This book explores the problematic relationship between education, social justice and the State, against the background of comparative education research. The book critiques the status quo of stratified school systems, and the unequal distribution of cultural capital and value added schooling. The authors address one of today's most pressing questions: Are social, economic and cultural divisions between the nations, between school sectors, between schools and between students growing or declining? There is no recent literature that underscores the transition from Pan-Africanism to Diaspora discourse. This book examines the gradual shift and four major transformations in the study of Pan-Africanism. It offers an "academic post-mortem" that seeks to gauge the extent to which Pan-Africanism overlaps with the study of the African Diaspora and reverse migrations; how Diaspora studies has penetrated various disciplines while Pan-Africanism is located on the periphery of the field. The book argues that the gradual shift from Pan-African discourses has created a new pathway for engaging Pan-African ideology from academic and social perspectives. Also, the book raises questions about the recent political waves that have swept across North Africa and their implications to the study of twenty-first century Pan-African solidarity on the African continent. The ways in which African institutions are attracting and mobilizing returnees and Pan-Africanists with incentives as dual-citizenship for

diasporans to support reforms in Africa offers a new alternative approach for exploring Pan-African ideology in the twenty-first century. Returnees are also using these incentives to gain economic and cultural advantage. The book will appeal to policy makers, government institutions, research libraries, undergraduate and graduate students, and scholars from many different disciplines.

This 5-hour free course looked at interpreting diagrams, charts and graphs and how to use them to convey information more effectively.

In the first half of the twentieth century Britishness was an integral part of the culture that pervaded life in the colonial Caribbean. Caribbean peoples were encouraged to identify with social structures and cultural values touted as intrinsically British. Many middle-class West Indians of colour duly adopted Britishness as part of their own identity. Yet, as Anne Spry Rush explains in *Bonds of Empire*, even as they re-fashioned themselves, West Indians recast Britishness in their own image, basing it on hierarchical ideas of respectability that were traditionally British, but also on more modern expectations

of racial and geographical inclusiveness. Britain became the focus of an imperial British identity, an identity which stood separate from, and yet intimately related to, their strong feelings for their tropical homelands. Moving from the heights of empire in 1900 to the independence era of the 1960s, Rush argues that middle-class West Indians used their understanding of Britishness first to establish a place for themselves in the British imperial world, and then to negotiate the challenges of decolonization. Through a focus on education, voluntary organization, the challenges of war, radio broadcasting, and British royalty, she explores how this process worked in the daily lives of West Indians in both the Caribbean and the British Isles. Bonds of Empire thus traces West Indians' participation in a complex process of cultural transition as they manipulated Britishness and their relationship to it not only as colonial peoples but also as Britons

This Handbook provides a systematic and analytical approach to the various dimensions of international, ethnic and domestic conflict over the uses of national history in education since the end of the Cold War. With an upsurge in political, social and cultural upheaval, particularly since the fall of state socialism in Europe, the importance of history textbooks and curricula as tools for influencing the outlooks of entire generations is thrown into sharp relief. Using case studies from 58 countries, this book explores how history education has had the potential to

shape political allegiances and collective identities. The contributors highlight the key issues over which conflict has emerged – including the legacies of socialism and communism, war, dictatorships and genocide – issues which frequently point to tensions between adhering to and challenging the idea of a cohesive national identity and historical narrative. Global in scope, the Handbook will appeal to a diverse academic audience, including historians, political scientists, educationists, psychologists, sociologists and scholars working in the field of cultural and media studies.

The purpose of this book is to examine the performance of Guyana's economy during the era of dirigisme and the period of economic liberalisation with emphasis on a market economy, using all available micro-and macro-data. In a much broader and meaningful sense, this book deals with the socio-economic progress of Guyana from the 1960s, with heavy emphasis on the market reforms, because this is the dominant and interesting story for policy lessons in the Third World. This book also focuses on what has happened to poverty, inequality, and other social indicators during the reform period. Until now, there has not been any systematic examination of the effects of the economic reforms in Guyana on unemployment, wages and industrial activity; poverty and inequality; farmers' response to price liberalisation; education and health indicators; ethnicity and growth; and governance, crime and corruption. These issues and more are the subject matter of this

book. The book refers to those aspects of Guyana's history and recent political events that bear directly on economic policy and the performance of the economic system.
