The Rebel T6i and Rebel T6i cameras are referred to as sibling devices taken from one DSLR line. In February 2015, Canon USA announced their intention regarding the popular line and promised its release for the end of April in the same year. The T6s, also dubbed 760D, has been considered by reviewers to be Canon's current model for the Rebel line. The Rebel T6i or 750D, as it is also known, since its release has become known for its low cost appeal to buyers in the market. The devices both come equipped with an autofocus

Also similar between the devices is the ISO sensitivity that ranges from one hundred to twelve thousand eight hundred, there continuous shooting capabilities of approximately five frames per second and a nineteen point auto focus system. The T6s camera differs from the earlier Rebel lines with the innovative LCD panel located to the top of the device, a quick lockable control dial on the back of the camera, a built-in HDR for video shooting, a parallel level guide and a Servo auto focus during an active live view feature. The Servo feature is designed to enable users to monitor video capturing during burst shooting. It is most suited

for the advanced photographer and mixes technology with modernity. The Rebel T6i boasts a three inch LCD monitor with ClearView 2 technology that allows for use at varied angles, continuous shooting at high-speeds, system designed for analyzing EOS scenes and innovative creative filters. Despite the differences, both devices offer users the highest quality as is now expected from Canon's Rebel line buyers.
