The growth and

period is one of the most important phenomena of our time. This volume, originally published in 1981 provides a comprehensive and detailed review of both the theoretical and policy issues at a time when the

subject had reached a watershed, after the controversies of the 1970s. The book provides a balanced discussion of major themes such as the development of modern theories of international production; the

impact of the MNE

and the structure of  
the international

response of
