

Brita Memo User Guide

The mission UNESCO, as defined just after the end of World War II, is to build 'the defenses of peace in the minds of men'. In this book, historians trace the routes of selected UNESCO mental engineering initiatives from its headquarters in Paris to the member states, to assess UNESCO's global impact.

The objective of this paper is to provide a global review of the non-wood uses of conifers. For the purposes of this paper, conifers are defined as trees and shrubs of the botanical orders Coniferales, Taxales and Ginkgoales (Rushforth 1987). Although some services are briefly mentioned, the focus of this paper is on products which conifers provide species, which are important sources of non-wood forest products, and places where these products are harvested. With the exception of essential oils, which can be obtained from several parts of the tree, the products described are organized by the part of the tree from which they are obtained (e.g. foliage, bark and roots, resin, seeds and cones). Where possible, data on levels of production and international trade are presented. Problems associated with the sustainable management of these products and compatibility or conflicts with other land uses are also presented. Both contemporary and historical or traditional uses of non-wood products from conifers are discussed.

Qualitative research is designed to explore the human elements of a given topic, while specific qualitative methods examine how individuals see and experience the world. Qualitative approaches are typically used to explore new phenomena and to capture individuals' thoughts, feelings, or interpretations of meaning and process. Such methods are central to research conducted in education, nursing, sociology, anthropology, information studies, and other disciplines in the humanities, social sciences, and health sciences. Qualitative research projects are informed by a wide range of methodologies and theoretical frameworks. The SAGE Encyclopedia of Qualitative Research Methods presents current and complete information as well as ready-to-use techniques, facts, and examples from the field of qualitative research in a very accessible style. In taking an interdisciplinary approach, these two volumes target a broad audience and fill a gap in the existing reference literature for a general guide to the core concepts that inform qualitative research practices. The entries cover every major facet of qualitative methods, including access to research participants, data coding, research ethics, the role of theory in qualitative research, and much more—all without overwhelming the informed reader. Key Features Defines and explains core concepts, describes the techniques involved in the implementation of qualitative methods, and presents an overview of qualitative approaches to research Offers many entries that point to substantive debates among qualitative researchers regarding how concepts are labeled and the implications of such labels for how qualitative research is valued Guides readers through the complex landscape of the language of qualitative inquiry Includes contributors from various countries and disciplines that reflect a diverse spectrum of research approaches from more traditional, positivist approaches, through postmodern, constructionist ones Presents some entries written in first-person voice and others in third-person voice to reflect the diversity of approaches that define qualitative work Key Themes Approaches and Methodologies Arts-Based Research, Ties to Computer Software Data Analysis Data Collection Data Types and Characteristics Dissemination History of Qualitative Research Participants Quantitative Research, Ties to Research Ethics Rigor Textual Analysis, Ties to Theoretical and Philosophical Frameworks The SAGE Encyclopedia of Qualitative Research Methods is designed to appeal to undergraduate and graduate students, practitioners, researchers, consultants, and consumers of information across the social sciences, humanities, and health sciences, making it a welcome addition to any academic or public library.

Extramural English in Teaching and Learning

Human Enhancement Drugs

The Economist

This book is unique in bringing together theory, research, and practice about English encountered outside the classroom – extramural English – and how it affects teaching and learning. The book investigates ways in which learners successfully develop their language skills through extramural English and provides tools for teachers to make use of free time activities in primary and secondary education. The authors demonstrate that learning from involvement in extramural English activities tends to be incidental and is currently underutilized in classroom work. A distinctive strength is that this volume is grounded in theory, builds on results from empirical studies, and manages to link theory and research with practice in a reader-friendly way. Teacher-educators, teachers and researchers of English as a foreign language and teachers of English as a second language across the globe will find this book useful in developing their use of extramural English activities as tools for language learning.

This book, based on a huge European and Asian research project, is a state-of-the-art examination of the theory and practice of system innovation through Product-Service System (PSS) design for sustainability from a trans-cultural viewpoint. PSS design incorporates innovative strategies that shift businesses away from simply designing and selling physical products to developing integrated systems of products and services that satisfy human needs. The book provides background, advice and tools for designers interested in sustainable PSSs and has a wealth of case studies for practitioners to digest.

Includes entries for maps and atlases.

