impressive; it can practically feel like getting a new toy. Nobody cherishes a toy that makes you read a long guidebook just to figure out how the darn thing works! That is why I have put this book together for both beginners and expert, to teach you them the building blocks of using the Canon EOS M6 Mark II camera. It starts out by going over the feature and modes in the device, followed by defining some key terms that canon camera user needs to know. This book will explain all the basics settings, Dials, Modes, Buttons, Shooting Tips and much more. It covers only what most users want to know so you don't have to comb through hundreds of pages of technical jargon just to find out how to do a common feature. This book is written in a little more

***In this updated, second edition of the authoritative, bestselling Mastering Canon EOS Flash Photography, photographer NK Guy brings the book fully up to date, with coverage of all the newest Canon gear that has hit the market since the first edition published in 2010. This includes coverage of the radio-enabled Canon Speedlite 600EX-RT and Canon Speedlite Transmitter ST-E3-RT, as well as the other Speedlites that have released since the first edition's publication: Canon Speedlite 90EX, 270EX II, 320EX, and***

***600EX. And this is the first book to cover Canon's new, affordable master unit—the Speedlite 430EX III-RT flash! Digital cameras and flash technology have truly revolutionized photography in the 21st century. Originally seen simply as a practical way to illuminate dark scenes with portable light, flash today is used for a host of creative and nuanced applications, including supplementing daylight, designing complex scenes lit by multiple light sources, and simply creating beautiful, controllable light for portraiture.***

***With LCD screens on DSLRs, the ability to get instant feedback on lighting setups is a great help in advancing one's lighting capabilities and encouraging experimentation. However, flash photography can still be a difficult artistic and technical challenge. It's simple to get that harsh deer-in-the-headlights look from built-in automatic flash, but it is a far cry from beautiful light. Creating natural-looking images is not nearly as straightforward. Mastering the properties of light and the ability to manipulate, craft, and***
