This is a challenging collection of essays on the theory of criminal law by leading philosophers from the UK, USA, and Canada. Ranging across such central issues as moral luck, mistake, and mental illness, *Action and Value in Criminal Law* aims to reorientate the study of criminal law.

How we arrived in a post-truth era, when "alternative facts" replace actual facts, and feelings have more weight than evidence. Are we living in a post-truth world, where "alternative facts" replace actual facts and feelings have more weight than evidence? How did we get here? In this volume in the MIT Press Essential Knowledge series, Lee McIntyre traces the development of the post-truth phenomenon from science denial through the rise of "fake news," from our psychological blind spots to the public's retreat into "information silos." What,

exactly, is post-truth? Is it wishful thinking, political spin, mass delusion, bold-faced lying? McIntyre analyzes recent examples—claims about inauguration crowd size, crime statistics, and the popular vote—and finds that post-truth is an assertion of ideological supremacy by which its practitioners try to compel someone to believe something regardless of the evidence. Yet post-truth didn't begin with the 2016 election; the denial of scientific facts about smoking, evolution, vaccines, and climate change offers a road map for more widespread fact denial. Add to this the wired-in cognitive biases that make us feel that our conclusions are based on good reasoning even when they are not, the decline of traditional media and the rise of social media, and the emergence of fake news as a political tool, and we have the ideal conditions for post-truth. McIntyre also argues provocatively that the right wing borrowed from postmodernism—specifically, the idea that there is no such thing as objective truth—in its attacks on science and facts. McIntyre argues that we can fight post-truth, and that the first step in fighting post-truth is to understand it.

The challenges we face can be difficult even to think about.

Climate change, war, political polarization, economic upheaval,
and the dying back of nature together create a planetary

emergency of overwhelming proportions. This revised, tenth
anniversary edition of Active Hope shows us how to strengthen

our capacity to face these crises so that we can respond with

unexpected resilience and creative power. Drawing on decades of
teaching an empowerment approach known as the Work That

Reconnects, the authors guide us through a transformational
process informed by mythic journeys, modern psychology,

spirituality, and holistic science. This process equips us with

tools to face the mess we're in and play our role in the collective transition, or Great Turning, to a life-sustaining society.

The financial crisis of 2007-9 revealed serious failings in the regulation of financial institutions and markets, and prompted a fundamental reconsideration of the design of financial regulation. As the financial system has become ever-more complex and interconnected, the pace of evolution continues to accelerate. It is now clear that regulation must focus on the financial system as a whole, but this poses significant challenges for regulators. Principles of Financial Regulation describes how to address those challenges. Examining the subject from a holistic and multidisciplinary perspective, Principles of Financial Regulation considers the underlying policies and the objectives of regulation by drawing on economics, finance, and law methodologies. The volume examines regulation in a purposive and dynamic way by framing the book in terms of what the financial system does, rather than what financial regulation is. By analysing specific regulatory measures, the book provides readers to the opportunity to assess regulatory choices on

specific policy issues and encourages critical reflection on the design of regulation.

Where do Islamic courts still operate in the modern world? What training does an Islamic judge receive? How does an Islamic court deal with a criminal case? What proof and evidence does it accept? What penalties may an Islamic judge impose in criminal matters? What law and practice do the Islamic judges apply to transgressions by Westerners in Saudi Arabia, whether they be accused of murder, adultery or drinking alcohol? This book attempts to answer all the above crucial, basic yet difficult questions of Islamic law. A formidable array of judicial talent considers all aspects of Islamic criminal procedure with the firm emphasis on its practical application in modern states today. Controversial cases are dealt with and explained from an Islamic point of view with the aim of informing a Western audience of the objectivity and fair process inherent in the Islamic system.

Here are four board games -- the Royal Game of Ur; Mehen, the Game of the Snake; Hounds and Jackals; and the Egyptian Game of Senet -- which were popular in the days of the pharaohs in ancient Egypt and in nearby countries from about 5,000 years ago, chosen and recreated by Dr. Irving Finkel of the British Museum. Everything you need to play them is here: the playing boards recreated in sumptuous colors, playing pieces, and full instructions including variations and other possibilities you may like to try.

This edited volume presents an innovative and critical analysis of corporate

compliance from an interdisciplinary and international perspective. It defines the historical framework and the various roles played by corporate compliance in today's context. It questions how different cultures affect economic behaviors and under which conditions the individual choices may be directed toward law-abiding behavior. Examining corporate compliance as a tool of criminal and regulatory policy strategies in different countries and sectors, this book also aims to provide a picture of the dimension and scope of the public-private partnership, focusing on the prevention and detection of corporate crimes. It analyzes the effects of corporate compliance on the internal organization in terms of cost-benefit assessment, as well as the opportunities in technical innovation for detecting and controlling risk.