The Inadequacy of Cultural Liberalism as a Guide to Major Challenges of the 21st Century

As of May 2013, 93 children previously diagnosed with regressive autism were able to shed their autism diagnosis, their symptoms, and return to an overall state of health and vitality using the protocols revealed in this book. Kerri Rivera has out very complete approach to autism recovery that includes an understanding of the importance of Biofilm theory and protocol.

recommends safe interventions that do no harm, and are helping to confront a growing epidemic. Kerri Rivera's approach includes common sense dietary recommendations, the use of supplements to restore balance to the body and immune system, as well as mild oxidative therapies to address chronic infection and inflammation. She has taken children who were in the throes of autism (meaning chronic illness) to healing. The symptoms being labeled as autism are fading away, the children are talking and socializing, and their ATEC scores prove beyond a shadow of a doubt what their parents are claiming: their children no longer have autism. Kerri Rivera's grasp of a biomedical approach to Autism recovery, paired with her passion for service has allowed families of all socioeconomic backgrounds to have what they might never have otherwise found: a means by which to help their children. This book contains over 120 testimonials from parents (and some of the children themselves) describing their journey and resulting success.

This book is open access under a CC BY 4.0 license. This book analyses the considerable variation in the shares of private provision for core services in education, health and social services, in the Scandinavian countries. The chapters compare countries, service areas, and the for-profit, non-profit and public sectors. Each focuses on different levels of change: the mix of welfare providers, national laws and regulations, governance in municipalities, nursing homes and schools, and finally, the consequences experienced by the users of the services. The authors ask which combinations of governance structures, service sector providers, and user choice give the best results for active citizenship. Promoting Active Citizenship will be of interest to students and scholars across a range of disciplines, including Public Administration and Management, Non-Profit Management, Social Policy, Innovation in Public Service, Social Care and Education and School Research.

The Art of Public Speaking is a fantastic introduction to public speaking by the master of the art—Dale Carnegie. Featured within this classic manual are hundreds of tips and tricks on how to become an efficient and effective public speaker. One of the core ideas in his books is that it is possible to change other people's behavior by changing one's reaction to them. This is a fascinating work and is thoroughly recommended for everyone.

Global Actions and Impacts

Scientific and Technical Books and Serials in Print

The onslaught of neoliberalism, austerity measures and cuts, impact of climate change, protracted conflicts and ongoing refugee crisis, rise of far right and populist movements have all negatively impacted on disability. Yet, disabled people and their allies are fighting back and we urgently need to understand how, where and what they are doing, what they feel their challenges are and what their future needs will be. This comprehensive handbook emphasizes the importance of everyday disability activism and how activists across the world bring together a wide range of activism tactics and strategies. It also challenges the activist movements, transnational and emancipatory politics, as well as providing future directions for disability activism. With contributions from senior and emerging disability activists, academics, students and practitioners from around the globe, this handbook covers the following broad themes: • Contextualising disability activism in global activism • Neoliberalism and austerity in the global North • Rights, embodied resistance and disability activism • Belonging, identity and values: how to create diverse coalitions for rights • Reclaiming social positions, places and spaces • Social media, support and activism • Campus activism in higher education • Inclusive pedagogies, evidence and activist practices • Enabling human rights and policy • Challenges facing disability activism The Routledge Handbook of Disability Activism provides disability activists, students, academics, practitioners, development partners and policy makers with an authoritative framework for disability activism.

Book culture has emerged as an extremely dynamic and border-crossing field of research, internationally and in Finland. The editors and most of the writers of this book were members of the organizing and program committees of the 18th Annual Conference of the Society for the History of Authorship, Reading and Publishing (SHARP), Book Culture from Below, that took place in Helsinki in 2010. This book provides, for the first time in English, an overview of an important epoch in Finnish book and reading history. Besides depicting book culture at the periphery of Europe, it contributes to our understanding of the power of the urbanized European literary world of the 1700s. The new reading culture that emerged in Finland during the 1700s affected readers and all levels of society in many ways. Along with other trends, the arrival of translated fiction and Enlightenment literature from Europe opened and irrevocably altered the Finns' world view. The change was especially pronounced in cities. Scholars, merchants, craftsmen, as well as military officers stationed at Helsinki's offshore Sveaborg fortress, acquired world literature and guides intended for professionals at, for example, book auctions. In this book, researchers from different fields examine the significance and influence of that era's books from cultural, historical, ideological, and social perspectives. What kinds of books did the citizens of Helsinki really buy, loan, and read during the 1700s? What topics and ideas introduced by the new literature were discussed in salons and reading circles? Who were the books' large-scale consumers? Who were the literary opinion leaders of their times? Why did people read? Did the books change their readers' lives?

