From the award-winning and bestselling author of Ghost Wars and Directorate S, a trek across a socially and politically damaged South Asia Bestselling author Steve Coll is one of the preeminent journalists of the twenty-first century. His last two books, the Pulitzer Prize-winning Ghost Wars and New York Times besteller The Bin Ladens, have been praised for their creative insight and complex yet compelling narratives-and have put him on par with journalists such as the legendary Bob Woodward. Now, for the first time ever, the paperback edition of On the Grand Trunk Road is finally available, revised and updated with new material. Focusing on Coll's journeys in conflict-ridden India, Pakistan, Bangladesh, Sri Lanka, Nepal, and Afghanistan as a bureau chief for The Washington Post, On the Grand Trunk Road reveals a little-seen area of the world where violence, corruption, and greed have had devastating effects on South Asians from all walks of life.

This publication provides the United States Army and United States Marine Corps (USMC) commanders, artillerymen, and meteorology (MET) crew members with tactics, techniques, and procedures for the employment of MET sections. This publication describes the equipment and tasks required to develop MET data from the selection of the MET station location to the dissemination of the MET data. This manual describes current and emerging TA organizations. These organizations include target acquisition batteries and radar platoons of active and reserve components, the corps target acquisition detachment (CTAD), radar platoons of the interim brigade combat team (IBCT) and interim division artillery (IDIVARTY), and the STRIKER platoon. Technical and tactical considerations for employing weapons locating radars are discussed in detail. This includes the AN/TPQ-47 that is currently being developed. New information contained in this manual includes duties and responsibilities for key TA personnel, rehearsals, stability operations and support operations, rotary and fixed wing radar movement procedures, and automated target data processing. The methodology used by weapons locating radars to acquire, track and locate threat weapon systems is also discussed.

Apprentice Operations Systems Management Specialist (AFSC 27132): Flight management

The General And Me is the story about me, an enlisted member of the USAF, an airplane, and a three star general. In 1954, I was sent overseas to the Northeast Air Command (NEAC), where I was assigned to the crew of the commanding general's aircraft, a VC-54E serial number 44-9076. An assignment that lasted until the command was deactivated in 1957. During every take-off and landing, the general was in the pilot's seat. The General And Me includes witnessed accounts of flying with the general in every imaginable situation. There were some thoughtless behavior and substandard duties performed by subordinates that came to the general's attention. While the reader will find them humorous, they were mentally terrifying for the individual involved. The general's three star rank and well-known reputation struck fear and intimidation into the hearts of the weak and strong alike.