In this exquisitely written journal-turned-journey of self-discovery, international bestselling author Paolo Cognetti examines our universal desire for connection through a voyage in the Himalayas. Why climb a mountain without ever reaching the summit? In 2017, Paolo Cognetti returned to Nepal, not to conquer the mountains but to journey through the high valleys of the Dolpo with a copy of Peter Matthiessen's The Snow Leopard in hand. Drawing on memories of his childhood in the Alps, Cognetti explored the roots of life in the mountains, truly getting to know the communities and the nature that forged this resilient, almost mythical region. Accompanying him was Remigio, a childhood friend who had never left the mountains of Italy, and Nicola, a painter he had recently met. Joined by a stalwart team of local sherpas, the trio started out in the remote Dolpo region of Nepal. From there, a journey of self-discovery shaped by illness, human connection, and empathy was born.

This Springer Brief provides a comprehensive overview of the background and recent developments of big data. The value chain of big data is divided into four phases: data generation, data acquisition, data storage and data analysis. For each phase, the book introduces the general background, discusses technical challenges and reviews the latest advances. Technologies under discussion include cloud computing, Internet of Things, data centers, Hadoop and more. The authors also explore several representative

applications of big data such as enterprise management, online social networks, healthcare and medical applications, collective intelligence and smart grids. This book concludes with a thoughtful discussion of possible research directions and development trends in the field. Big Data: Related Technologies, Challenges and Future Prospects is a concise yet thorough examination of this exciting area. It is designed for researchers and professionals interested in big data or related research. Advanced-level students in computer science and electrical engineering will also find this book useful.

Adaptive Control of Bio-Inspired Manufacturing Systems

How Man Has Shaped European Nature

(BAR S580)

This book introduces state-of-the-art models and methods based on the neuroendocrine-immune-inspired approaches in the field of manufacturing control systems. It develops various bio-inspired intelligent approaches for multiple applications in order to efficiently generate production plans and control solutions and agilely deal with the frequent unexpected disturbances at the shop floor level. It also provides an introduction to bio-inspired manufacturing systems with intelligent control structures and the latest technologies. Further, the

book describes recent advances in the bio-inspired methodology for a high-level adaptability in manufacturing systems, including the bio-inspired control architecture and the implementation of intelligent and adaptive control approaches based on neuroendocrine-immune mechanisms and hormone-regulation principles. It offers a valuable resource for graduate students, researchers and engineers in the fields of production management, manufacturing system control and related areas. /div

American law in the twentieth century describes the explosion of law over the past century into almost every aspect of American life. Since 1900 the center of legal gravity in the United States has shifted from the state to the federal government, with the creation of agencies and programs ranging from Social

Security to the Securities Exchange Commission to the Food and Drug Administration. Major demographic changes have spurred legal developments in such areas as family law and immigration law. Dramatic advances in technology have placed new demands on the legal system in fields ranging from automobile regulation to intellectual property. Throughout the book, Friedman focuses on the social context of American law. He explores the extent to which transformations in the legal order have resulted from the social upheavals of the twentieth century--including two world wars, the Great Depression, the civil rights movement, and the sexual revolution. Friedman also discusses the international context of American law: what has the American legal system drawn from other countries? And in an age of global dominance, what impact has the American legal system had abroad? This engrossing book chronicles a century of revolutionary change within a legal system that has come to affect us all.

The life of a female war photographer killed in action is told by three of her friends in this biographical novel by the author of *Bloody Cow*. Gerda Taro was a German-Jewish war photographer, anti-fascist activist, artist, and innovator who, together with her partner, the Hungarian Endre Friedmann, was one half of the alias Robert Capa, widely considered to be the twentieth century's greatest war and political photographer. She was killed while documenting the Spanish Civil

War and tragically became the first female photojournalist to be killed on a battlefield. August 1, 1937, Paris. Taro's twenty-seventh birthday, and her funeral. Friedmann leads the procession. He is devastated, but there are others, equally bereft, with him: Ruth Cerf, Taro's old friend from Leipzig with whom she fled to Paris; Willy Chardack, ex-lover; Georg Kuritzkes, another lover and a key figure in the International Brigades. They have all known a different Gerda, and one who is at times radically at odds with the heroic anti-fascist figure being mourned by the multitudes . . . Another character in the novel is the era itself, the 1930s, with economic depression, the rise of Nazism, hostility towards refugees in France, the century's ideological warfare, the cultural ferment, and the ascendancy of photography as the age's quintessential art form. Winner of the Strega Prize, *The Girl with the Leica* is a must-read for fans of historical fiction centered on extraordinary women's lives. "A biography, a feminist parable, a declaration of love for photography, and a tableau of the 1930s: *The Girl with the Leica* is all this at once." *Sole 24 Ore* (Italy) "Janeczek creatively and seamlessly spotlights war photographer Gerda Pohorylle." *Publishers Weekly*

