverance and action to attain it. Having your goal and setting yourself up to achieve your goal is the first step in the process. You adjust your mindset and begin to plan diligently. Goals may be as different as DNA, but methodologies have much in common. Furthermore, your plans and expectations will need adjustments as you go along. That is why the knowledge shared by these CelebrityExperts(r) in this book will be of importance to you. The advice and suggestions of these CelebrityExperts(r) are based on their experiences - both their accomplishments and their shipwrecks. The knowledge they share will allow you to make plans that can propel you in the right direction. That is the function of a mentor - to guide you where you are going

and to advise what to avoid. If you wish to develop The Winning Way to your goals, read on... You will never win if you never begin. Helen Row

Since the publication of the first edition of this book supervision has become of even greater significance in health, education and social care settings, with continuing pace in the trend towards mandatory registration, managed care and clinical governance. This fully updated and expanded edition includes new chapters on issues of diversity and the managerial role of the supervisor in context. Packed with practical examples in the key areas of personal and professional development, Joyce Scalfie and her contributors draw on three decades of clinical experience to explore frequently encountered dilemmas including: how supervisors facilitate learning the ethical bases of supervision creating and maintaining a good working alliance how supervisors can balance management and supervision roles working equitably in an increasingly diverse and pluralistic world Supervision in Clinical Practice offers a range of suggestions for providing supervision that are stimulating, creative and fun, using methods that ensure safe and open practice. It is an indispensable text for supervisors and supervisees who practice clinically in a range of professions, including applied psychology, counselling, psychotherapy, psychiatry, nursing, and social work.

The three-volume set LNCS 10277-10279 constitutes the refereed proceedings of the 11th International Conference on Universal Access in Human-Computer Interaction, UAHCI 2017, held as part of the 19th International Conference on Human-Computer Interaction, HCI 2017, in Vancouver, BC, Canada in July 2017, jointly with 14 other thematically similar conferences. The total of 1228 papers presented at the HCI 2017 conferences were carefully reviewed and selected from 4340 submissions. The papers included in the three UAHCI 2017 volumes address the following major topics: Design for All Methods and Practice; Accessibility and Usability Guidelines and Evaluation; User and Context Modelling and Monitoring and Interaction Adaptation; Design for Children; Sign Language Processing; Universal Access to Virtual and Augmented Reality; Non Visual and Tactile Interaction; Gesture and Gaze-Based Interaction; Universal Access to Health and Rehabilitation; Universal Access to Education and Learning; Universal Access to Information and Media; and Design for Quality of Life Technologies.

'Inclusive Designing presents the proceedings of the seventh Cambridge Workshop on Universal Access and Assistive Technology (CWUAAT '14). It represents a unique multi-disciplinary workshop for the Inclusive Design Research community where designers, computer scientists, engineers, architects, ergonomists, policymakers and user communities can exchange ideas. The research presented at CWUAAT '14 develops methods, technologies, tools and guidance that support product designers and architects to design for the widest possible population for a given range of capabilities, within a contemporary social and economic context. In the context of developing demographic changes leading to greater numbers of older people and people with disabilities, the general field of Inclusive Design Research strives to relate the capabilities of the population to the design of products. Inclusive populations of older people contain a greater variation in sensory, cognitive and physical user capabilities. These variations may be co-occurring and rapidly changing leading to a demanding design environment. Recent research developments have addressed these issues in the context of: governance and policy; daily living activities; the workplace; the built environment, Interactive Digital TV and Mobile communications. Increasingly, a need has been identified for a multidisciplinary approach that reconciles the diverse and sometimes conflicting demands of Design for Ageing and Impairment, Usability and Accessibility and Universal Access. CWUAAT provides a platform for such a need. This book is intended for researchers, postgraduates, design practitioners, clinical practitioners, and design teachers.
