Hard-headed evidence on why the returns from investing in girls are so high that no nation or family can afford not to educate their girls. Gene Sperling, author

of the seminal 2004 report published by the Council on Foreign Relations, and Rebecca Winthrop, director of the Center for Universal Education, have written this definitive book on the importance of girls' education.

As Malala Yousafzai expresses in her foreword, the idea that any child could be denied an education due to poverty, custom, the law, or terrorist threats is just wrong and unimaginable. More than 1,000 studies have provided evidence that high-quality girls' education around the world leads to wide-ranging returns: Better outcomes in economic areas of growth and

incomes Reduced rates of infant and maternal mortality Reduced rates of child marriage Reduced rates of the incidence of HIV/AIDS and malaria Increased agricultural productivity

Increased resilience to natural disasters Women's

empowerment What Works in Girls' Education is a compelling work for both concerned global citizens, and any academic, expert, nongovernmental organization (NGO) staff member, policymaker, or journalist seeking to dive into the evidence and policies on girls' education.

King of the Wind

Co-authored by an interprofessional

collaborative team of physicians and

nurses, Merenstein & Gardner's Handbook

of Neonatal Intensive Care, 9th Edition is

the leading resource for interprofessional,

collaborative care of critically ill

newborns. It offers comprehensive

coverage with a unique interprofessional

collaborative approach and a real-world

perspective that make it a practical guide

for both nurses and physicians. The new

ninth edition features a wealth of expanded

content on delivery-room care; new

evidence-based care "bundles"; palliative

care in the NICU; interprofessional

collaborative care of parents with

depression, grief, and complicated grief;

and new pain assessment tools. Updated

high-quality references have also been

Parent Teaching boxes outline the relevant information to be shared with a patient's caregivers. Critical Findings boxes outline symptoms and diagnostic findings that require immediate attention to help the provider prioritize assessment data and steps in initial care. Case studies demonstrate how to apply essential content to realistic clinical scenarios for application-based learning. NEW! Updated content throughout reflects the latest evidence-based practice, national and international guidelines, and current protocols for interprofessional collaborative practice in the NICU. NEW! Up-to-date, high-quality references are now reintegrated into the text for quick retrieval, making it easier for clinicians to locate research evidence and standards of care with minimal effort. NEW! Expanded content on delivery-room care includes the impact of staffing on quality of care,

delayed cord clamping, resuscitation, and more. NEW! Coverage of the new

evidence-based care "bundles" keeps

clinicians up to date on new guidelines that

have demonstrated improved outcomes of

very preterm infants. NEW! Coverage of

new pain assessment tools equips NICU

providers with essential resources for

maintaining patient comfort. NEW!

Expanded coverage of palliative care in the

NICU provides the tools needed to ensure

patient comfort. NEW! Expanded

coverage of interprofessional collaborative

care of parents with depression, grief, and

complicated grief prepares clinicians for

this essential area of practice.

Here's a rich pictorial review of normal

and abnormal human prenatal

development. For each body system or

region, you'll find a brief description of the

developmental plan, with key concepts and

terminology, followed by discussions of

histological principles, the classification of congenital defects, and basic cellular, molecular, and genetic concepts. An emphasis on morphological patterns in the embryo and fetus makes it easy to understand the structure and function of the adult body and the embryonic basis of birth defects. Summary tables and terminology sections at the end of each chapter, plus an appendix with all major congenital defects and their embryonic basis, make it easy to review course material and prepare for the USMLE.

A look at the revolution in game live streaming and esports broadcasting Every day thousands of people broadcast their gaming live to audiences over the internet using popular sites such as Twitch, which reaches more than one hundred million viewers a month. In these new platforms for interactive entertainment, big esports

events featuring digital game competitors live stream globally, and audiences can interact with broadcasters—and each other—through chat in real time. What are the ramifications of this exploding online industry? Taking readers inside home studios and backstage at large esports events, *Watch Me Play* investigates the rise of game live streaming and how it is poised to alter how we understand media and audiences. Through extensive interviews and immersion in this gaming scene, T. L. Taylor delves into the inner workings of the live streaming platform Twitch. From branding to business practices, she shows the pleasures and work involved in this broadcasting activity, as well as the management and governance of game live streaming and its hosting communities. At a time when gaming is being reinvented through social media, the potential of an ever-growing audience is transforming user-

This program targets the learning needs of physicians, nurses, respiratory therapists and others involved in the care of young infants with CHD. angle of vision on the ways in which members in Christian congregations and Jewish synagogues experienced belonging and expressed their identities within the Greco-Roman world. The many other groups of immigrants throughout the cities of the empire provide a particularly appropriate framework for understanding both synagogues of Judeans and groups of Jesus-followers as minority cultural groups in these same contexts. Moreover, there were both shared means of

adversity and trauma can have on the mental health and wellbeing of young people, and how we can strengthen resilience and support recovery. Addressing Adversity presents evidence, insight, direction and case studies for commissioners, providers and practitioners in order to stimulate further growth in adversity and trauma-informed care, and spark innovation and good practice across England. Section 1: Understanding adversity, trauma and resilience includes evidence and analysis of the impact that adverse childhood experiences and trauma have on children and young people ' s mental health and wider outcomes across the lifecourse. Section 2: Addressing childhood adversity and trauma includes insights from the NHS in England,

organisations and clinicians working with children and young people who have experienced forms of adversity and trauma. Section 3: Emerging good practice includes insight, case studies and working examples of adversity and trauma-informed service models being developed across England. The collection ends with an agenda for change, calling on all Directors of Public Health, commissioners and providers to make adversity and trauma-informed care a priority in their locality.

presents a practical, easy-to-understand system for 12-Lead ECG interpretation and assessment. Based on the nationally reknown 12-lead ECG workshop, "Multi-Lead Medics." A focus on the " need to know " information and a large number of practice cases—with over 400 actual 12-leads—provides students with the solid background and extensive hands-on practice that will help them gain confidence and build competence quickly.