The fascinating story of a century-old automobile dynasty Fiat is one of the world's largest automakers, but when it made headlines by grabbing control of a bankrupt Chrysler in 2009 it was unknown in the U.S. Fiat's against-all-odds

swoop on Chrysler---masterminded by Sergio Marchionne, the Houdini-like manager who saved Fiat from its own near-collapse in 2005 – has made the automaker one of the most unlikely winners of the financial crisis. *Mondo Agnelli* is a new book that looks at the chain of unpredictable events triggered by the death of Gianni Agnelli in 2003. Gianni, the charismatic, silver-haired power broker and style icon, was the patriarch who had lead the company founded by his grandfather in 1899. But Gianni's own son had committed suicide. Without a mature heir, the dynasty and Fiat were rudderless. Backed by Gianni's closest advisors, his serious, shy, and determined grandson John plucked Marchionne from obscurity. Together, they saved the family company and, inadvertently, positioned Fiat as a global trailblazer when the global storm hit. A classic story of ingenuity and hard work, the book portrays a business dynasty that triumphed over adversity and family tragedy because of its own smarts, sweat, and ability to bend the rules. An engaging tale for those interested in the stories behind the economic crash, the book contains never-before reported material about how Fiat succeeded in making Chrysler profitable where both Daimler AG and Cerberus, its previous owners, had failed. A story for a wide audience, from car buffs, business readers, lovers of Italy, and anyone fascinated by the lifestyle of Europe's most glamorous industrial dynasty, this book tells the tale of how Fiat

achieved the seemingly impossible -- turning around an American automotive icon everyone else had given up for dead.

This publication outlines the performance of the Asian Development Bank (ADB) in achieving the goals of Strategy

2030, the institution's long-term strategic framework. It is the 14th in the series of annual reports that tracks development progress in Asia and the Pacific, assesses ADB's development effectiveness, and identifies areas where the institution's performance needs to be strengthened.

For many years family law was viewed as a study of the regulation of clearly defined relationships of husband and wife and parent and child. In the case of husband and wife, it was through formal legal procedures or informal arrangements called marriage. In the case of parent and child it was either through biology or adoption. Equally defined were the stages by which these relationships were established, maintained, and terminated. However, by the close of the twentieth century, basic questions about who should be officially designated a family member and by what procedure were being raised both in the legislature and in litigation. In addition, conventional models that had defined domestic relations such as marriage, divorce, and adoption were either being expanded to include contemporary patterns of living arrangements and the current

reality, or new models were being constructed. In Family Law in America, Professor Sanford N. Katz examines the present state of family law in America. Themes include the tension between individual autonomy and governmental regulation in all aspects of family law, the extent to which relationships established before marriage are being regulated, and how marriage is being redefined to take into account equality of the sexes, and the legal recognition of same-sex marriage in some jurisdictions. It demonstrates how the definition of marriage as a partnership in which the individual spouse's rights are recognized has resulted in protection of the vulnerable spouse. It also examines fault and no-fault divorce procedures and the extent to which these procedures reflect social realities. This volume describes state intervention into the parent and child relationship and how this is reflected in the reexamination of the privacy of the family unit. It concludes with a discussion of the conventional model of adoption of children and how new assisted reproductive technologies are having an impact on family formation, particularly adoption, to take into account

new family forms. This second edition captures recent developments affecting family law in America, including the transformation of the institution of marriage from being a relationship between a man and a woman to encompassing same-sex marriage. Also, this new edition features timely material with insights into adoption that take into account developments in assisted reproduction technologies and the discussion of sexual abuse of children by clergy.

This book presents a 'Traveller's Guide' to Deaf Culture, starting from the premise that Deaf cultures have an important contribution to make to other academic disciplines, and human lives in general. Within and outside Deaf communities, there is a need for an account of the new concept of Deaf culture, which enables readers to assess its place alongside work on other minority cultures and multilingual discourses. The book aims to assess the concepts of culture, on their own terms and in their many guises and to apply these to Deaf communities. The author illustrates the pitfalls which have been created for those communities by the medical concept of 'deafness' and contrasts

this with his new concept of “Deafhood”, a process by which every Deaf child, family and adult implicitly explains their existence in the world to themselves and each other.
