It shows that, to understand the legal framework underlying the daily operations of family businesses, one needs legal analysis, empirical data, psychological and sociological knowledge. The book works on the premise that, since many businesses have been founded by families, practitioners need to develop an understanding of the legal background of such businesses and build up experience to be able to create contracts, trusts, foundations and other legal mechanisms to give shape to systems and procedures for the transfer of shares and control within the family. Comparing the national legal order, techniques, and mechanisms in a range of countries, the book examines parallel developments in these fields of law across the world. Finally, it demonstrates the room for companies, shareholders and the members of a family to develop individual solutions within the legal framework for transferring businesses and shares to the next generation.

This book selects leading, innovative and influential Chinese maritime judgments and presents full translation of them, with brief summary, to the readers so that they can have insights of how the Chinese maritime judges interpret, apply and develop Chinese maritime law in practice. China trades with other states in trillions of USD every year, and about 95% of the cargoes are carried by ocean-going ships calling at hundreds of Chinese ports each single day. Due to the enormous and steadily growing trade volume and shipping activities, foreign ships, companies and persons are often caught by the Chinese maritime law and court. The parties involved and their lawyers are more than ever enthusiastic to study Chinese maritime cases in order to deal with their own cases properly or, if possible, predict the potential problems and avoid the disputes outright. Derived from the renowned multi-volume International Encyclopaedia of Laws, this practical analysis of the law of contracts in Slovenia covers every aspect of the subject – definition and classification of contracts, contractual liability, relation to the law of property, good faith, burden of proof, defects, penalty clauses, arbitration clauses, remedies in case of non-performance, damages, power of attorney, and much more. Lawyers who handle transnational contracts will appreciate the explanation of fundamental differences in terminology, application, and procedure from one legal system to another, as well as the international aspects of contract law. Subsequent chapters cover the doctrines of 'relative effect', termination of contract, and remedies for non-performance. The second part of the book, recognizing the need to categorize an agreement as a specific contract in order to determine the rules which apply to it, describes the nature of agency, sale, lease, building contracts, and other types of contract. Facts are presented in such a way that readers who are unfamiliar with specific terms and concepts in varying contexts will fully grasp their meaning and significance. Business and law are in continuous communication. In seeking profits and growth, businesses transform the society and, in the process, create new challenges. Law responds by controlling, regulating and most times facilitating business activities. Several court judgements from the apex courts have acted as the frontiers of business law. Leading judgements from the apex courts resolve close contest of ideas, change course of businesses and allow for opening of new business avenues. Business Lawsuits and Disputes is an introduction to these frontier cases. It invites academics, students, business executives and business leaders to understand the law so that they can define businesses of tomorrow. The cases from the United Kingdom Supreme Court and the Supreme Court of India touch upon four aspects: functional and executive learning; organisational and leadership ideas; future planning; and education and learning. This book makes the pathbreaking cases accessible and relevant to academics, students, business managers and leaders.

Inhaltsangabe:Abstract: The dynamics of the relationship between service recipient and service provider in IS outsourcing relationships recently gained increased attention as relationships are believed to have a considerable influence on IS outsourcing success. This thesis adds to this growing field of interest by developing an IS outsourcing relationship framework in the form of a process model. Three rather disjointed areas of research, namely contractual governance, relational norms, and control, have been set in a common context by interrelating them as the three main governance modes that jointly influence the relationship. One in-depth case study has been conducted in order to provide first empirical evidence and to gain deeper insights into the dynamics of relationship governance. The proposed model could be confirmed in general, revealing the following insights: first, contractual and relational governance modes determine the rules that govern the relationship while control is used to execute and enforce specified rules. All three jointly influence the state of the relationship. Second, relational norms have only been observed at an individual level and not at an organizational one. Third, formal control modes have been used to execute and enforce relational norms. This finding contradicts current control theory. Fourth, while contractual and relational governance are seen as complementary and equally important, relational norms have been left completely unmanaged in the observed organization due to a lack of adequate approaches. These results are discussed in detail to outline opportunities for further research.
