Comparative Income Taxation

Problems and Solutions in Income Tax (including Short Questions)

The Crafts Business Answer Book

The purpose of this book is to compare different solutions adopted by nine industrialized countries to common problems of income tax design. As in other legal domains, comparative study of income taxation can provide fresh perspectives from which to examine a particular national system. Increasing economic globalization also makes understanding foreign tax systems relevant to a growing set of transnational business transactions. Comparative study is, however, notoriously difficult. Full understanding of a foreign tax system may require mastery not only of a foreign language, but also of foreign business and legal cultures. It would be the work of a lifetime for a single individual to achieve that level of understanding of the nine income taxes compared in this volume. Suppose, however, that an international group of tax law professors, each expert in his own national system, were asked to describe how that system resolved specific problems of income tax design with respect to individuals, business organizations, and international transactions. Suppose further that the leaders of the group wrote the resulting answers into a single continuous exposition, which was then reviewed and critiqued by a wider group of tax teachers. The resulting text would provide a convenient and comprehensive introduction to foreign approaches to income taxation for teachers, students, policy-makers and practitioners. That is the path followed by Hugh Ault and Brian Arnold and their collaborators in the development of this fascinating book. Henceforth, a reader interested in how other developed countries resolve such structural issues as the taxation of fringe benefits, the effect of unrealized appreciation at death, the classification of business entities, expatriation to avoid taxes, and so on, can turn to this volume for an initial answer. This book should greatly facilitate comparative analysis in teaching and writing about taxation in the US and elsewhere.

The Sales and Use Tax Answer Book is the key reference source for which practitioners have been searching. Not only is it comprehensive and clear; it also provides extensive citation to important case and statutory law. Forty-five states and the District of Columbia impose a sales tax on the retail sale of tangible personal property and selected services. In addition, there are 7,500 cities, municipalities, towns, school districts, counties, and other special taxing districts that levy sales and use taxes. The varying rates, the changing jurisdictional boundaries, the different tax bases, and the often inconsistent and contradictory interpretations of similarly worded statutes are all covered. The book also includes a chapter on sales tax reforms, particularly the Streamlined Sales Tax and a chapter on the gross receipts taxes that have been enacted in various states. The 2021 edition of the Sales and Use Tax Answer Book continues to provide coverage of topics such as subjects of sales and use tax, taxable persons, taxable transactions, interstate and extraterritorial transactions, constitutional issues and the latest updates on the Streamlined Sales Tax. Also included are case summaries which cover such areas as statistical sampling methodology, nexus, collection of sales tax by remote sellers, sales tax and the requirements of the commerce clause, sales made through independent contractors or brokers, sales and use tax in internet/electronic commerce, collection of use tax by a remote seller and minimum contacts requirements for out-of-state retailers.
