The Applied Mergers and Acquisitions Workbook provides a useful self-training study guide for readers of Applied Mergers and Acquisitions who want to review the drivers of M&A success and failure. Useful review questions as well as problems and answers are provided for both professionals and students. Readers will further their knowledge, build practical intuition, and learn the art and science of M&A by using this comprehensive self-study workbook in conjunction with the main text. Bank Management and Financial Services, now in its ninth edition, is designed primarily for students interested in pursuing careers in or learning more about the financial services industry. It explores the services that banks and their principal competitors (including savings and loans, credit unions, security and investment firms) offer in an increasingly competitive financial-services marketplace. The ninth edition discusses the major changes and events that are remaking banking and financial services today. Among the key events and unfolding trends covered in the text are: Newest Reforms in the Financial System, including the new Dodd-Frank Financial Reform Law and the Credit Card Accountability, Responsibility, and Disclosure (CARD) Act of 2009. Global Financial Sector coverage of the causes and impact of the latest "great recession." Systemic Risk and the presentation of the challenges posed in the financial system. Exploration of changing views on the "too big to fail" (TBTF) doctrine and how regulators may be forced to deal with TBTF in the future. Controlling Risk Exposure presentation of methods in an increasingly volatile economy

An updated look at how corporate restructuring really works Stuart Gilson is one of the leading corporate restructuring experts in the United States, teaching thousands of students and consulting with numerous companies. Now, in the second edition of this bestselling book, Gilson returns to present new insight into corporate restructuring. Through real-world case studies that involve some of the most prominent restructurings of the last ten years, and highlighting the increased role of hedge funds in distressed investing, you'll develop a better sense of the restructuring process and how it can truly create value. In addition to "classic" buyout and structuring case studies, this second edition includes coverage of Delphi, General Motors, the Finova Group and Warren Buffett, Kmart and Sears, Adelphia Communications, Seagate Technology, Dupont-Conoco, and even the Eurotunnel debt restructuring. Covers corporate bankruptcy reorganization, debt workouts, "vulture" investing, equity spin-offs, asset divestitures, and much more Addresses the effect of employee layoffs and corporate downsizing Examines how companies allocate value and when a corporation should "pull the trigger" From hedge funds to subprime busts, this second edition offers a rare look at some of the most innovative and controversial restructurings ever. This book offers 58 cases that combine both the qualitative and quantitative aspects of financial management. The cases are based on real firms, real products, real individuals, and most importantly, real issues and offer a complete picture of the financial management process. "This is a first-rate book by a first-rate group of scholars. It provides a clear distillation of some very powerful new concepts and integrates [them] into a practical general management framework that will help managers meet the challenges of the 21st century." -W. Carl Kester James R. Williston Professor of Business Management Harvard Business School. "The Portable MBA is an outstanding resource. Every prospective MBA student should read it to jump-start their course work; every practicing manager, even those with MBAs, would also profit greatly from time spent with this excellent book." -Dennis E. Logue, Steven Roth Professor of Management The Amos Tuck School, Dartmouth College. "An excellent launching pad for anybody interested in an overview of the state of business administration in the 1990s . . . an indispensable guide for the beginner and seasoned manager alike." -L. L. Marlantes, President and CEO The Rockefeller Group. "The Portable MBA will appeal to those who recognize that the tired old rules of business no longer apply in today's rapidly changing global environment. This book offers students and business professionals an up-to-date approach that integrates all the key functional areas of the business enterprise." -John D. Finnerty, PhD, Partner, Coopers & Lybrand LLP Professor of Finance, Fordham University. "[The Portable MBA] offers an interdisciplinary, succinct, and practical approach to tools, concepts, and emerging trends facing executives who compete in the global economy." -Barry D. Leskin National Head of Human Resources Ernst&Young, London. The Portable MBA, Third Edition offers you an opportunity to learn the cutting-edge business theory and practice now being taught at today's top MBA programs. Written by faculty members of the prestigious Darden School at the University of Virginia, and structured around that school's world-renowned general management program, this completely new edition reflects the most important current trends in MBA education, namely cross-functional management, leading from the middle, alliance management, and an understanding of global trade and investing. Like its predecessors, The Portable MBA, Third Edition delves into all the core material covered in the first year of a typical MBA program: marketing, economics, business ethics, technology, strategy, and human resources management to select a few. But here the authors take an integrated approach, highlighting concepts that cross functional lines and responsibility and provide an enterprise-wide perspective. In addition, numerous case studies, vignettes, and first-person accounts from managers and executives at leading companies create a richer understanding of business transformation. Finally, this updated version contains capstone material that highlights the challenges facing the twenty-first-century manager building customer value, creating new paradigms for managing in periods of turbulence, and managing technology. In the grand tradition of the internationally bestselling Portable MBA Series, The Portable MBA, Third Edition brings the insight and wisdom of some of the world's top business educators to the comfort of your favorite reading chair.

