They realized that people won't truly buy into a product, service, movement, or idea until they understand the WHY behind it. However, despite being the 8th most populous country in the world, it ranks 41st in terms of GDP and 161st in terms of GDP per capita. authors of 'Knowledge, Productivity, and Innovation in Nigeria' believe that the goal of becoming a top-twenty economy can only be achieved if Nigeria makes the transition to a new economy rooted in the 21st century that harnesses the power of knowledge and avoids a static oil-based growth strategy. Knowledge has always been central to development, but new technologies have made it globally accessible. Countries such as the Republic of South Korea, India, and the United States that have exploited new technologies and know-how have pushed their innovation and productivity frontiers. Countries that have failed to do so risk remaining mired in poverty. In order to achieve Vision 2020, Nigeria
