The old saying goes, "To the man with a hammer, everything looks like a nail." But anyone who has done any kind of project knows a hammer often isn't enough. The more tools you have at your disposal, the more likely you'll use the right tool for the job - and get it done right. The same is true when it comes to your thinking. The quality of your outcomes depends on the mental models in your head. And most people are going through life with little more than a hammer.

Enduring Success addresses a key question in business today: How can companies succeed over time? To learn the source of enduring greatness, author Christian Stadler directed a team of eight researchers in a six-year study of some of Europe's oldest and most stellar

companies, targeting nine that have survived for more than 100 years and have significantly outperformed the market over the past fifty years. Readers may wonder, "Why European companies?" Yet, Europe is the ideal place to seek the key to long-term success; half of the Fortune Global 500 companies that are 100 years old or older can be found in Europe, as can 72 of the 100 oldest family businesses in the world. Fifteen years after Collins and Porras' Built to Last, this new book incorporates fresh insights

Look for Brené Brown's new podcast, Dare to Lead, as well as her ongoing podcast Unlocking Us! NAMED ONE OF THE BEST BOOKS OF THE YEAR BY BLOOMBERG Leadership is not about titles, status, and wielding power. A leader is anyone who takes responsibility for recognizing the potential in people and ideas, and has the courage to develop that potential. When we dare to lead, we don't pretend to have the right answers; we stay curious and ask the right questions. We don't see power as finite and hoard it; we know that power becomes infinite when we share

it with others. We don't avoid difficult conversations and situations; we lean into vulnerability when it's necessary to do good work. But daring leadership in a culture defined by scarcity, fear, and uncertainty requires skill-building around traits that are deeply and uniquely human. The irony is that we're choosing not to invest in developing the hearts and minds of leaders at the exact same time as we're scrambling to figure out what we have to offer that machines and AI can't do better and faster. What can we do better? Empathy, connection, and courage, to start. Four-time #1 New York Times bestselling author Bren é Brown has spent the past two decades studying the emotions and experiences that give meaning to our lives, and the past seven years working with transformative leaders and teams spanning the globe. She

found that leaders in organizations ranging from small entrepreneurial startups and family-owned businesses to nonprofits, civic organizations, and Fortune 50 companies all ask the same question: How do you cultivate braver, more daring leaders, and how do you embed the value of courage in your culture? In this new book, Brown uses research, stories, and examples to answer these questions in the no-BS style that millions of readers have come to expect and love. Brown writes, “One of the most important findings of my career is that daring leadership is a collection of four skill sets that are 100 percent teachable, observable, and measurable. It’s learning and unlearning that requires brave work, tough conversations, and showing up with your whole heart. Easy? No. Because choosing courage over comfort is not always

Drawing on their many years of first-hand experience working in private industry and serving as business consultants, Collins and Lazier cover all the essential aspects of attaining corporate greatness--supported by dozens of real-life examples of firms as diverse as Mrs. Fields Cookies, Continental Cablevision, and Giro Sport Design. In *Beyond Entrepreneurship* they provide tested ideas and methods for developing the most effective leadership style for your personality characteristics... and developing the 7 key elements of a leadership style to inspire real loyalty and dedication. Then, they move on to an often overlooked function of leadership: catalyzing a vision. Every great company has at its core a compelling vision. You'll discover a clear and useful framework for setting

corporate vision--a framework that removes the confusion about this important and elusive topic, yet retains the "spark" that's an essential quality of a motivating and effective overall vision. Collins and Lazier also discuss and illustrate the four key principles of setting business strategy, and explain how to resolve critical strategic issues--like whether to lead a market or follow--faced by every small to mid-sized firm. The authors present a set of concepts and practical suggestions for stimulating creativity and keeping your company innovative as it evolves. Finally, they spell out how to translate vision and strategy into effective business tactics, the day-to-day details of producing consistent excellence. Decline can be avoided. Decline can be detected. Decline can be reversed. Amidst the desolate landscape of fallen great companies, Jim Collins began to wonder: How do the mighty fall? Can decline be detected early and avoided? How far can a company fall before the path toward doom becomes inevitable and unshakable? How can companies reverse course? In *How the Mighty Fall*, Collins confronts these questions, offering leaders the well-founded hope that they can learn how to stave off decline and, if they find themselves falling, reverse their course. Collins' research project—more than four years in duration—uncovered five step-wise stages of decline: Stage 1: Hubris Born of Success Stage 2: Undisciplined Pursuit of More Stage 3: Denial of Risk and