CASES PROBLEMS IN FINANCE, 2e is designed to be used in conjunction with a standard introductoryfinancial management textbook or as the foundation for an introductory case course. The cases may also be used as reinforcement of theory in an intermediate finance course. The purpose of the casebook is to reinforce and expand upon the theoretical material learned in the introductory undergraduate business finance course. The cases are concise directed and designed to generate discussion, focusing upon three elements: industry and company setting; the underlying financial theory; and the particular decision at hand, giving students the opportunity to make decisions based on situations that closely replicate decisions faced by practicing managers. The cases are considered directed because end-of-case questions are included that highlight the major decision points that need to be addressed, helping students come to a final business decision.

"Case Studies in Finance" links managerial decisions to capital markets and the expectations of investors. At the core of almost all of the cases is a valuation task that requires students to look to financial markets for guidance in resolving the case problem. The focus on value helps managers understand the impact of the firm on the world around it. These cases also invite students to apply modern information technology to the analysis of managerial decisions.

Small jurisdictions have become significant players in cross-border corporate and financial services. Their nature, legal status, and market roles, however, remain under-theorized. Lacking a sufficiently nuanced framework to describe their functions in cross-border finance - and the peculiar strengths of those achieving global dominance in the marketplace - it remains impossible to evaluate their impacts in a comprehensive manner. This book advances a new conceptual framework to refine the analysis and direct it toward more productive inquiries. Bruner canvasses extant theoretical frameworks used to describe and evaluate the roles of small jurisdictions in cross-border finance. He then proposes a new concept that better captures the characteristics, competitive strategies, and market roles of those achieving global dominance in the marketplace - the "market-dominant small jurisdiction" (MDSJ). Bruner identifies the central features giving rise to such jurisdictions' competitive strengths - some reflect historical, cultural, and geographic circumstances, while others reflect development strategies pursued in light of those circumstances. Through this lens, he evaluates a range of small jurisdictions that have achieved global dominance in specialized areas of cross-border finance, including Bermuda, Dubai, Singapore, Hong Kong, Switzerland, and Delaware. Bruner further tests the MDSJ concept's explanatory power through a broader comparative analysis, and he concludes that the MDSJs' significance will likely continue to grow - as will the need for a more effective means of theorizing their roles in cross-border finance and the global dynamics generated by their ascendance.

The Price of Strategic Deterrence

The One Best System presents a major new interpretation of what actually happened in the development of one of America's most influential institutions. At the same time it is a narrative in which the participants themselves speak out: farm children and factory workers, frontier teachers and city superintendents, black parents and elite reformers. And it encompasses both the achievements and the failures of the system: the successful assimilation of immigrants, racism and class bias; the opportunities offered to some, the injustices perpetuated for others. David Tyack has placed his colorful, wide-ranging view of history within a broad new framework drawn from the most recent work in history, sociology, and political science. He looks at the politics and inertia, the ideologies and power struggles that formed the basis of our present educational system. Using a variety of social perspectives and methods of analysis, Tyack illuminates for all readers the change from village to urban ways of thinking and acting over the course of more than one hundred years.

A comprehensive guide to the world of mergers and acquisitions Why do so many M&A transactions fail? And what drives the success of those deals that are consummated? Robert Bruner explains that M&A can be understood as a response by managers to forces of turbulence in their environment. Despite the material failure rates of mergers and acquisitions, those pulling the trigger on key strategic decisions can make them work if they spend great care and rigor in the development of their M&A deals. By addressing the key factors of M&A success and failure, Applied Mergers and Acquisitions can help readers do this. Written by one of the foremost thinkers and educators in the field, this invaluable resource teaches readers the art and science of M&A valuation, deal negotiation, and bargaining, and provides a framework for considering tradeoffs in an effort to optimize the value of any M&A deal.

Written by a widely respected author team, this investments text takes an empirical approach to explaining current, real-world practice. Providing the most comprehensive coverage available, the text emphasizes investment alternatives and teaches students how to analyze these choices and manage their portfolios.

Linear Algebra offers a unified treatment of both matrix-oriented and theoretical approaches to the course, which will be useful for classes with a mix of mathematics, physics, engineering, and computer science students. Major topics include singular value decomposition, the spectral theorem, linear systems of equations, vector spaces, linear maps, matrices, eigenvalues and eigenvectors, linear independence, bases, coordinates, dimension, matrix factorizations, inner products, norms, and determinants.

A market leader, this book has detailed but flexible coverage of options, futures, forwards, swaps, and risk management - as well as a solid introduction to pricing, trading, and strategy allowing readers to gain valuable information on a wide range of topics and apply to situations they may face.

