This book explores the significance of silence within and beyond pedagogical contexts. Silence is a complex and multidimensional phenomenon for everyday life: since schools mirror society, it is also significant in education. While silence can be experienced in a multitude of different ways, the author reflects on whether silence itself can bear a message: is there an aspect of dialogue in silence, or is it a language all of its own? This book examines a variety of silences essential for education, examining such topics as silence and aspects of power, silent students, and the relationship between listening and silence. Drawing on a range of empirical data, the author elucidates the significance of silence in pedagogical contexts.

Still the biggest concern for many on initial teacher training courses is the acquisition of subject knowledge and the ability to translate that into effective teaching. This book addresses this - building on the core subject knowledge covered in the Achieving QTS series and relating it to classroom practice. It supports trainees in extending and deepening their knowledge of ICT and demonstrating how to apply it to planning and implementing lessons.

Practical and up-to-date teaching examples are used to clearly contextualize subject knowledge. A clear focus on classroom practice helps trainees to build confidence and develop their own teaching strategies.

They have nothing in common except for Scrabble. But a small deception grows out of control when Ambrose convinces a reluctant Cosmo to take him to a Scrabble club. Could this spell disaster for Ambrose?

This multidisciplinary collection examines the connections between education, migration and translation across school and higher education sectors, and a broad range of socio-geographical contexts. Organised around the themes of knowledge, language, mobility, and practice, it brings together studies from around the world to offer a timely critique of existing practices that privilege some ways of knowing and communicating over others. With attention to issues of internationalisation, forced migration, minorities and indigenous education, this volume asks how the dominance of English in education might be challenged, how educational contexts that privilege bi- and multi-lingualism might be re-imagined, what we might learn from existing educational practices that privilege minority or indigenous languages, and how we might exercise 'linguistic hospitality' in a world marked by high levels of forced migration and educational mobility. As such, it will appeal to scholars across the social sciences with interests in education, migration and intercultural communication.

This book is dedicated to Aristid Lindenmayer on the occasion of his 60th birthday on November 17, 1985. Contributions range from mathematics and theoretical computer science to biology. Aristid Lindenmayer introduced language-theoretic models for developmental biology in 1968. Since then the models have been customarily referred to as L systems. Lindenmayer's invention turned out to be one of the most beautiful examples of interdisciplinary science: work in one area (developmental biology) induces most fruitful ideas in other areas (theory of formal languages and automata, and formal power series). As evident from the articles and references in this book, the interest in L systems is continuously growing. For newcomers the first contact with L systems usually happens via the most basic class of L systems, namely, DOL systems. Here "0" stands for zero context between developing cells. It has been a major typographical problem that printers are unable to distinguish between 0 (zero) and 0 (oh). Thus, DOL was almost always printed with "oh" rather than "zero", and also pronounced that way. However, this misunderstanding turned out to be very fortunate. The wrong spelling "DOL" of "DOL" could be read in the suggestive way: DO L Indeed, hundreds of researchers have followed this suggestion. Some of them appear as contributors to this book. Of the many who could not contribute, we in particular regret the absence of A. Ehrenfeucht, G. Herman and H.A. Maurer whose influence in the theory of L systems has been most significant.

There has been much opinion and little fact written on the subject of lock picking. It is the purpose of this book to clarify the facts about this delicate process, and at the same time to train you in proper procedure. Reading this book is certainly enough to get you started picking simple locks, but remember: a great deal of time and patience are needed to become a truly proficient locksmith. In this volume, you will learn the fundamental theories of lock picking in addition to proper terminology, the importance of tool design (i.e. how to select and use the right tool for a given job), the effects of tolerances, and finally the techniques most commonly used by locksmiths to successfully pick the vast majority of standard pin and wafer tumbler locks. Lock picking is a useful, engaging, and satisfying skill; with this book and a little determination, you'll be off to a great start.

In the future world of Scorch, America is run by a "corporacracy." Three conglomerates have taken control not by force but by manipulating common beliefs and values through the media, and particularly by playing on Americans' fears of Big Brother. Consumerism and privatization have run amok in this landscape of flashing screens and subtle brainwashing, a world where even city streets and public schools are run by big business. This is a darkly comic first novel of a dystopian future, with echoes of 1984 and Brave New World.

Because he was bored with life on a world that had become a museum, Paul Hilder answered a mysterious advertisement, and found himself plunged into a life that was different, dangerous and far from boring. This is the story of an Earth that existed alongside the one that Paul Hilder knew, and with which he became so involved that the bitter struggle waged on one world threatened to encroach on the other. And it is the story of Ruth, daughter of the powerful Controller Orstey, and her longing for a peace and happiness that did not exist in her own space and time - a peace she tried to find by passing through the cosmic junction of THE ECHOING WORLDS.

Proud of Their Heritage and Sustained by Their Faith, They Came to Tame a New Land She had promised herself that once they left the fjords of Norway, she would not look back. After three long years of scrimping and saving to buy tickets for their passage to America, Roald and Ingeborg Bjorklund, along with their son, Thorliff, finally arrive at the docks of New York City. It was the promise of free land that fed their dream and lured them from their beloved home high above the fjords of Norway in 1880. Together with Roald's brother Carl and his family, they will build a good life in a new land that promises untold wealth and vast farmsteads for their children. As they join the throngs of countless immigrants passing through Castle Garden, they soon discover that nothing is as they had envisioned it. Appalled by the horrid stories of fellow immigrants bilked of all their money and forced to live in squalid living conditions, the Bjorklunds continue their long journey by train as far as Grand Forks. From there a covered wagon takes them into Dakota Territory, where they settle on the banks of the Red River. But there was no way for them to foresee the price they will have to pay to wrest a living from the indomitable land. The virgin prairie refuses to yield its treasure without a struggle. Will they be strong enough to overcome the hardships of that first winter?

On September 13, 1998, John Scalzi sat down in front of his computer to write the first entry in his blog Whatever--and changed the history of the Internet as we know it today. What, you're not swallowing that one? Okay, fine: He started writing Whatever and amused about 15 people that first day. If that many. But he kept at it, for ten years and running. Now 40,000 people drop by on a daily basis to see what he's got to say. About what? Well, about whatever: Politics, writing, family, war, popular culture and cats (especially with bacon on them). Sometimes he's funny. Sometimes he's serious (mostly he's sarcastic). Sometimes people agree with him. Sometimes they send him hate mail, which he grades on originality and sends back. Along the way, Scalzi's become a best-selling, award-winning author, a father, and a geek celebrity. But no matter what, there's always another Whatever post to amuse and/or enrage his readers. Your Hate Mail Will Be Graded collects some of the best and most popular Whatever entries from the first ten years of the blog – a decade of Whatever, presented in delightfully random form, just as it should be. * Winner of the 2009 Hugo Award for Best Non-Fiction Book * Introduction by Star Trek actor Wil Wheaton Old Man's War Series #1 Old Man's War #2 The Ghost Brigades #3 The Last Colony #4 Zoe's Tale #5 The Human Division #6 The End of All Things Short fiction: "After the Coup" Other Tor Books The Android's Dream Agent to the Stars Your Hate Mail Will Be Graded Fuzzy Nation Redshirts Lock In The Collapsing Empire (forthcoming) At the Publisher's request, this title is being sold without Digital Rights Management Software (DRM) applied.
