Dave Hitz likes to solve fun problems. He didn't set out to be a Silicon Valley icon, a business visionary, or even a billionaire. But he became all three. It turns out that business is a mosaic of interesting puzzles like managing risk, developing and reversing strategies, and looking into the future by deconstructing the past. As a founder of NetApp, a data storage firm that began as an idea scribbled on a placemat and now takes in \$4 billion a year, Hitz has seen his company go through every major cycle in business—from the Jack-of-All-Trades mentality of a start-up, through the tumultuous period of the IPO and the dot-com bust, and finally to a mature enterprise company. NetApp is one of the fastest-growing computer companies ever, and for six years in a row it has been on Fortune magazine's list of Best Companies to Work For. Not bad for a high school dropout who began his business career selling his blood for money and typing the names of diseases onto index cards. With colorful examples and anecdotes, *How to Castrate a Bull* is a story for everyone interested in understanding business, the reasons why companies succeed and fail, and how powerful lessons often come from strange and unexpected places. Dave Hitz co-founded NetApp in 1992 with James Lau and Michael Malcolm. He served as a programmer, marketing evangelist, technical architect, and vice president of engineering. Presently, he is responsible for future

strategy and direction for the company. Before his career in Silicon Valley, Dave worked as a cowboy, where he got valuable management experience by herding, branding, and castrating cattle.

"The Man Who Rapes? Should Be Castrated" is an international Book which is compiled by Pratham Mittal from India, Tamara Nasevska from Macedonia and Rishav Banerjee from India following their tireless dedication and surpassing expectations to air out emerging issues in our society today. This book is predicated on "Rape Culture". "We live within a society where women are worshipped as goddesses and on the other side, they're getting raped every minute. "Rape cases are increasing every minute in world and it's become a critical issue in our society. Human service providers are being asked to affect this serious social problem. Most are finding the cause behind this heinous crime which is somewhere related to our history but nobody wants to debate the history because it shows the rapes of women in the world and a couple of dark truths which can hurt the emotions of the various people. The letters of Paul are among the most commonly cited biblical texts in ongoing cultural and religious disputes about gender, sexuality, and embodiment. Appalling Bodies reframes these uses of the letters by reaching past Paul toward other, far more fascinating figures that appear before, after, and within the letters. The letters repeat ancient stereotypes about women, eunuchs, slaves, and barbarians--in their

Roman imperial setting, each of these overlapping groups were cast as debased, dangerous, and complicated. Joseph Marchal presents new ways for us to think about these dangers and complications with the help of queer theory. Appalling Bodies juxtaposes these ancient figures against recent figures of gender and sexual variation, in order to defamiliarize and reorient what can be known about both. The connections between the marginalization and stigmatization of these figures troubles the history, ethics, and politics of biblical interpretation. Ultimately, Marchal assembles and reintroduces us to Appalling Bodies from then and now, and the study of Paul's letters may never be the same.

**universally despised. Its members were peasants from the Russian heartland skilled in the arts of animal husbandry who turned their knives on themselves to become "eunuchs for the kingdom of heaven's sake." Convinced that salvation came only with the literal excision of the instruments of sin, they were known as Skoptsy (the self-castrated). Their community thrived well into the twentieth century, when it was destroyed in the Stalinist Terror. In a major feat of historical reconstruction, Laura Engelstein tells the sect's astonishing tale. She describes the horrified reactions to the sect by outsiders, including outraged bureaucrats, physicians, and theologians. More important, she allows the Skoptsy a say in defining the contours of their history and the meaning behind their sacrifice. Her deft handling of their letters and notebooks lends her book unusual depth and pathos, and she provides a heartbreaking account of willing exile and of religious belief so strong that its adherents accepted terrible pain and the denial of a basic human experience. Although the Skoptsy express joy at their salvation, the words of even the most fervent believers**

reveal the psychological suffering of life on society's margins. No foreign tribe or exotic import, the sect drew its members from the larger peasant society where marriage was expected and adulthood began with the wedding night. Set apart by the very act that guaranteed their redemption, these "lambs of God" became adept at concealing their sectarian identity as they interacted with their Orthodox neighbors. Interaction was necessary, Engelstein explains, since the survival of the Skoptsy depended upon recruitment of new members and on success in agriculture and trade. Realizing that some prejudices have changed little over the centuries, Engelstein cautions that "we must not cast the shadow of our own distress on the story of the Skoptsy. Their physical suffering was something they willingly embraced." In *Castration and the Heavenly Kingdom*, she has produced a remarkable history that also illuminates the mysteries of the human heart. *The “well-written and compelling history” of a 1922 racist reign of terror in a small Texas town—now updated with a shocking deathbed confession (USA Today). What happened in Kirven, Texas, in May 1922, has been forgotten by the outside world. But in *Flames After Midnight*, historian Monte Akers uncovers the true story behind a young white woman's brutal murder and the burning alive of three black men who were almost certainly innocent of it. This was followed by a month-long reign of terror as white men killed blacks while local authorities concealed the identity of the white murder suspects and allowed them to go free. Akers paints a vivid portrait of a community desolated by race hatred and its own refusal to face hard truths. He sets this tragedy within the story of a region prospering from an oil boom but plagued by lawlessness, and traces the lynching's repercussions down the decades to the present day. In an epilogue, Akers reveals new information that came to light as a result of this book's publication, including an eyewitness account of the burnings from an elderly man who claimed to have castrated two of the men before they were lynched.*