This book presents 50 case studies and technical notes in finance, targeted toward upper-level undergraduates and introductory and intermediate-level MBA students. The purpose of these cases is to afford the basis for classroom discussion of tools and concepts. The range of topics includes value creation, market efficiency, economic profit, financial analysis and forecasting, cost of capital, capital budgeting, dividend policy, equity issuance, capital structure management, derivative securities, and mergers and acquisitions. The spirit of these cases is to link the study of value creation with a respect for the administrative point of view, and an orientation toward capital markets. Three-quarters of the cases are set in 2000 or after; half the cases are set outside of the United States or draw significantly on international issues; 37 percent are new or seriously updated since the fourth edition. A new chapter addresses ethics in finance.Note: The downloadable document describes the book in more detail with excerpts from the preface and table of contents. Also, an Instructor's Manual containing discussion outlines and case analyses is available on a restricted basis to university instructors upon request to Ms. Barbara Hari, McGraw-Hill/Irwin (mailto:Barbara_Hari@mcgraw-hill.com). A collection of spreadsheet files supporting student and teacher preparation of the cases is available to instructors adopting the book for classroom use.

This helpful manual assists instructors that teach a course using the case method. It helps instructors explore what it means to teach by discussion leadership. It has a focus on higher education with a professional orientation. It also helps instructors consider a range of possible teaching materials, but emphasizes case studies. The focus is on learning, not teaching.

This is a book of hypothetical cases written to give students real examples of key finance concepts. Each case is 3-4 pages in length, and concludes with questions and problems that walk students through calculations and critical analysis of the case to help them make business decisions.

A detailed look at the worst M&A deals ever and the lessons learned from them It's common knowledge that about half of all merger and acquisition (M&A) transactions destroy value for the buyer's shareholders, and about three-quarters fall short of the expectations prevailing at the time the deal is announced. In Deals from Hell, Robert Bruner, one of the foremost thinkers and educators in this field, uncovers the real reasons for these mishaps by taking a closer look at twelve specific instances of M&A failure. Through these real-world examples, he shows readers what went wrong and why, and converts these examples into cautionary tales for executives who need to know how they can successfully navigate their own M&A deals. These page-turning business narratives in M&A failure provide much-needed guidance in this area of business. By addressing the key factors to M&A success and failure, this comprehensive guide illustrates the best ways to analyze, design, and implement M&A deals. Filled with in-depth insights, expert advice, and valuable lessons gleaned from other M&A transactions, Deals from Hell helps readers avoid the common pitfalls associated with this field and presents them with a clear framework for thinking about how to make any M&A transaction a success.

Lessons Learned from the Market's Perfect Storm

Tommy Quinn is a recent Georgetown grad who has just landed the job of his dreams as an investment banker as J. S. Spenser, and the perfect girl, Frances Sloan, the daughter of one of New York's oldest moneyed families. As he travels from the most exclusive ballrooms of the Racquet and Tennis Club to the stuffiest boardrooms of J. S. Spenser, from the golf links of Piping Rock to the bedrooms of Park Avenue, and from the debauched yacht of a Mexican billionaire to the Ritalin-strewn prep school dorm room of his younger brother, he finds that neither the job nor girl are what they once seemed. Set against the backdrop of money, lust, power, corruption, cynicism, energy, and excitement that is Wall Street, Dana Vachon's debut is suffused with an authenticity that only an author who lives in the world it portrays could provide. With Mergers & Acquisitions, he delivers a stylish and hilarious tale of the lives and loves of well-to-do young Manhattanites in their first year on Wall Street. Sharp, fast-paced, and bitingly witty, Mergers & Acquisitions is destined to become one of the year's most buzzed-about debuts.

Praise for THE PANIC OF 1907 "Before reading The Panic of 1907, the year 1907 seemed like a long time ago and a different world. The authors, however, bring this story alive in a fast-moving book, and the reader sees how events of that time are very relevant for today's financial world. In spite of all our advances, including a stronger monetary system and modern tools for managing risk, Bruner and Carr help us understand that we are not immune to a future crisis." —Dwight B. Crane, Baker Foundation Professor, Harvard Business School "Bruner and Carr provide a thorough, masterly, and highly readable account of the 1907 crisis and its management by the great private banker J. P. Morgan. Congress heeded the lessons of 1907, launching the Federal Reserve System in 1913 to prevent banking panics and foster financial stability. We still have financial problems. But because of 1907 and Morgan, a century later we have a respected central bank as well as greater confidence in our money and our banks than our great-grandparents had in theirs." —Richard Sylla, Henry Kaufman Professor of the History of Financial Institutions and Markets, and Professor of Economics, Stern School of Business, New York University "A fascinating portrayal of the events and personalities of the crisis and panic of 1907. Lessons learned and parallels to the present have great relevance. Crises and panics are as much a part of our future as our past." —John Strangfeld, Vice Chairman, Prudential Financial "Who would have thought that a hundred years after the Panic of 1907 so much remained to be written about it? Bruner and Carr break significant new ground because they are willing to do the heavy lifting of combing through massive archival material to identify and weave together important facts. Their book will be of interest not only to banking theorists and financial historians, but also to business school and economics students, for its rare ability to teach so clearly why and how a panic unfolds." —Charles Calomiris, Henry Kaufman Professor of Financial Institutions, Graduate School of Business, Columbia University Essential guidance for the corporate finance professional — advisor, Board Director, CFO, Treasurer, business development executive, or M&A expert—to ask the right questions and make the critical decisions.