Garnering a vast amount of attention from young people and parents, and from book buyers across the country, *Smashed* became a media sensation and a New York Times bestseller. Eye-opening and utterly gripping, Koren Zailckas's story is that of thousands of girls like her who are not alcoholics—yet—but who routinely use booze as a shortcut to courage and a stand-in for good judgment. With one stiff sip of Southern Comfort at the age of fourteen, Zailckas is initiated into the world of drinking. From then on, she will drink faithfully, fanatically. In high school, her experimentation will lead to a stomach pumping. In college, her excess will give way to a pattern of self-poisoning that will grow more destructive each year. At age twenty-two, Zailckas will wake up in an unfamiliar apartment in New York City, elbow her friend who is passed out next to her, and ask, "Where are we?" *Smashed* is a sober look at how

she got there and, after years of blackouts and smashups, what it took for her to realize she had to stop drinking. Smashed is an astonishing literary debut destined to become a classic.

More than a simple expository history, A Thousand Years of Nonlinear History sketches the outlines of a renewed materialist philosophy of history in the tradition of Fernand Braudel, Gilles Deleuze, and Félix Guattari, while also engaging the critical new understanding of material processes derived from the sciences of dynamics. Following in the wake of his groundbreaking War in the Age of Intelligent Machines, Manuel De Landa presents a radical synthesis of historical development over the last one thousand years. More than a simple expository history, A Thousand Years of Nonlinear History sketches the outlines of a renewed materialist philosophy of history in the tradition of Fernand Braudel, Gilles Deleuze, and Félix Guattari, while also engaging the critical new understanding of material processes derived from the sciences of dynamics. Working against prevailing attitudes that see history as an arena of texts, discourses, ideologies, and metaphors, De Landa traces the concrete movements and interplays of matter and energy through human populations in the last millennium. De Landa attacks three domains that have given shape to human societies: economics, biology, and linguistics. In every case, what one sees is the self-directed processes of matter and energy interacting with the whim and will of human history itself to form a panoramic vision of the West free of rigid teleology and naive notions of progress, and even more important, free of any deterministic source of its urban, institutional, and technological forms. Rather, the source of all concrete forms in the West's history are shown to derive from internal morphogenetic capabilities that lie within the flow of matter-energy itself.

Flexible, easy to use, just enough detail?and now the number-one best seller. With just enough detail ? and color-coded links that send students to more detail if they need it ? this is the rhetoric that tells students what they need to know and resists the temptation to tell them everything there is to know. Designed for easy reference ? with menus, directories, and a combined glossary/index. The Third Edition has new chapters on academic writing, choosing genres, writing online, and choosing media, as well as new attention to multimodal writing. The Norton Field Guide to Writing is available with a handbook, an anthology, or both ? and all versions are now available as low-cost ebooks.

Vocabulary in Use Pre-intermediate and Intermediate is a vocabulary book for intermediate learners of English, primarily designed as a self-study reference and practice book, but which can also be used for classroom work. In its style and format it is similar to its upper intermediate and advanced equivalent, English Vocabulary in Use. - 100 easy-to-use units: over 2,500 vocabulary items in a wide range of topic areas are presented, contextualise and explained and explained on left-hand pages with a variety of follow-up activities on right-hand pages. - Helps to build on and expand existing vocabulary. - Suggests tips and techniques for good learning habits. - Designed to be flexible: can be used both for self-study and in class. - Provides a comprehensive key with not only answers to the exercises but also more comments on how the language is used. - Includes a detailed index with phonetic transcriptions.

