*The Challenge Built to Last, the defining management study of the nineties, showed how great companies triumph over time and how long-term sustained performance can be engineered into the DNA of an enterprise from the very beginning. ***companies achieve enduring greatness? The Study For years, this question preyed on the mind of Jim Collins. Are there companies that defy gravity and convert long-term mediocrity or worse into long-term superiority? And if so, what are the universal distinguishing characteristics that cause a company to go from good to great? The Standards Using tough benchmarks, Collins and his research team identified a set of elite companies that made the leap to great results and sustained those results for at least fifteen years. How great? After the leap, the good-to-***

After sifting through mountains of data and thousands of pages of interviews, Collins and his crew discovered the key determinants of greatness -- why some companies make the leap and others don't. The Findings The findings of the Good to Great study will surprise many readers and shed light on virtually every area of management strategy and practice. In this book we demonstrate a mode of teacher education that is practical in a non-technical sense and relies on Dewey's notion of curriculum as the reconstruction of experience. We present a curriculum that emerged through collaborative self-reflection and seeks to reconstruct personal histories of schooling. As four former preservice teachers and their instructor, we engaged in jointly constructed autobiographical inquiry in order to generate data on our own past and on our current histories of teaching and learning. We wanted to illuminate parts of our lives in schools that until now belonged to our 'normal' and taken-for-granted past. We did this in order*
