Here, under one cover, you'll have access to nearly 500 major medical book publishers in 39 countries, a listing of over 12,000 medical journals, and 800 electronic databases. Publishers names, addresses, telephone and fax numbers and ISBN prefixes are included.

This book concisely reviews important advances in radiation oncology, providing practicing radiation oncologists with a fundamental understanding of each topic and an appreciation of its significance for the future of radiation oncology. It explores in detail the impact of newer imaging modalities, such as multiparametric magnetic resonance imaging (MRI) and positron emission tomography (PET) using fluorodeoxyglucose (FDG) and other novel agents, which deliver improved visualization of the physiologic and phenotypic features of a given cancer, helping oncologists to provide more targeted radiotherapy and assess the response. Due consideration is also given to how advanced technologies for radiation therapy delivery have created new treatment options for patients with localized and metastatic disease, highlighting the increasingly important role of image-guided radiotherapy in treating systemic and oligometastatic disease. Further topics include the potential value of radiotherapy in enhancing immunotherapy thanks to the broader immunostimulatory effects, how cancer stem cells and the tumor microenvironment influence response, and the application of mathematical and systems biology methods to radiotherapy.

This innovative book analyses the evolving nature of leadership, exploring an ever-increasing range of theoretical concepts and applying these to practices within healthcare organisations. A wide range of theories are covered, from behavioural to attitudinal, socio-cognitive to contingency, and social exchange to team. By identifying the common underlying characteristics that are present in leadership styles and approaches, the author successfully crafts a useful model that is adaptable to different scenarios and contexts within the realms of healthcare management. Offering a series of detailed case studies from around the world, this book proposes three crucial concepts for leadership within the health sector: leadership credibility, professional credibility and organisational dynamics. Both scholars and practitioners will find the theoretical framework provided in this book insightful and applicable in real-life situations.
