stunning new concept
has powerful
strategic implications
for businesses large

Drawing on years of
research covering
hundreds of
industries both local
and global, The Rule
of Three documents
the evolution of
markets into two

complementary sectors -- generalists, which cater to a large, mainstream group of customers; and specialists, which satisfy the needs of customers at both the high and low ends of the market. Any company caught in the middle ("the ditch") is likely to be swallowed up or

Sisodia show how
most markets

counterintuitive
insights, with

for the "Big 3"

players, as well as for mid-sized companies that may want to mount a challenge and for specialists striving to flourish in the shadow of industry giants. The book explains how to recognize signs of market disruptions that can result in serious reversals and upheavals for

companies caught
unprepared. Such
disruptions include

new technologies,

cities with a succession of antipoverty

initiatives, yet these urban neighborhoods continue to decline.

According to David Rusk, focusing on programs aimed at improving inner-city neighborhoods--playing the "inside game"--is a losing strategy. Achieving

Burger King

real improvement requires matching the "inside game" with a strong "outside game" of regional strategies to overcome growing fiscal disparities, concentrated poverty, and urban sprawl. In this persuasive book filled with personal observations as well as his trademark mastery of census

statistics, Rusk argues that state legislatures must set new "rules of the game." He believes those rules require regional revenue or tax base sharing to reduce fiscal disparity, regional housing policies to ensure that all new developments have their fair share of low- and moderate-

particularly crucial
where regions are