*When Europeans settled in the early South, they quarreled over many things--but few imbroglios were so fierce as battles over land. Landowners wrangled bitterly over boundaries with neighbors and contested areas became known as "the devil's lane." Violence and bloodshed were but some of the consequences to befall those who ventured into these disputed territories. The Devil's Lane highlights important new work on sexuality, race, and gender in the South from the seventeenth- to the nineteenth-centuries. Contributors explore legal history by examining race, crime and punishment, sex across the color line, and slander. Emerging stars and established scholars such as Peter Wood and Carol Berkin weave together the fascinating story of competing agendas and clashing cultures on the southern frontier. One chapter focuses on a community's resistance to a hermaphrodite, where the town court conducted a series of "examinations" to determine the individual's gender. Other pieces address topics ranging from resistance to sexual exploitation on the part of slave women to spousal murders, from interpreting women's expressions of religious ecstasy to a pastor's sermons about depraved sinners and graphic depictions of carnage, all in the name of "exposing" evil, and from a case of infanticide to the practice of state-mandated castration. Several of the authors pay close attention to the social and personal dynamics of interracial women's networks and relationships across place and time. The Devil's Lane illuminates early forms of sexual oppression, inviting comparative questions about authority and violence, social attitudes and sexual tensions, the impact of slavery as well as the twisted course of race relations among blacks, whites, and Indians. Several scholars look particularly at the Gulf South, myopically neglected in traditional literature, and an outstanding feature of this collection. These eighteen original essays reveal why the intersection of sex and race marks an essential point of departure for understanding southern social relations, and a turning point for the field of colonial history. The rich, varied and distinctive experiences showcased in The Devil's Lane provides an*

most of us) will be surprised to learn how important this operation was to many cultures throughout the world in times past, and to a lesser extent, even today. In Italy thousands of young boys were castrated to prepare their voices for the opera. In Arab lands slaves (both black and white) were castrated in order to become harem guards. Chinese emperors found castrated males to be extremely reliable for treasurers and other governmental posts. In the past, the operation was very dangerous and many died from infections. But it also had its beneficial side effects. The average castrated male lives 15 years longer than "normal" men. This is because harmful hormones and other impediments were removed from the man's system. For instance, one cannot get testicular cancer if he has no testicles. Many ancient religions, as well as the early Christians, used their religious duties unhampered by impure thoughts and immoral deeds. Though Christians gradually abandoned this practice some breakaway groups continued to castrate young men in Russia and elsewhere even in this 20th century. The author believes that castration can still play an important role in modern society. He says that it can be used to prevent serious crimes, diseases, and the loss of vital spiritual values.

2 CUT BALLS That's how much I paid to become, one day, a famous music star. I'm Leonardo Pontì, I study and live in a conservatory in Italy, and I'm a castrated teen. In two years I will finish school, but who knows if I will really sing in a majestic opera house, or prostitute in the dirty streets of the harbor? 1 BEST FRIEND Gianni and I spent most of the time together, sing difficult songs, and fight back bullies like Cesare who thinks that "the not wholes"-castrated students-are just trash. Then why my friend stops to talk with me? 0 GIRLFRIENDS Women don't like castrated men, they can't get married, don't have sex, their body is too weak, and so on, but Martina, a gorgeous actress, is happy with me. The rector of the school, not so much. He forbids me to see her. INFINITE FANS If the king picks me for his new opera, everybody will know my name. But my voice ... What's happening to my acute voice? "The not whole" is a young adult historical fiction story about teen and music, school, friendship.

This volume was planned to provide a comprehensive survey of the role of the anabolic-androgenic steroids in the vital economy exclusive of the androgenic (sexual) functions. It seemed appropriate to bring together all of this information in an organized fashion in one volume at this time not only to serve as a source of information but also to indicate and suggest areas that need further exploration. The anabolic action of the steroid hormones has gone through a period of great activity in both basic and clinical research. A complete understanding of the manifold anabolic effects still remains to be elucidated and the art of clinical application is only gradually becoming apparent. This volume should be useful not only

to the experienced investigator in both basic and clinical research but also for the novice. Furthermore, it should serve as a source of information for the careful use of these steroids in certain metabolic diseases. These steroids have had wide clinical application with variable results. In many instances further careful exploration is suggested. Other instances have demonstrated varying degrees of usefulness.

State prisons played an indispensable part in the terror of the Third Reich, incarcerating many hundreds of thousands of men and women during the Nazi era. This important book illuminates the previously unknown world of Nazi prisons, their victims, and the judicial and penal officials who built and operated this system of brutal legal terror. Nikolaus Wachsmann describes the operation and function of legal terror in the Third Reich and brings Nazi prisons to life through the harrowing stories of individual inmates. Drawing on a vast array of archival materials, he traces the series of changes in prison policies and practice that led eventually to racial terror, brutal violence, slave labor, starvation, and mass killings. Wachsmann demonstrates that “ordinary” legal officials were ready collaborators who helped to turn courts and prisons into key components in the Nazi web of terror. And he concludes with a discussion of the whitewash of the Nazi legal system in postwar West Germany.

*Eunuchs and Castrati* examines the enduring fascination among historians, literary critics, musicologists, and other scholars around the figure of the castrate. Specifically, the book asks what influence such fascination had on the development and delineation of modern ideas around sexuality and physical impairment. Ranging from Greco-Roman times to the twenty-first century, Katherine Crawford brings together travel accounts, diplomatic records, and fictional sources, as well as existing scholarship, to demonstrate how early modern interlocutors reacted to and depicted castrates. She reveals how medicine and law operated to maintain the privileges of bodily integrity and created and extended prejudice against those without it. In consequence, castrates were constructed as gender deviant, disabled social subjects and demarcated as inferior. Early modern cultural loci then reinforced these perceptions, encouraging an othering of castrates in public contexts. These extensive, almost obsessive accounts of appearance, social propensities, and gender characteristics of castrated men reveal the historical lineages of sexual stigma and hostility towards gender non-normative and