Download Free Built To Last Jim Collins Complete

Peril Stage 4: Grasping for Salvation Stage 5: Capitulation to Irrelevance or Death By understanding these stages of decline, leaders can substantially reduce their chances of falling all the way to the bottom. Great companies can stumble, badly, and recover. Every institution, no matter how great, is vulnerable to decline. There is no law of nature that the most powerful will inevitably remain at the top. Anyone can fall and most eventually do. But, as Collins' research emphasizes, some companies do indeed recover—in some cases, coming back even stronger—even after having crashed into the depths of Stage 4. Decline, it turns out, is largely self-inflicted, and the path to recovery lies largely within our own hands. We are not imprisoned by our circumstances, our history, or even our staggering defeats

The Challenge Built to Last, the defining management study of the nineties, showed how great companies triumph over time and how long-term sustained performance can be engineered into the DNA of an enterprise from the very beginning. But what about the company that is not born with great DNA? How can good companies, mediocre companies, even bad companies achieve

enduring greatness? The Study For years, this question preyed on the mind of Jim Collins. Are there companies that defy gravity and convert long-term mediocrity or worse into long-term superiority? And if so, what are the universal distinguishing characteristics that cause a company to go from good to great? The Standards Using tough benchmarks, Collins and his research team identified a set of elite companies that made the leap to great results and sustained those results for at least fifteen years. How great?

After the leap, the good-to-great companies generated cumulative stock returns that beat the general stock market by an average of seven times in fifteen years, better than twice the results delivered by a composite index of the world's greatest companies, including Coca-Cola, Intel, General Electric, and Merck. The Comparisons The research team contrasted the good-to-great companies with a carefully selected set of comparison companies that failed to make the leap from good to great. What was

Download Free Built To Last Jim Collins Complete

different? Why did one set of companies become truly great performers while the other set remained only good? Over five years, the team analyzed the histories of all twenty-eight companies in the study. After sifting through mountains of data and thousands of pages of interviews, Collins and his crew discovered the key determinants of greatness -- why some companies make the leap and others don't. The Findings The findings of the Good to Great study will surprise many readers and shed light on virtually every area of

management strategy and practice. The findings include: Level 5 Leaders: The research team was shocked to discover the type of leadership required to achieve greatness. The Hedgehog Concept (Simplicity within the Three Circles): To go from good to great requires transcending the curse of competence. A Culture of Discipline: When you combine a culture of discipline with an ethic of entrepreneurship, you get the magical alchemy of great results. Technology Accelerators: Good-to-great companies

think differently about the role of technology. The Flywheel and the Doom Loop: Those who launch radical change programs and wrenching restructurings will almost certainly fail to make the leap.

“Some of the key concepts discerned in the study,” comments Jim Collins, “fly in the face of our modern business culture and will, quite frankly, upset some people.” Perhaps, but who can afford to ignore these findings?

six-year research project at the Stanford University Graduate School of Business, Collins and Porras took eighteen truly exceptional and long-lasting companies -- they have an average age of nearly one hundred years and have outperformed the general stock market by a factor of fifteen since 1926 -- and studied each company in direct comparison to one of its top competitors. They examined the companies from their very beginnings to the present day -- as start-ups, as midsize

companies, and as large corporations. Throughout, the authors asked: "What makes the truly exceptional companies different from other companies?" What separates General Electric, 3M, Merck, Wal-Mart, Hewlett-Packard, Walt Disney, and Philip Morris from their rivals? How, for example, did Procter & Gamble, which began life substantially behind rival Colgate, eventually prevail as the premier institution in its industry? How was Motorola able to move from a

humble battery repair business into integrated circuits and cellular communications, while Zenith never became dominant in anything other than TVs? How did Boeing unseat McDonnell Douglas as the world's best commercial aircraft company -- what did Boeing have that McDonnell Douglas lacked? By answering such questions, Collins and Porras go beyond the incessant barrage of management buzzwords and fads of the day to discover timeless qualities that

manager and business school professor exposes the dangerous myths, fantasies, and delusions that pervade much of the business world today.

Nonprofit leadership is messy Nonprofits leaders are optimistic by nature. They believe with time, energy, smarts, strategy and sheer will, they can change the world. But as staff or board leader, you know nonprofits present unique challenges. Too many cooks, not enough money, an abundance of passion. It's enough to make you feel overwhelmed and alone. The people you help need you to be successful. But there are so many obstacles: a

micromanaging board that doesn't understand its true role; insufficient fundraising and donors who make unreasonable demands; unclear and inconsistent messaging and marketing; a leader who's a star in her sector but a difficult boss... And yet, many nonprofits do thrive. Joan Garry's Guide to Nonprofit Leadership will show you how to do just that. Funny, honest, intensely actionable, and based on her decades of experience, this is the book Joan Garry wishes she had when she led GLAAD out of a financial crisis in 1997. Joan will teach you how to:

- Build a powerhouse board
