As the service sector expands into the global economy, a new science of service is emerging, dedicated to encouraging service innovation by applying scientific understanding, engineering discipline, and management practice to designing, improving, and scaling service systems. Handbook of Service Science takes the first major steps to clarifying the definition, role, and future of this field. Incorporating work by scholars from across the spectrum of service research, the volume provides multidisciplinary perspectives on the nature and theory of service, on current research and practice in service design, operations, delivery, and innovation of service, and on future opportunities and potential in service research. Handbook of Service Science provides a comprehensive reference suitable for a wide reaching audience including researchers, practitioners, managers, and students who aspire to contribute to or about or to create a deeper scientific foundation for service design and engineering, service operations and marketing, and service management and innovation.

How do scholars research and interpret marginalized populations, especially those that are seldom recognized as marginalized or whose sources are believed to be rare?

Combining intersectional feminism and public history methodologies, ' A Girl Can Do:

Recognizing and Representing Girlhood ' reflects on how girlhood is found, researched, and interpreted in museums, archives, and historic sites. Defining " girl " as " self-identifying females under the age of 21, " ' A Girl Can Do ' lays the groundwork for understanding girlhood, its constructs, and its marginalization while providing faculty, students, and working professionals with ten case studies on researching and working with girlhood. Contributors include archaeologists, archivists, curators, educators, and historians who demonstrate how adding a girl studies lens fosters greater inclusivity and diversity in our work. Whether studying spatial techniques of marginalization in colonial Peru, the daybooks as records of girlhood in late-nineteenth century Sweden, or collaborating with self-identifying fangirls to produce a pop-up exhibition, the contributors demonstrate the variety of sources and methods that can be used to interpret this oft-overlooked population. Throughout, ' A Girl Can Do ' petitions for collaborative and creative thinking in how we can reframe and reinterpret our sources – both traditional and overlooked – to shed new light on how girls have contributed to, and provide frames of reference for, human history and culture.