Ethical Issues in Developing Business Policies Ethics and the Conduct of Business is a comprehensive and up-to-date discussion of the most prominent issues in the field of business ethics, and the major positions and arguments on these issues. Numerous real-life examples and case studies are used throughout the book to increase understanding of issues, stimulate class discussion, and show the relevance of the discussion to real-life business practice. Note: The focus of Ethics and the Conduct of Business is primarily on ethical issues that corporate decision makers face in developing policies about employees, customers, and the general public. The positions and arguments on these issues are taken from a wide variety of sources, including economics and the law. Teaching and Learning Experience Improve Critical Thinking - A substantial amount of legal material is contained within Ethics and the Conduct of Business. Not only because the law addresses many ethical issues, but also because the management decision-making process must take into account relevant legal practices. Engage Students - This book employs fifty case studies that firmly illustrate the wide variety of issues pertaining to business ethics and enable students to engage in ethical decision making. Support Instructors - Teaching your course just got easier! You can create a Customized Text or use our Instructor's Manual, Electronic "MyTest" Test Bank or PowerPoint Presentation Slides. Plus, a substantial number of cases within Ethics and the Conduct of Business provide the opportunity for a case-study approach or a combined lecture/discussion format for your course.

This edition of the Reader's Companion accompanies Skills Matter: Additional Results from the Survey of Adult Skills that reports the results from the 39 countries and regions that participated in the 3 rounds of data collection in the first cycle of PIAAC, with a particular focus on the 6 countries that participated in the third round of the study (Ecuador, Hungary, Kazakhstan, Mexico, Peru and the United States). It describes the design and methodology of the survey and its relationship to other international assessments of young students and adults.

Despite increasing interest in the use of human enhancement drugs (HEDs), our understanding of this phenomenon and the regulatory framework used to address it has lagged behind. Encompassing public health, epidemiology, neuroethics, sport science, criminology, and sociology, this book brings together a broad spectrum of scholarly insights and research expertise from leading authorities to examine key international issues in the field of HEDs. As "traditional" and other "new" drug markets have occupied much of the academic attention, there has been a lack of scholarly focus on human enhancement drugs. This book provides readers with a much-needed understanding of the illicit

drug market of HEDs. The authors, from a variety of cultural contexts, disciplines and perspectives, include both academics and practitioners. Topics explored in this collection amongst others include: • The anti-doping industry and performance and image enhancing drugs • Steroids and gender • The use of cognitive enhancing drugs in academia • The use of sunless synthetic tanning products • The (online) trade of HEDs • Regulations of the enhancement drugs market This collection will serve as a reference for students, academics, practitioners, law enforcement and others working in this area to reflect on the current state of research and consider future priorities. This detailed exploration will provide a valuable knowledge base for those interested in human enhancement drugs, while also promoting critical discussion.

Recommended Children's Books

The Sounds of Early Cinema is devoted exclusively to a little-known, yet absolutely crucial phenomenon: the ubiquitous presence of sound in early cinema. "Silent cinema" may rarely have been silent, but the sheer diversity of sound(s) and sound/image relations characterizing the first 20 years of moving picture exhibition can still astonish us. Whether instrumental, vocal, or mechanical, sound ranged from the improvised to the pre-arranged (as in scripts, scores, and cue sheets). The practice of mixing sounds with images differed widely, depending on the venue (the nickelodeon in Chicago versus the summer Chautauqua in rural Iowa, the music hall in London or Paris versus the newest palace cinema in New York City) as well as on the historical moment (a single venue might change radically, and many times, from 1906 to 1910). Contributors include Richard Abel, Rick Altman, Edouard Arnoldy, Mats Björkin, Stephen Bottomore, Marta Braun, Jean Châteauevert, Ian Christie, Richard Crangle, Helen Day-Mayer, John Fullerton, Jane Gaines, André Gaudreault, Tom Gunning, François Jost, Charlie Keil, Jeff Klenotic, Germain Lacasse, Neil Lerner, Patrick Loughney, David Mayer, Dominiq Nasta, Bernard Perron, Jacques Polet, Lauren Rabinovitz, Isabelle Raynauld, Herbert Reynolds, Gregory A. Waller, and Rashit M. Yangirov.

Written for both theoretical and practical purposes, *Dysfunctional Culture* discusses how to understand and identify political ideologies as cultural systems. Using examples related to family morality and reproduction, this book argues that belief in individual rights as the main basis for morality is not an adequate response to the moral challenges of the future.
